WINTER 25

FOR THE PLANET AND FOR YOU

# Committed to Crafting a Better Binding.

At Fix we are dedicated to building a better binding; for the planet & for the way they ride.

FIX bindings offer unparalleled durability, eco-friendly manufacturing, and user-friendly design with an industry first 100% lifetime warranty on buckles and basetrays. These bindings are not only built to last longer than competitors but also prioritize environmental sustainability. With tool-free adjustments and a simple, robust design, FIX bindings enhance your snowboarding experience while being kinder to the planet. Embodying the passion of snowboarders, these bindings are affordable yet performance-focused, ensuring accessibility for all. Our commitment to innovation and reducing environmental impact guides our future. FIX is a brand by snowboarders, for snowboarders, dedicated to crafting simply better bindings for a sustainable future in the sport.

MENS ALL MOUNTAIN

# RB-1

The new flagship.  
The new standard.

If you take everything we've learned in our 9 years as a binding brand and culminate that knowledge into better fit, better function, better strength and better performance, you get the RB-1. The new flagship of the Fix line, the RB-1 has the new Hi-Lo ankle strap for the ultimate comfort as well as a toe ramp footbed for lighting-fast responsiveness. The ergonomic, asymmetrical highbacks are designed to allow lateral flex and support where you need them.

MENS FREERIDE

# PEAK+

A Freerider's Dream

Designed to be the ultimate freeride binding for stability and support at speed, especially when riding bigger terrain. The lightweight injected straps stretch over the boot when tightened, evenly distributing the tension, making them extremely comfortable. Whether, you're doing speed laps at your local hill or riding big mountains, the Peak+ is designed to give you the most performance of any binding in the line.

# MAGNUM

Ultimate in Adjustability  
and Customization

The Magnum is a dream for riders who really like to dial in their set-up and customize the fit. The extruded aluminum heel-cup can be slid in-and-out and provides unparalleled strength and rigidity, while the injected ankle and toe straps provide featherweight performance and stretch over the rider's boot to evenly distribute pressure. It's everything that you could want in a binding and that's why it's the number one choice of the FIX team.

# YALE

## Bombproof Freestyle Workhorse

The Yale is an aluminum heel-cup binding that has memory gel ankle straps and lightweight injected toe straps for superior boot hold. The Yale was created because our team riders were asking for a softer more park-specific version of the Magnum binding and this new version is even more refined for better fit and function. Adjustable in almost every way, the Yale is a highly customizable binding for riders that really like to dial in their boot fit, while providing a strong and rigid frame that will provide support in the toughest conditions.

MENS FREESTYLE/PARK

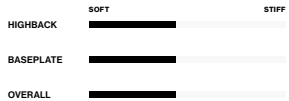

# NATION

Dominates In The Terrain Park

A park-specific binding that's softer, lighter and more forgiving than the Truce binding. It features lightweight and pressure-point free injected straps for superior boot hold and flex as well as 3 degree canted footbeds for better hip alignment. Think of it as a suped-up version of the Truce with all the same tool free adjustments, cast aluminum buckles and EVA padding, but with a softer flex for better slow speed maneuverability in the park.

UNISEX FREESTYLE

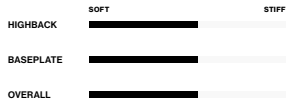

# TRUCE

Super Responsive  
All Mountain Freestyle

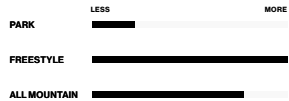

Lightweight all-mountain binding for intermediate to advanced riders. Durability at this price point is unmatched on the market. A medium flex binding that is stiff enough for the most advanced level rider, while having a price tag that is affordable enough for even the most budget conscious snowboarder. The nylon frame flexes with your board, making it a forgiving and fun yet solid and reliable binding.

WOMENS FREESTYLE/PARK

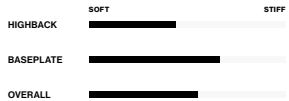

# OPUS

The Ultimate In Versatility And Performance

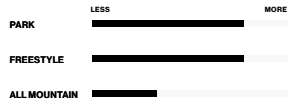

The women's flagship binding, the Opus is an aluminum heelcup binding that has strength and rigidity in the heel, but is soft and forgiving everywhere else to make this binding flex for lighter riders. It adjusts in every way possible so that the rider can fine tune the fit for their boots and the lightweight injected straps evenly distribute pressure to eliminate pressure points. It's a top-of-the-line performance binding that our top Pros ride because it's responsive, light and super comfortable (not to mention bomb-proof).

# JANUARY

A Wolf In Sheep's Clothing

We took the best selling women's binding in the Fix line, simplified the function, improved the flex and gave it a modern aesthetic to match the minimalist design that goes into the materials and quality of the binding. We've slightly softened up the highback and made the binding even lighter overall, making this the best value women's binding on the market today. Memory gel straps, highback rotation, cast aluminum buckles, first shot pure nylon with no filler material.. The January is a premium binding at an affordable price.

THE MOST DEPENDABLE

# Industry-Leading 100% Lifetime Warranty.

Fix is the only brand that offers a lifetime warranty on both buckles and base trays. No matter what happens, we've got your back.

Since we control our own production facility, we were able to start from square one when it came time for the design and function of our bindings. We started with the most critical component: the spring. Combining the best materials with 25 years of binding engineering experience results in buckles that can endure up to 28,000 clicks. This is roughly triple the life of competitor's buckles. We back up our claims with an unprecedented and industry-first lifetime warranty on our buckle assemblies. Fix bindings are 100% regrind free which means we don't put any old filler material in our bindings. All FIX products are first shot pure nylon, making them extremely strong and durable.

## COMMITTED TO THE PLANET

# Protect the earth & winters we all love.

We're proud to say that we're committed to keeping our manufacturing process paint-free. Healthier for our employees and for our planet.

Let's be honest, making any product from plastic/nylon is detrimental to the environment; bindings are no exception. But we can make better choices so that the impact is minimized, and create a superior binding in the process. Our binding box is made from waste from our manufacturing process. This excess plastic (called regrind) is typically chewed up and injected back into bindings, which can make them full of air bubbles (like Swiss Cheese). Creating a reusable transportation box for our bindings is not only an environmentally friendly solution but also great for the durability of our bindings. Our bindings also contain no single use plastics and come in a reusable and fashionable cloth bag.

PAINT FREE  
NYLON**PAINT FREE NYLON**

Fix doesn't paint the major components of its bindings for several reasons. The first reason is that nylon gets stronger with age; it absorbs the moisture from the environment so painting a binding would seal in that nylon and prevent the aging process. The second reason is durability. No scratches, no chipping. The final reason is paints and lacquers are toxic and we believe that brands must do better to help the environment even if it means that it costs more to do so from a production standpoint.

The Channel  
COMPATIBLE**THE CHANNEL COMPATIBLE**

All Fix bindings are compatible with The Channel mounting system and comes with the correct mounting hardware.

4X4 DISC

**4x4 DISC**

All Fix bindings are a 4x4 hole pattern compatible and come with DethGrip™ Hardware for both 4x4 as well as The Channel. Our regrind hardware card uses waste from our production process and doubles as a wax scraper so you can use it for years to come.

DETHGRIP  
HARDWARE**DETHGRIP HARDWARE**

Let's face it, having to tighten your screw all the time is a hassle. That's why Fix uses a special type of mounting hardware called DethGrip™ to ensure that you're not looking for a screwdriver every time you go riding.

**LIGHTWEIGHT**

Nylon injection, extruded aluminum heel-cups, cast aluminum buckles and injected straps all lead to one of the lightest bindings on the market today.

Industry Leading  
Lifetime Warranty**LIFETIME WARRANTY**

Fix buckles are tested up to 28,000 clicks, which is over triple the strength of the competition; that is why Fix is able to offer an industry first lifetime warranty on both the buckles and base trays. They're that good. Our cast aluminum buckles are housed in the buckle assembly and are attached with custom designed German steel springs, for superior strength and function.

NO REGRIND

**NO REGRIND**

No filler material = stronger bindings and less breakage. We prove that we don't use regrind in any of our bindings by producing a storage box that the bindings come in.

HIGHBACK  
ROTATION**HIGHBACK ROTATION**

Rotate your highbacks for optimal lateral movement with our simple to adjust system. Lining up your highbacks to the heel edge of your board allows your legs a free range of motion

STITCHED  
STRAPS**STITCHED STRAPS**

Our memory gel straps are sewn by the best sewing facility in the world and is the only component that we do not produce in our own facility so that quality is not compromised. They're so comfortable, they're like couches for your feet.

INJECTED  
STRAPS**INJECTED STRAPS**

If lightweight performance is what you're after then the Fix injected straps are what you need. They stretch as you tighten them which evenly distributes the pressure eliminating pressure points.
