FW25/26 BINDINGS

**“A consortium of engineers, designers and life long snowboarders  
who are dedicated to bringing to life the world’s best binding.”**

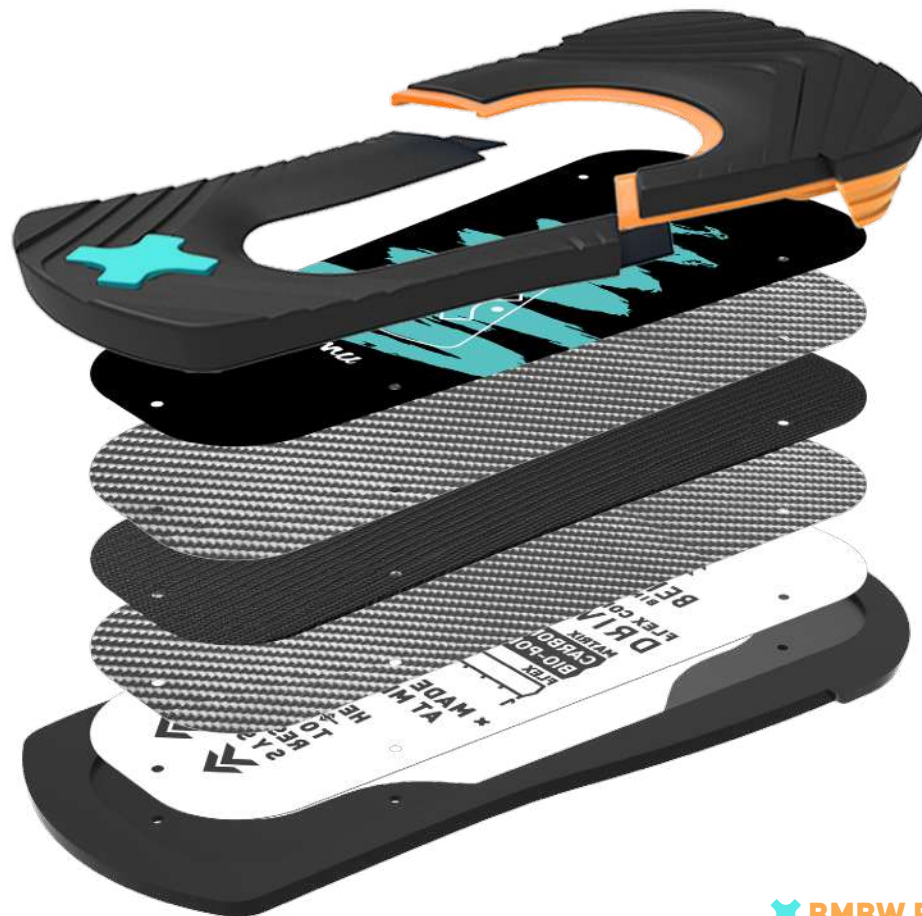

# FLEX CONTROL DRIVE PLATES

Fiberglass panels in the footbed create specific flex patterns similar to your snowboard for personalized binding response. The dynamic energy of the advanced composites gives you a flex control advantage like no other binding can.

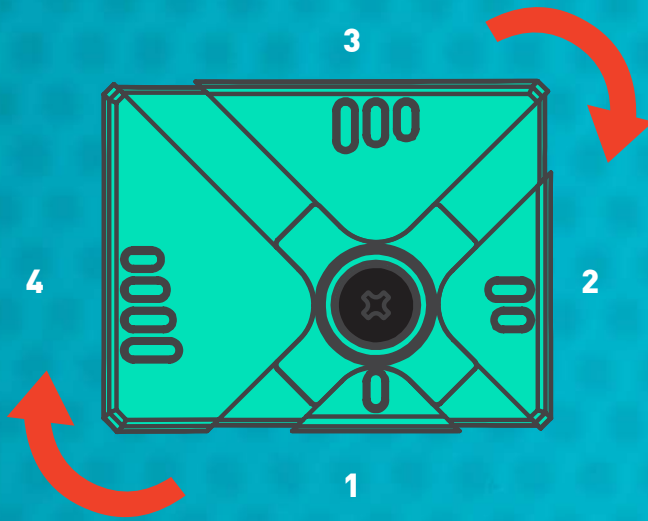

# **BMBW** REVOLUTIONARY CUBE

The BMBW Revolutionary Cube is the worlds fastest tool free forward lean adjuster. Simply spin cube for the desired forward lean angle. It's fool proof. Easily adjust and experiment while on the hill. Urethane skateboard wheel construction absorbs shock and vibration. Visual indicators let you know angle selected.

- FASTEST AND EASIEST FORWARD LEAN ADJUSTER EVER
- DUAL DUROMETER URETHANE DAMPENING
- ALL MODELS

# BMBW DUAL BAND ANKLE STRAPS

Our unique **Dual Band** ankle strap design uses a firm central “Power Band” to transmit rider input to the board, while a larger and softer “Flex Band” enables the boot to articulate for a larger range of expression and increased comfort. The overlapping materials create transition zones and fuse to form a uniquely tuned response and comfort level not achieved in a single material strap.

- Two bands with different Flex and Power properties fuse for maximum comfort and tuned response

- Individually shaped Power Bands tune response to excel during different riding conditions and styles

**AUTOMATIC / UNIVERSAL / DUAL-ENTRY**

**Just push your foot in through the back and step down on the heel pedal to flip up the highback. That's it – you're ready to shred. A simple release lever makes exiting just as rapid. Supermatic® feels just like a classic two-strap binding to ride, and you can even operate the ratchets normally if the conditions demand it. Steep slope? Deep pow? No problem.**

## **AUTOMATIC**

With Supermatic®, you can start riding right off the chairlift. No more fiddling with buckles – just drop your boot in and go.

## **UNIVERSAL**

Supermatic® works with any boot from any brand – so you don't need to compromise on fit or buy a whole new boot/binding setup.

### **HEEL ROLLER**

Ensures your boot easily slides in and out catch free with no friction.

### **SLIP PLATE**

The Slip Plate creates a smooth surface for your boot to slide across during entry and exit. Extra large UHMW panel sheds snow.

### **RELEASE LEVER**

Simply Press and hold Release Lever to lift boot up and out to exit binding.

### **LSR 2.0 BUCKLE**

Second Generation Slap Ratchet automatically locks the buckle in place in both directions as soon as you stop ratcheting. No need to manually lock. Instantly dial in your preferred strap tension (for use with speed entry) or make quick adjustments on the fly.

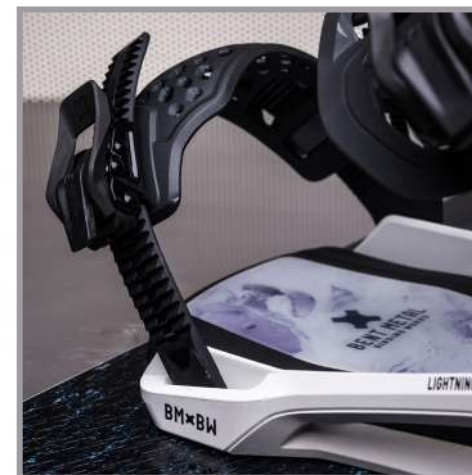

## STRAP & DISK TECHNOLOGY

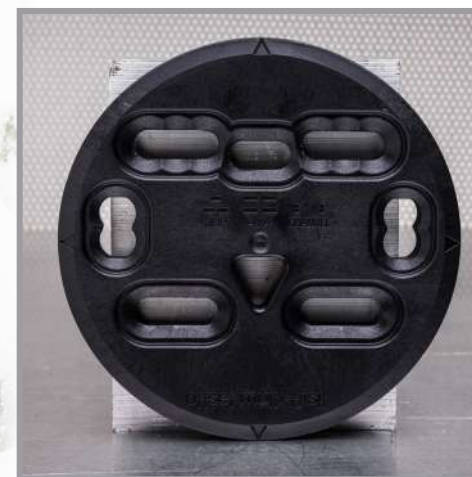

### DUAL BAND AUTO ANKLE STRAP

Two bands with different Flex and Power properties fuse for maximum comfort and response.

### FLIP FIT TOE STRAP

Toe strap can be flipped to customize fit on your boots. Leave in stock position for most boots or flip long side down for boots that are in the largest edge of fit range.

### OFF-SET MULTI-DISK

The Offset Multi-Disk can be mounted on 4x4, 4x2, and the M6 Channel – without the need for an accessory channel-disk. The hole patterns are offset from the center for more toe-heel or stance-width adjustability.

- 4x4, 4x2, M6 Channel Compatible
