THE FUTURE OF BACKCOUNTRY SNOWBOARDING

SPARK FUSION

black
BC 572401-1000/9110

It's time to reimagine what's possible with the Spark Fusion. The Spark Fusion features a significantly smaller footprint and a design optimized for skinning, hiking, and riding. To ensure it can withstand the harshest conditions, it features our proven Rock Guard that provides protection from rocks and ice. The Spark Fusion is equipped with a snow shield that protects the lower part of the boot from snow, ice, and moisture to keep your feet dry. The boot's Backcountry liner provides a truly custom fit and sports a flexible toe box that offers a precise yet forgiving feel. For even greater comfort and control, the Spark Fusion uses our L3 lacing system with speed lacing to cradle the foot and calf, and it features the BOA® Fit System to lock down the ankle and heel. Thanks to this zonal fit, you can lock your ankle and forefoot in place while allowing your leg to move within the boot when ascending. For unrivaled traction, the Spark Fusion also boasts a Vibram Eastridge sole. The boot's plastic backwelt features a grooved heel for accommodating semi-automatic crampons. The future of backcountry snowboarding is about to begin with the Spark Fusion.

EARN YOUR TURNS

X-PLORER

gravity green

CTF 572506-1000/4215 S4 572505-1000/4215

The best turns are the ones you earn. And when it's time to break trail, the X-plorer gives you exceptional support for both the way up and the ride down. Combining the best of both worlds, its traditional laces offer a classic ride and clean appearance while the boot's BOA® Fit System allows you to quickly and effortlessly attain a precise fit in the heel and ankle area. And for superior traction on cold and icy surfaces, the boot sports a Vibram Eastridge sole. Aiming to minimize the boot's environmental impact, its shell is made with Rise by Bloom – a bio-based foam derived from algae harvested from compromised ecosystems. This approach leverages algae's ability to sequester carbon while helping clean water and restore aquatic habitats. This approach leverages algae's ability to sequester carbon while helping clean water and restore aquatic habitats. Whether venturing to new peaks or just your backyard, stake your claim with the X-plorer.

THE FREERIDE BOOT WITH A FREESTYLE MINDSET

DEEMON PRO

mercury grey

CTF 572511-1000/4216 S3 572510-1000/4216

Through the years, the Deemon has emerged as DEELUXE's all terrain flagship boot. With the perfect blend of comfort and response, it's at home in any terrain. We've further upgraded this iconic boot, tailored to the free rider with a free-style mind. The pro version of the Deemon comes with a detachable Power Strap and features our tried and tested Quantum sole. This sole provides an especially direct and responsive ride while also offering strategic cushioning to dampen vibrations and absorb impact energy. And when it's time to hike, the sole provides impressive traction. A sophisticated flex window provides a smooth and consistent riding experience while a rubber print throughout the ankle zone makes the boot even more durable. The Double Back offers additional protection from binding abrasions and enhances control and precision. The boot also sports a fully customizable BOA® Fit System that uses a proprietary configuration found exclusively on select DEELUXE models. Aiming to minimize the boot's environmental impact, its shell is made with Rise by Bloom. The Deemon Pro handles any terrain with style and confidence.

mars trek

CTF 572516-1000/4218 S3 572515-1000/4218
WMN 572516-2000/4218

Introducing the Nomad – the snowboard boot for riders who are always searching for the perfect turn. Made from high-quality materials to withstand ever-changing conditions, this boot excels no matter where the terrain leads. Designed by women, the Nomad impresses with its attention to detail and thoughtfully considered features, reminiscent of DEELUXE's women-specific boots. However, the Nomad is crafted as a truly unisex boot, offering the perfect fit and performance for all riders. A specially designed overlap construction on the arch ensures a snug fit, delivering optimal comfort and performance, regardless of foot width. The Nomad features a fully customizable BOA® Fit System with a proprietary configuration found exclusively on selected DEELUXE models. Aiming to minimize the boot's environmental impact, its shell is made with Rise by Bloom – a bio-based foam derived from algae harvested from compromised ecosystems. Whether carving down the slopes or hiking through deep powder, this boot provides the performance you need. Crafted with precision, built for the bold, and ready to take on any challenge.

EDGE PRO

red shift

CTF 572526-1000/4220 S4 572525-1000/4220

When it's time to go full throttle, the Edge Pro holds nothing back. Armed with a thirst for speed and a penchant for precision, this all terrain free-style boot caters to riders who love to carve—and seek out side hits. The boot's collar enhances support and its Sidekick Pro technology uses a high-frequency welding process to fuse lateral and medial reinforcing elements to the boot's shell. This provides faster edge-to-edge transitions and better pop when ollieing. And thanks to our Battle sole, the boot maximizes boardfeel while providing advanced cushioning for protection from impacts. Aiming to minimize the boot's environmental impact, its shell is made with Rise by Bloom – a bio-based foam derived from algae harvested from compromised ecosystems. This approach leverages algae's ability to sequester carbon while helping clean water and restore aquatic habitats. THE FUTURE OF SNOWBOARD BOOT DESIGN

ID Y-20

volcanic lightning
S5 572530-1000/4222

The ID Y-20 is more than a boot – it's a game-changer. Setting a new standard in snowboard boots, the ID Y-20 combines ultimate performance and comfort with cutting-edge innovation. Crafted with lightweight materials and featuring Rapid React modular technology, this boot delivers a next-level riding experience across any terrain. With the all-new Future Flex construction, this boot ensures the perfect flex from day one throughout its entire lifespan. An injected Booster tongue perfectly wraps around the shin for a next-level fit, creating a sleek profile. It provides maximum support while ensuring an optimal closure around the instep. The pre-shaped, injected TPU Flex Guard stabilizes the heel area, delivering an excellent fit and secure hold in the binding. Additionally, the specially developed Power Link connects the Flex Guard with the sole to ensure efficient power transmission from the heel to the toe edge. This delivers an unprecedented level of responsiveness for an exceptional riding experience. The newly developed Spectra sole features a hollowed section in the heel area that absorbs impact energy and provides a perfectly smooth landing. Step into the future of snowboarding with the ID Y-20.

ID Y-20

the future of snowboard boot design

Rapid React Modular Technology gives you a glimpse of the future and opens a new aera of how a snowboard boot should perform and respond. It combines different features of a boot that are perfectly adjusted to bring your performance to a new level. For the ID Y-20 we've combined an injected Booster tongue and the pre-shaped, injected TPU Flex Guard. The specially developed Power Link connects the Flex Guard with the sole to ensure efficient power transmission from the heel to the toe edge. This makes the boot extremely reactive, gives you unprecedented board control and let's you transition lighting fast from edge to edge.

Comfort-Core

Strategically placed Comfort Core cushions provide an incredibly plush ride.

Future Flex

The future is here: This all new Flex construction ensures a boot maintains its perfect flex from day one throughout its entire lifespan, while providing unparalleled out-of-the-box comfort.

Extra Flexibility And Feel

Booster-Tongue

As the latest evolution of the proven Flex Booster, we proudly introduce the Booster Tongue. The injected Booster tongue perfectly wraps around the shin for a next-level fit, creating a sleek profile. It provides maximum support while ensuring an optimal closure around the instep.

Flex Guard

The pre-shaped, injected TPU Flex Guard stabilizes the heel area, delivering an excellent fit and secure hold in the binding. It also enhances durability by offering protection from binding abrasions, while strategically placed stringers help you get in and out of speed entry bindings with extra smoothness.

Grippy Rubber Compound

Hollowed Section

Power Link

The specially developed Power Link connects the Flex Guard with the sole to ensure efficient power transmission from the heel to the toe edge. This delivers an unprecedented level of responsiveness for an exceptional riding experience.

AREth RIN

brown

S3 572540-1000/9220

ABOUT AREth

Since 2001, AREth has quietly forged its own path in Japan—and beyond. Guided by a deep commitment to clean design, the brand has earned a reputation for crafting footwear that's as authentic as it is original. And with a down-to-earth approach, AREth inspires others to live bravely and creatively.

Whether it's a crisp method, a fresh pow slash, or a creative line through the trees, the best riding comes from the soul. United by this belief, DEELUXE and AREth have teamed up to create the AREth Rin. Armed with a classic appearance, it pairs clean design with rich materials and sophisticated technology. And thanks to its ability to ride any terrain, it's Kazu Kokubo's boot of choice. Combining the best of both worlds, its traditional laces offer a timeless look and familiar feel while the boot's BOA® Fit System allows you to quickly and effortlessly secure your ankle and heel. A rugged leather patch in the ankle zone enhances comfort and durability while further securing your foot. The boot's Stage 3 liner provides a truly custom fit while its Skate Flex sole offers unsurpassed boardfeel. Inspired by the boot's refined design and impressive performance, Japan's Freerun magazine recently honored the AREth Rin as one of the top picks in the freeride category of its Best Gear Awards. If your riding comes from within, consider the AREth Rin your soulmate.

DNA

mars trek

S2 572575-1000/4218

With a look and feel inspired by a trusted pair of sneakers, the DNA has quickly emerged as a favorite among riders who spend their days jibbing and lapping the park. With a slightly softer flex, the DNA pairs out-of-the-box comfort with all of the features you need to have a great day slaying the slopes or seeking out kickers and rails. Combining the best of both worlds, its traditional laces offer a classic ride and clean appearance while the boot's BOA® Fit System allows you to quickly and effortlessly attain a precise fit in the heel and ankle area. The Power Strap delivers additional support at the shin to further enhance response. Especially thin, the boot's deconstructed-style Jib Tongue is paired with a grippy Skate Flex sole to directly transfer power and maximize boardfeel. And thanks to its Stage 2 liner, the boot provides an impressive ride from day one. The only downside? The DNA is so comfortable you might forget you're wearing it long after you step off the snow.

THE PERFECT BOOT, NO MATTER WHERE THE TERRAIN TAKES YOU

NOMAD

mars trek
WMN 572516-2000/4218

Introducing the Nomad – the snowboard boot for riders who are always searching for the perfect turn. Made from high-quality materials to withstand ever-changing conditions, this boot excels no matter where the terrain leads. Designed by women, the Nomad impresses with its attention to detail and thoughtfully considered features, reminiscent of DEELUXE's women-specific boots. However, the Nomad is crafted as a truly unisex boot, offering the perfect fit and performance for all riders. A specially designed overlap construction on the arch ensures a snug fit, delivering optimal comfort and performance, regardless of foot width. The Nomad features a fully customizable BOA® Fit System with a proprietary configuration found exclusively on selected DEELUXE models. Aiming to minimize the boot's environmental impact, its shell is made with Rise by Bloom – a bio-based foam derived from algae harvested from compromised ecosystems. Whether carving down the slopes or hiking through deep powder, this boot provides the performance you need. Crafted with precision, built for the bold, and ready to take on any challenge.

WMN 572545-2000/4224

Introducing the ID, a snowboard boot that needs no introduction. The boot that's more than just footwear—it's a legend. Celebrating 20 years of innovation and excellence. Pretty much every rider knows its name, and there's a good chance you've tried a pair yourself. This anniversary edition stays true to its roots, embodying the classic elements that made it a favorite, while embracing modern enhancements that elevate its performance. The ID features our tried and tested Quantum sole. This sole provides an especially direct and responsive ride while also offering strategic cushioning to dampen vibrations and absorb impact energy. The Double Back offers additional protection from binding abrasions and boosts control and precision. Aiming to minimize the boot's environmental impact, its shell is made with Rise by Bloom – a bio-based foam derived from algae harvested from compromised ecosystems. Whether you're reliving the glory days or experiencing it for the first time, the ID is the ultimate evolution of a true classic, now better than ever.

KIDS

NEXT GENERATION

ROUGH DIAMOND

black

ST1 572029-3005/9110

Just because groms have small feet doesn't mean they can't go big. The Rough Diamond channels DEELUXE's legendary quality and technology into a kid-specific design and construction. With an emphasis on comfort and performance, this boot accelerates progression. It also delivers no short-age of style thanks to the legendary artwork of former DEELUXE pro TJ Schneider. Especially easy to get in and out of, the boot features a refined Power Strap and the BOA® Fit System for a fast, effortless, precision fit. Its tried and tested Stage 1 liner offers plenty of comfort and warmth so kids can enjoy the slopes even longer. The Rough Diamond is also designed to accommodate a grom's rapid growth. Because the BOA® Fit System and Stage 1 liner cradle the contours of the foot especially well and provide exceptional heelhold, we recommend purchasing the Rough Diamond one size larger than a child's current boot size. This affords room to grow without compromising the boot's fit or performance. After all, the next generation of shredders deserves the best.

FOOT-LOOSE 2

black

SL 562100-1000/9110

At DEELUXE, we're guided by a commitment to continual refinement. And this is especially evident in the Footloose 2. After debuting the world's first boot dedicated to powsurfing and noboarding—the Footloose—to rave reviews, we immediately began soliciting feedback from the powsurf community on how we can evolve the boot and further support those who love to ride without bindings. This led to the creation of the Footloose 2, a boot born from a desire to bring a completely new look and feel to powsurfing. It sports a proven powsurf-specific liner that enhances both foothold and mobility, affording better board control and making it especially easy to initiate smooth turns. We've also repositioned the lacing for even greater heelhold. And a double-lasted toe cap boosts durability while offering additional grip for those looking to ollie and infuse their riding with skate-inspired tricks. Welcome to a completely new powsurfing experience.

CUSTOM THERMO LINER (CTF)

To lead, one must innovate—and DEELUXE's Custom Thermo Fit liner charges into the future. With fresh technology and a sophisticated design, it makes its debut as the best custom fit liner in the game. With a precisely tailored anatomical design and an advanced perforated foam, it cradles the contours of your foot while maximizing performance. For the perfect blend of warmth and breathability, the perforated foam also aids in regulating temperature. The Heel Harness Pro and its exoskeleton deliver an unrivaled fit at the ankle and exceptional support. And thanks to a deep heel pocket and an ankle zone with mesh that's especially grippy, the Custom Thermo Fit liner provides unsurpassed heelhold. To customize the liner's fit even further, it can be thermomolded with DEELUXE's Liner Precision Fit Pads. No wonder the Custom Thermo Fit Liner stands to be a favorite among riders and bootfitters alike. Reimagine what's possible with DEELUXE's Custom Thermo Fit liner.

FLEX BOOSTER

Available as an accessory, the Flex Booster strengthens a boot's tongue, creating a stiffer flex while offering additional support. It can also prolong the life of a boot by restoring or enhancing its flex. Thanks to a progressive design, it provides greater resistance as it bends, optimizing support and protection – especially from harsh landings. As icing on the cake, the Flex Booster enables you to modify a boot's flex for specific adventures – be that reinforcing the flex of a jib boot to slay kickers or transforming a freestyle boot into a banked slalom hero. You don't need gym shorts to appreciate this flex.

LINER THE DEELUXE LINER CONCEPT

Whether you're sessioning the streets, lapping the bunny hill, or dropping first descents, your boots play an essential role in shaping your time on the snow—and your liners serve as the foundation of it all. Guided by this belief, we've leveraged our experience pioneering and continually refining thermo custom fitting to completely reimagine the philosophy, design, and construction of our liners. Combining the best of both worlds, all of DEELUXE's adult liners are thermomoldable while also offering our legendary out-of-the-box comfort. And each liner is purpose-driven and tailored to a distinct riding style, perfectly complementing the diverse boots in our collection. It's time to demand more—elevate your game and your expectations with DEELUXE's innovative liners.

STAGE 1

The next generation of riders deserve the best—and DEELUXE is here to help. Designed specifically for children's feet, our Stage 1 liner offers exceptional comfort and performance straight out of the box. It also keeps feet incredibly warm. And with a design that's as simple as it is elegant, this liner makes it especially easy for kids to put on and take off their boots. Thanks to DEELUXE's Stage 1 liner, groms can keep smiling and progressing from first chair to last.

STAGE 2

Consider it love at first sight—or first fit. With an emphasis on comfort, DEELUXE's Stage 2 liner offers an unsurpassed out-of-the-box fit. Inspired by DEELUXE's iconic Comfort Flex liner, it sports a fresh highback shape to enhance heelhold and performance. And for a custom fit, the liner can also be thermomolded. Whether it's your first day of the season or your hundredth, the Stage 2 liner shares your passion and fuels your progression.

STAGE 3

When it's time to elevate your game, lace up with DEELUXE's Stage 3 liner. To maximize comfort and performance, it sports a design inspired by DEELUXE's legendary Thermo Flex liner, which previously served as the gold standard in snowboarding for thermomoldable boots. Raising the bar even higher, the Stage 3 liner offers an excellent fit straight out of the box and can easily be thermomolded at your local DEELUXE dealer for a truly custom fit. For enhanced comfort, the liner also features a roomier toe box with a four-way stretch material that can be thermomolded with or without toe caps. And to further boost performance, the liner's external heel harness cradles your foot to provide exceptional heelhold and quick and secure lacing. Drop in and never look back with DEELUXE's Stage 3 liner.

STAGE 4

Hold nothing back with DEELUXE's Stage 4 liner. Featured in some of the finest boots in our collection, this premium liner delivers an unprecedented out-of-the-box fit. With a precisely tailored anatomical design and a refined heel pocket, the liner hugs the contours of your foot while maximizing performance. An external heel harness further cradles your foot while providing exceptional heelhold, as well as quick and secure lacing. For additional comfort, the Stage 4 liner sports a roomier toe box with a four-way stretch material. The freshly-designed back panel further enhances the liner's fit while optimizing support. And for an unsurpassed custom fit, the liner can be thermofitted—with or without toe caps. Unleash your potential with DEELUXE's Stage 4 liner.

STAGE 5

Introducing the Stage 5 Snowboard Boot Liner: designed for comfort and performance. It offers a custom fit with 100% thermomoldable materials. Features include Gold Tread Technology for warmth, Comfort Core Padding for all-day cushioning, and advanced Heel Harness Pro for a secure fit. The cat-tongue mesh lining ensures great heel hold, while the breathable foam insole provides excellent arch support. An anti-slip base ensures stability and control on every ride.

CUSTOM THERMO FIT LINER

To lead, one must innovate—and DEELUXE's Custom Thermo Fit liner charges into the future. Armed with fresh technology and a sophisticated design, it's the best custom fit liner in the game. With a precisely tailored anatomical design and an advanced perforated foam, it cradles the contours of your foot while maximizing performance. For the perfect blend of warmth and breathability, the perforated foam also aids in regulating temperature. The Heel Harness Pro and its exoskeleton deliver an unrivaled fit at the ankle and exceptional support. And thanks to a deep heel pocket and an ankle zone with mesh that's especially grippy, the Custom Thermo Fit liner provides unsurpassed heelhold. To customize the liner's fit even further, it can be thermomolded with DEELUXE's Liner Precision Fit Pads. No wonder the Custom Thermo Fit Liner stands to be a favorite among riders and bootfitters alike. Reimagine what's possible with DEELUXE's Custom Thermo Fit liner.

HEEL HARNESS PRO

DEELUXE's Heel Harness Pro enables your heel and ankle to transmit maximum power and efficiently initiate turns. Available as an accessory, this super-charged Heel Harness and its exoskeleton deliver an unrivaled fit at the ankle area, exceptional support, and unsurpassed heelhold.

L1

The L1 lacing system provides a quick and easy way to close and adjust your boots. One handle, one clasp, and one pull is all it takes.

L2

The L2 lacing system not only provides a quick and easy way to secure your boots, it also helps you precisely adjust two separate lacing zones—the foot and the calf. One handle and clasp close the upper part of the boot while another handle and clasp close the lower part. A pull on each handle secures your foot, allowing you to powerfully and precisely transfer energy to your board.

L3

Our most advanced and versatile speed lacing system provides three different lacing zones using two clasps and two handles. One handle allows the boot to cradle your foot and calf while the other handle secures the ankle and heel. Thanks to these separate zones, the boot anchors your heel for a refined fit that enhances energy transmission.

TRADITIONAL LACING

Traditional lacing provides a classic look and feel.

BOA® FIT SYSTEM

The Dial in to micro-adjustable precision fit with the BOA® Fit System, which delivers more explosive action and unparalleled accuracy. Boots with a dual zone BOA® configuration provide zonal adjustability so you can create a truly customized fit, for even longer days on the hill. BOA® Fit System is engineered to perform in the toughest conditions.

L3 BOA®

Consider it a match made in heaven—or at least on the snow. To create a next-level fit that's especially precise, we've teamed up with BOA® to develop our new L3 BOA®. This fresh design combines the advantages of our proven L3 lacing system with the signature performance of the BOA® Fit System. Thanks to this revolutionary pairing of L3 and BOA®, you can separately and precisely adjust the foot and calf area of your boot with one dial and secure the ankle and heel area with a second dial lightning fast. Powerful and precise, the L3 BOA® delivers exceptional performance without compromising comfort. Throw down in confidence with the L3 BOA®.

GIRL POWER HANDLES

Especially convenient and easy to operate, DEELUXE's Girl Power handles are the perfect complement to the lacing systems on our women's boots. These reinforced handles allow you to adjust a boot's fit and performance with minimal effort.

POWER STRAP

This strap provides extra support for your shin to enhance your boot's response.

FLEX CONSTRUCTION

Your boots should complement your riding. Guided by this belief, we created our Flex Construction. Each boot we make features a design and flex that is carefully tailored to a specific riding style. This ensures that no matter how you approach the mountain, your heels stay snugly in place and your boots effectively transfer power.

CUSTOM FLEX

Thanks to two separate flex zones at the ankle, this design provides complete control of the boot's flex and ensures your heel stays locked in place.

ASYM FLEX

This design pairs a stiffer flex on the outside of the boot with a softer flex on its inside for the perfect blend of power and comfort. It also improves edge-to-edge transitions and control while reducing strain on the knees. The Asym Flex provides a truly unique riding experience.

CARVE FLEX

Additional reinforcements in the ankle area stiffen the boot's flex, making it ideal for progressive freestyle and powerful carving.

PRO FLEX

Designed for freestylers who demand premium performance, this construction creates a defined flex zone in the boot's joint area. This eliminates bulging and maximizes support, creating the perfect blend of flex and stability.

FREE FLEX

Thanks to forefoot and shaft panels that overlap near the heel of the shell, this construction creates a supportive, surf-like flex.

COSMIC FLEX

Designed for bindingless riding, this flex offers an unrivaled range of motion. Free your feet and surf the snow.

SIDEKICK

You don't need to fight crime to appreciate DEELUXE's Sidekick. The Sidekick uses two reinforcing elements—one lateral and one medial—to maximize the transmission of power. This allows you to transition from edge to edge faster and provides a snappier ride, giving you better pop when ollieing. And by offering additional security, it reduces the likelihood of rolling your ankle.

BACKBONE

This reinforced panel cradles the back of the boot to maximize durability and enhance response.

SIDEKICK PRO

It's time to meet your new partner in progression—DEELUXE's Sidekick Pro. Building on the success of the Sidekick, this supercharged version uses a high-frequency welding process to fuse lateral and medial reinforcing elements to the boot's shell. This creates an especially snappy ride that provides lightning-fast transitions from edge to edge and exceptional pop when ollieing. And by offering additional security, it reduces the likelihood of rolling your ankle. When it's time to charge hard, the Sidekick Pro loves to throw down.

DOUBLE BACK

Good things are worth doubling down on—for proof, look no further than DEELUXE's Double Back. This reinforced rubber highback at the boot's heel zone enhances durability by offering protection from binding abrasions. It also stiffens the boot to boost response and adheres better to a binding's high-back. By improving the interface between the boot and binding, the Double Back reduces movement between them, offering greater control and precision. Don't look back—just charge forward with DEELUXE's Double Back.

TONGUES

A boot's tongue plays a crucial role in shaping its flex—yet it's often overlooked. To maximize performance and comfort, we've completely redesigned the tongues of our boots, tailoring them to the terrain and riding style for which each model is designed. With a nod to skate shoes—which offer a slew of tongue and padding options to meet one's personal preferences—we've carefully developed each tongue around the unique demands of our boots and the riders who rock them.

JIB TONGUE

Lean and mean, DEELUXE's Jib Tongue is at home in the park and the streets, yet it's also perfect for anyone seeking an incredibly precise and responsive ride. Especially thin, this deconstructed-style tongue offers maximum power transfer and a direct boot-to-binding connection. Its clean appearance is perfectly paired with traditional laces, yet the tongue excels with any lacing system. And to enable you to further customize your boot's flex, the Jib Tongue has a single-position pocket that can accommodate an optional Flex Booster. Whether locking in your boardslides or boosting your ollies, the Jib Tongue delivers the power and precision you need to take your riding to the next level.

FREESTYLE TONGUE

As versatile as it is dependable, DEELUXE's Freestyle Tongue is the perfect choice for riders who view the entire mountain as their playground. Armed with a classic appearance and medium padding, it offers a precise boot-to-binding interface and effectively transmits power while also enhancing dampening. And to enable you to further tailor your boot's flex to your riding style, it sports a single-position pocket for an optional Flex Booster. Kickers, side hits, and rails—the Freestyle Tongue can handle it all.

FREERIDE TONGUE

DEELUXE's Freeride Tongue is a smooth operator. Especially plush, it maximizes comfort and cushioning while also enhancing durability. At home exploring the entire mountain, it loves to lay down turns that are especially smooth. And for a truly custom ride, the Freeride Tongue sports a three-position pocket that can accommodate an optional Flex Booster. This enables you to personalize the flex of your boot and tailor it to be either symmetrical or asymmetrical. Make your mark all over the mountain with DEELUXE's Freeride Tongue.

FLEX BOOSTER

Available as an accessory, the Flex Booster strengthens a boot's tongue, creating a stiffer flex while offering additional support. It can also prolong the life of a boot by restoring or enhancing its flex. Thanks to a progressive design, it provides greater resistance as it bends, optimizing support and protection—especially from harsh landings. As icing on the cake, the Flex Booster enables you to modify a boot's flex for specific adventures—be that reinforcing the flex of a jib boot to slay kickers or transforming a freestyle boot into a banked slalom hero. You don't need gym shorts to appreciate this flex.

FLEX BOOSTER 1K

FLEX RATE +1
Firm yet somewhat forgiving, the Flex Booster 1K enables you to customize a boot's flex and support. It makes a boot slightly stiffer and more responsive by increasing its flex rating by one point. Forget the gym—get the results you need with the Flex Booster 1K.

FLEX BOOSTER 2K

FLEX RATE +2
Thanks to its stiffer flex, the Flex Booster 2K enhances a boot's support and response significantly by increasing its flex rating by two points. With the Flex Booster 2K, you can enhance your performance—without breaking the law.

FLEX BOOSTER 3K

FLEX RATE +3
Especially stiff, the Flex Booster 3K makes a boot incredibly supportive and exceptionally responsive by increasing its flex rating by three points. Skip the gym and ditch the weights—the Flex Booster 3K is all you need to max out your ride.

SHELL CONSTRUCTION

XLS PRO

Make no compromises—that's the motto of DEELUXE's XLS Pro system. Designed to excel at hiking, skinning, and riding, it features two BOA® dials that allow you to independently adjust the upper and lower zones of the boot. This zonal fit creates both a hike and a ride mode—and ensures you can readily transition between them. When ascending, unlock the upper BOA® dial to allow your leg to move within the boot. This, combined with a flexible flap on the back, maximizes your range of motion and affords the comfort of a hiking boot. And when it's time to ride, lock both BOA® dials for exceptional control and response. There's no better way to get up—and get down—than DEELUXE's XLS Pro system.

XLS

For enhanced comfort and longer strides when skinning, this system extends the range of motion available at the rear of the boot. Simply put, it helps you get up the mountain faster—and with less effort.

SNOW SHIELD

The Snow Shield protects the lower part of the boot from snow, ice, and moisture to keep your feet dry.

RISE BY BLOOM

Rise is an environmentally-conscious, high-performance replacement for traditional petroleum-based EVAs. Foams utilizing Bloom's algae technology deliver striking performance values, which make them excellent replacements for conventional foams. Algae's natural thermoplastic qualities allow Rise to meet, and in some cases exceed, performance characteristics of conventional closed-cell flexible foams.

D-TEX

Waterproof and breathable, this membrane ensures feet stay warm and dry.

THERMO BLOCK

Like a space blanket for your feet, this reflective insert maximizes warmth.

BACKWELT

The plastic backwelt features a grooved heel for rocking semiautomatic crampons.

ROCKGUARD

This layer of rubber wraps around the toe box and sides of the boot, maximizing durability by providing protection from rocks and ice.

SOLES

At DEELUXE, every boot we make is tailored to a specific riding style and type of terrain. And our soles play a crucial role in shaping these purpose-driven designs. With an approach inspired by skate shoes, we've developed an arsenal of soles that cater to the unique needs of today's riders. Whether you're searching for unrivaled response when cranking out turns, bombproof durability for backcountry missions, exceptional cushioning for slaying kickers, or maximum boardfeel when sessioning the streets, DEELUXE's soles are ready to make your dreams a reality.

QUANTUM SOLE

Make the entire mountain your playground with DEELUXE's Quantum sole. Designed to truly do it all, the Quantum leverages everything we've learned from developing soles over the past few decades. Crafted from minimal materials and armed with a reduced footprint, it creates an especially direct interface with your board while also offering the best all terrain capabilities. To dampen vibrations and boost traction, lugs span the entirety of the sole, increasing in height from the toe to the heel. The low-profile lugs in the toe area maximize boardfeel while the taller lugs in the heel zone provide an especially smooth ride. These lugs also extend to the outside edge of the sole to further enhance traction when traversing and hiking. The Quantum's free-floating cushion swallows up impacts and reduces the risk of heel bruises. And thanks to its extensive arch support, the sole prevents fatigue to keep you riding from first chair to last. Unleash your creativity with DEELUXE's Quantum sole.

BATTLE SOLE

DEELUXE's Battle sole is a true warrior. This hybrid design builds on the tried-and-true technology of our Remy and Skate Flex soles to place an even greater emphasis on power and precision. By enhancing the transmission of energy, it offers more control and faster edge-to-edge transitions. It also boosts boardfeel while providing exceptional cushioning for protection from harsh impacts. And thanks to a reduced footprint, it minimizes toe and heel drag. Hold nothing back with DEELUXE's Battle sole.

VIBRAM SOLE

No matter the adventure, you can depend on the Vibram Eastridge sole. With an emphasis on traction and durability, it excels whether you're hiking, skinning, or riding. Its proven Vibram ICETREK rubber compound is specifically engineered to endure very low temperatures and provide superior grip on cold and icy surfaces. Special climbing zones in the toe and heel area offer additional traction to make ascents safer and easier. And thanks to lugs with a self-cleaning design, the sole readily sheds snow, dirt, and rocks. Get ready to explore with the Vibram Eastridge sole.

REMEDY SOLE

You don't need a prescription for DEELUXE's Remy. Especially versatile, the Remy sole provides the perfect blend of traction and cushioning. It offers exceptional grip while hiking and when it's time to send it, the sole's free-floating heel cushion ensures smooth landings. And thanks to a reduced footprint, it minimizes toe and heel drag. Give your feet the treatment they deserve with DEELUXE's Remy sole.

SKATE FLEX SOLE

Forget the griptape and trucks—DEELUXE's Skate Flex sole provides the ride you need. Inspired by skate shoes, the Skate Flex sole is super grippy and offers enhanced boardfeel. And for protection from harsh impacts and flat landings, select models feature shock absorbing foam in the heel. Whether you're lapping the park or sessioning the streets, the Skate Flex sole rides like a champ.
