Howl Supply

Winter accessories crafted by snowboarders, for snowboarders. Established in 2012 by professional snowboarders Darrell Mathes and Nima Jalali, HOWL offers pro-level quality gloves and accessories for all. Our products draw inspiration from our team of riders, merging durability and functionality with distinctive design. For a decade, HOWL has been committed to delivering products engineered to endure all conditions and environments, thoughtfully designed with trendy colors, fabrics, and materials. As a rider-owned and rider-driven brand, HOWL gives back to the winter sports community by donating gear and a portion of our sales to The Dillon Ojo Foundation. HOWL: Stronger Than The Alternatives.

About Our Outerwear

We are excited to announce our third collection of HOWL outerwear. Building on the success of our inaugural line, this collection merges appealing design with essential technical features. We are proud to present a complete range of jackets and pants, all grounded in the foundational values that have shaped our design philosophy. With a well-established catalog of popular gloves and accessories, HOWL is poised to continue creating products that not only look great but also feel exceptional. Our aim is to reimagine timeless silhouettes with modern innovations, crafting outerwear that is versatile enough for any occasion. Rigorously tested by our riders in diverse environments, this collection is just the beginning of our journey.

Enhanced Moisture Management

Featuring cutting-edge patent-pending technology, VAPOR TEK® Pro is designed to perform for the most serious athletes in the most extreme conditions. The 100% ePFT membrane is over 28% more breathable than that of its predecessor, VAPOR TEK® Pro Shell. The enhanced moisture management makes it ideal for pronounced work-rest cycles, like intense climbing pitches coupled with chilly belays. To ensure expedition-worthy durability and abrasion resistance, all garments engineered with VAPOR TEK® are required to use heavier face fabrics (40+ denier), and always feature a three-layer construction.
