# DEFEND THE CULTURE

For over 21 years, we've passionately dedicated ourselves to uplifting the culture of snowboarding. Our outerwear is designed by snowboarders, for snowboarders, embodying the spirit of our community. From the beginning, we've proudly stood by shops, sales reps, team riders, filmmakers, photographers, and we will continue to believe in and support them for years to come.

Our focus is not year-end revenues or satisfying a board of directors; we are a small, grassroots brand built by snowboarders for snowboarders. We stand in unwavering support of snowboarding and everything it encompasses. Proudly introducing groundbreaking innovations, celebrating our talented community.

As we unveil our new 25/26 collection, we invite you to stand with us. Embracing the underdog mentality as we refine our outerwear to embody functional fit, style, and the true spirit of snowboarding. This mindset fuels our commitment to challenge the status quo. Together, let's push boundaries, elevate our community, and defend the culture that we all love!

L1: Defending the Culture since 2003

The L1 team represents the essence of L1. They are not your standard pro snowboarders. They are the lifers, the ones who take the unmarked runs, the ones who battle a trick until it's perfect. They are the ones who don't follow but lead without claiming to be the leader. They are a collective of passionate individuals from around the world who do it their way.

As a brand that has consistently evolved over the past two decades, refining and redefining our process and presence in the outerwear landscape, it was essential for us to take a step back and reflect on some of the most meaningful products from our past. The riders who influenced what we have become, the trends that shaped our culture, and, ultimately, our identity all play a crucial

role in this journey. With the new generation adopting and adapting nostalgic styles, now is the perfect time to delve into our archives and celebrate our history through modern interpretations of some of our favorite silhouettes and iconic color combinations, all while maintaining our commitment to premium fabrics, perfected fits, and uncompromised performance.

Fit has always been a focal point for L1, defining the characteristics of team riders' styles and functionality for our consumers. L1 introduced the functional skinny fit over a decade ago, defined the functional Americana fit, and is now redefining the functional baggy fit, from cinched cuffs and wide knees to oversized styles that meet our North American and Asian team riders' demands for bigger fits that work.

As trends in fit evolve, so does our baseline. This season, we've dedicated significant time to refining our current fits, establishing a new "baggier" baseline for our current and future offerings, and creating a comprehensive selection with a more forgiving fit within our five distinct fit categories. The L1 fits have always been designed by core snowboarders for snowboarders, providing the most current functional fits and styles to the L1 consumer.

## M E N ' S L O O S E F I T

**OVERSIZED**  
Our roomiest fit, designed to fit baggy with a generous fit through the seat, thigh and a straighter leg opening.

**LOOSE**  
More room to move with a comfortable fit through the seat, thigh and a straighter leg opening.

**REGULAR**  
Our traditional fit with room to layer, without being overly loose. Standard fit through the seat, thigh and a straighter leg opening.

Our newest and most technical, waterproof, breathable, 20k/25k lightweight fabric solution incorporates a new Bamboo Charcoal Membrane to help wicker moisture out faster while providing the protection and waterproofing to keep you out hiking and exploring the unknown longer. The Bamboo charcoal is created by heating bamboo at a high temperature, and then the charcoal itself is processed and mixed in with fabrics as part of the growing field of nanotechnology. Its benefits include superior absorption and deodorizing ability, far infrared radiation properties, and thermal regulation.

Our technical, waterproof, breathable, windproof, 20k/20k 4-way stretch fabric solution exclusively available on our Axial Collection.

25,000g Breathability

20,000mm Waterproofing

20,000g Breathability

10,000mm Waterproofing

10,000g Breathability

DWR (Durable Water Repellent) coating

Non-insulated garment, single layer, wind-resistant.

## L A Y E R I N G & T A P I N G

3-layer shell fabric is waterproof, windproof, and breathable. The fabric features a water-repellent finish, a waterproof/breathable membrane, and a lightweight knit interior. No lining. The 3 layers are bonded to become one lightweight fabric to protect you from the elements.

All seams and areas with stitch lines are heat sealed with water-repellent tape.

2-layer shell fabric is waterproof, windproof, and breathable. The fabric features a water-repellent finish, a waterproof/breathable membrane, and a tricot or mesh interior lining for added comfort.

Main seams and areas with stitch lines are heat sealed with water-repellent tape.

Made with yarn that stretches in both directions, crosswise and lengthwise.

## F U N C T I O N A L I T Y

Introducing the new Cohaesive Cord Lock technology found on the front hood and bottom hem of our Axial Pro collection. This cord lock system provides an easy pull-to-lock and press-to-release functionality that allows you to adjust on the fly and with gloves on.

## S U S T A I N A B L E M A T E R I A L S

RECYCLED MATERIALS

A work in progress, we've set a goal to work towards having a line completely made of only fully recycled fabrics in the near future. As we start this journey, our main goal is to do our part in reducing the industry's greater impact one step at a time.

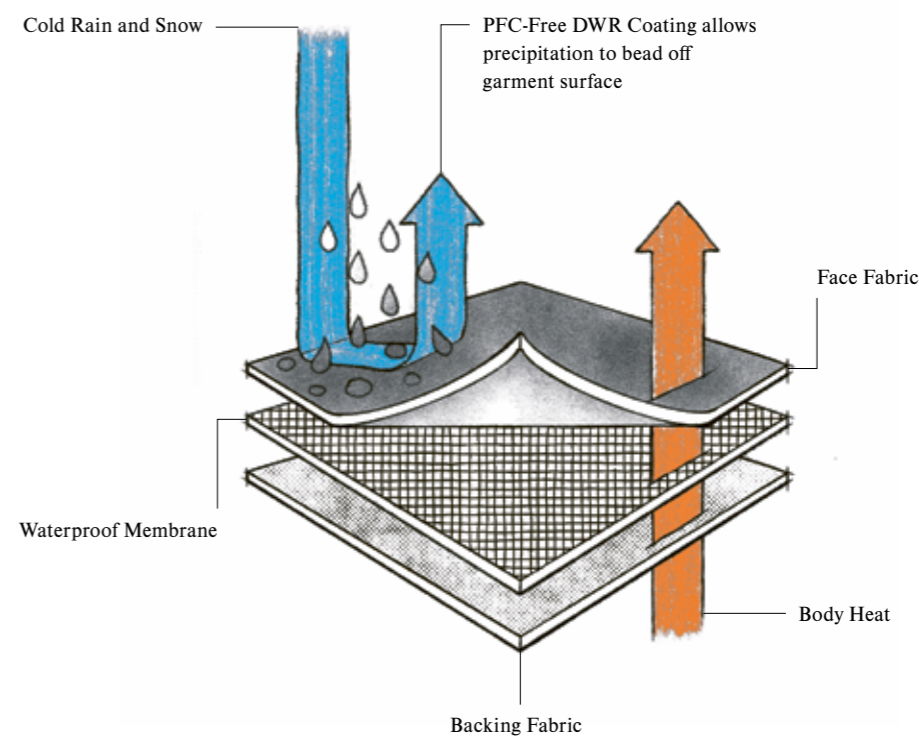

ECO YARN LINING

Our liners use an eco-friendly fabric—a waterless-dyed fabric produced without immersion in water. This process reduces CO2 emissions and uses less energy to produce. It also helps improve the environmental balance of textiles throughout the product life cycle.

As part of our commitment to improving our environmental footprint we have entirely switched from C6 DWR containing hazardous PFC's (per- and poly-fluorinated chemicals) to PFC-free DWR on all our fabrics and styles that require a DWR coating. The importance of a cleaner textile process is fundamental in our journey to reducing our environmental footprint.
