

NITRO

FOREVER SNOWBOARDING

DIGITAL DEALER MANUAL / 2025-2026

FOREVER SNOWBOARDING

Nitro is a brand 100% committed to snowboarding. What else would we do? We love snowboarding; it's our passion, our job, and our life. So naturally, we support what we love, we enjoy the company of other riders, push forward to make better stuff, work together with our partners to strengthen the community we love, and get stoked on riding - forever. It's very personal, and we have an inherent drive to promote snowboarding on every level.

Throughout the years I have seen so many happy faces after a day of riding, the fun and joy snowboarding can give you, there's simply no other choice. It still stokes me out to see someone on the mountain using one of our products. It's a humbling experience. I know that we'll be riding forever, and I hope to continue contributing to snowboarding along the way.

- Tommy Delago

Our Nitro Team embodies the feeling of what a snowboarding family is. It is a global team of human beings from all aspects of life and individuals from the global community, but most importantly, it is a group of people who love the act of snowboarding. From Olympians, World Champions, Video-part enders, Hall-of-Famers, innovators, legends, and just die-hard riders - the Nitro Team is a true example of a snowboarding family built of true professionals.

MARKETING PROJECTS

DOG BEACH

An action-focused team rider part movie dedicated to being a timeless snapshot of the current state of snowboarding and its core culture, featuring the future of Nitro and premiering Fall 2024.

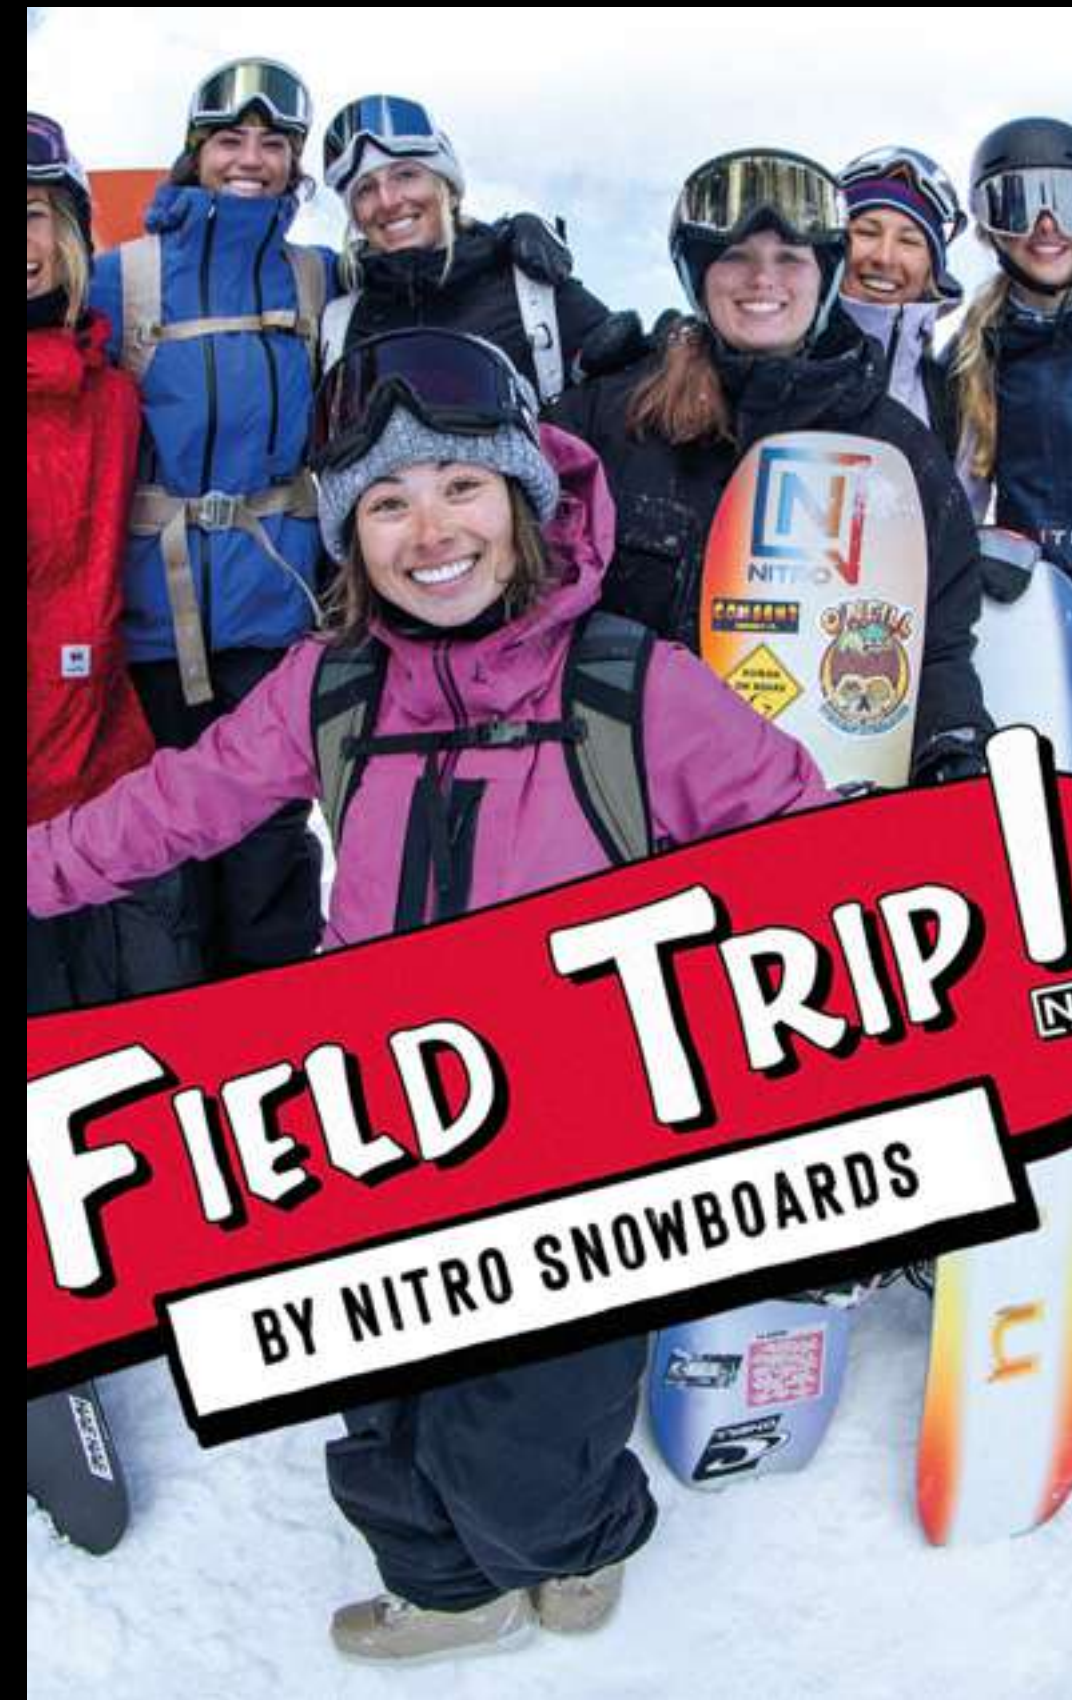

A snowboard film dedicated to the culture of snowboarding.

KLEVELAND

An action-based video focused on what Marcus Kleveland does best: filming, creating, and inventing new tricks with his best friend/filmmaker, Petter Ulsletten.

A short film that will premiere in Fall 2025. A short movie for all snowboarders.

NITRO FIELD TRIP

The continuation of the Nitro YouTube video series - Field Trip - showcases team shoots and trips with the global Nitro team, Nitro women's team, and beyond. A behind-the-scenes look at what it's like to ride with the Nitro family and to inspire people to go out and ride with their friends.

A multi-episode series will be released during the season kick-off. (Oct-Dec)

PRESENTED BY
MELLOWPARKS.CN

PRESENTED BY
ELOOA CAMPS

CAMP GOOD TIMES

Experience the feeling of Nitro, a camp created over a decade ago to allow anyone and everyone to join the Nitro family on and off the mountain and connect with all layers of Nitro. In the next few years, we will expand this concept from the Alps to Asia and beyond.

OG SESSION II

This is a gathering of past Nitro Family members and Pros who are still actively snowboarding and want to join together, continue pushing their limits, and just connect. Snowboarding is more profound than the current pros; it's full of layers that build up the community, so we wanted to create a gathering to strengthen this layer and just have some fun.

THE NITRO SNOWBOARD COLLECTION

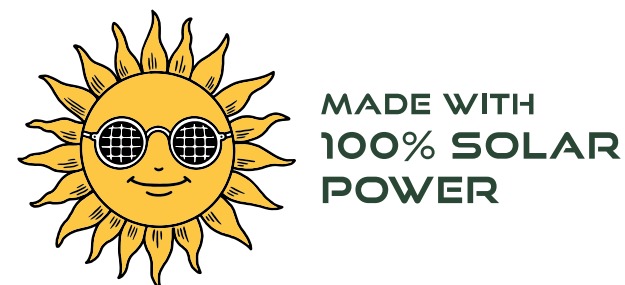

ENVIRONMENTAL RESPONSIBILITY

We believe transparency is key regarding environmental responsibilities, and showing the CO² output for each board is important. We know snowboard manufacturing is not perfect and impacts the environment, so we must continue looking for new ways to improve all aspects. We are investigating new ways of compensating 100% of our carbon footprint for our total board production and are continuing to work on solutions to reduce our environmental impact through materials, processes, timing, and durability. Currently our boards are built with a hundred percent solar power, FSC-certified wood cores, water-based inks, and as many recycled materials as possible. This journey has and will lead to failures and great achievements; we are excited to continue moving forward and hope you'll join us on this snowboarding journey together.

CURRENT SNOWBOARD CO² FINGERPRINTS

FURTHER CO² REDUCTION INITIATIVES

QUIVER ECO LAB

GREEN SPEED NATURAL WAX

All Nitro boards are factory-tuned with our 100% Green Speed Natural Wax, a fully biodegradable wax made of renewable resources.

ECO POXY 33

A new generation of epoxy resin that is an environmentally enhanced, clear, and waterproof epoxy system with over 33% of products molecular structure derived from plant and vegetable matter.

ECO SPEED BASE

Base material that utilizes post-industrial Ptex base materials at an 85% rate.

ECO GUARD TOPSHEET

Topsheet material that utilizes post-industrial recycled material at a 90% rate.

NITRO QUIVER

BRYAN FOX
TOMMY DELAGO

The legendary Quiver Series started as a modest three-board offering with the concept of a rail, an all-mountain, and a powder snowboard and has evolved into a fun zone where we freely explore new ideas, shapes, and materials to continue to broaden the horizon of what snowboarding has to offer.

Since its inception, the Quiver Series has continuously been driven by Nitro team rider Bryan Fox and Nitro Snowboards' co-founder and board shaper Tommy Delago and their passion for creating the perfect ride for specific terrain.

"Searching, hunting, looking... the camo is a reference to the desire of seeing what is around that next corner. The font is a hand done version of a font I remember seeing in one of my dad's old Field and Stream magazines."
- Bryan Fox

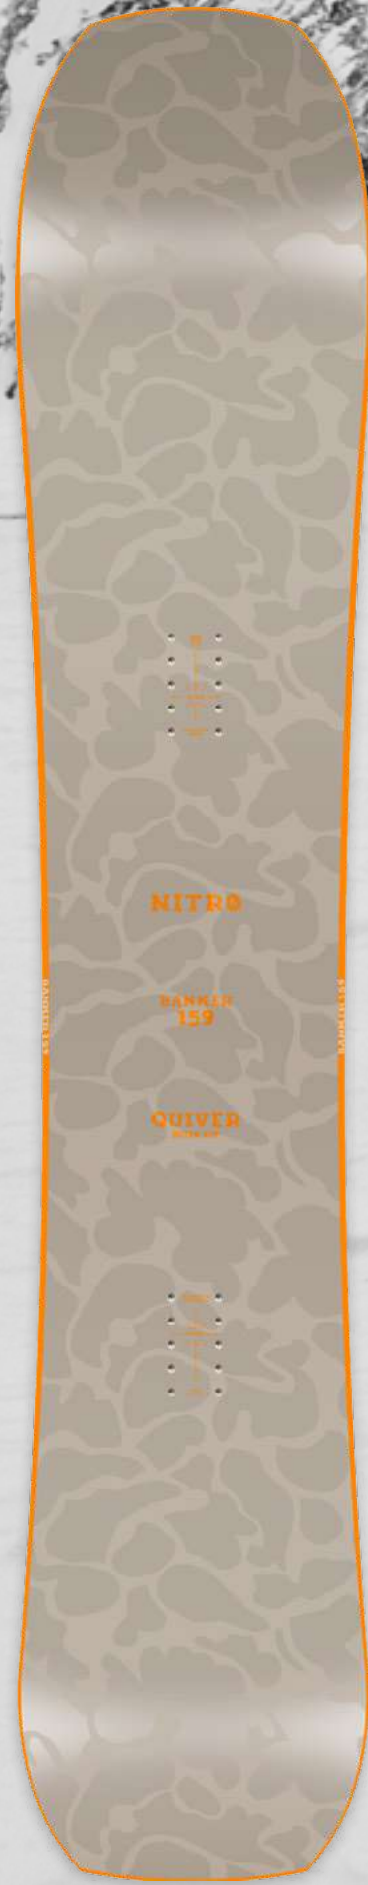

"Designing boards for the Quiver series allows us to dream up any concept that we think might work and make it a reality - no matter what sales perspectives, margins or the market might dictate. It's the ultimate shaper's heaven!" - Tommy Delago

QUIVER

CANNON

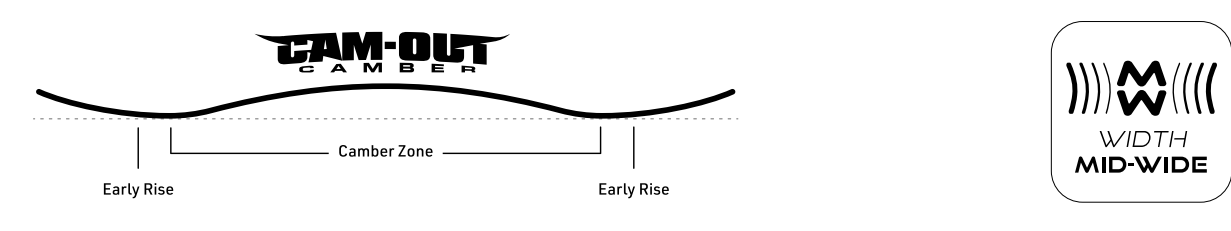

The World's Most Famous Swallowtail

- MOST VIRAL NITRO BOARD
- CELEBRATING 35 YEARS OF SWALLOWTAILS
- QUIVER ECOLAB

CHARACTERISTICS

Shape: **Tapered Swallowtail** - Floation and control even in the deepest stuff
 Camber: **Cam-Out** - Fun, responsive and forgiving
 Profile: **Standard Core Profile** - Even flex and control
 Width: **Mid-Wide** - Exactly enough platform for most boot sizes
 Sidecut: **Progressive** - Powerful turns and a catch-free nose

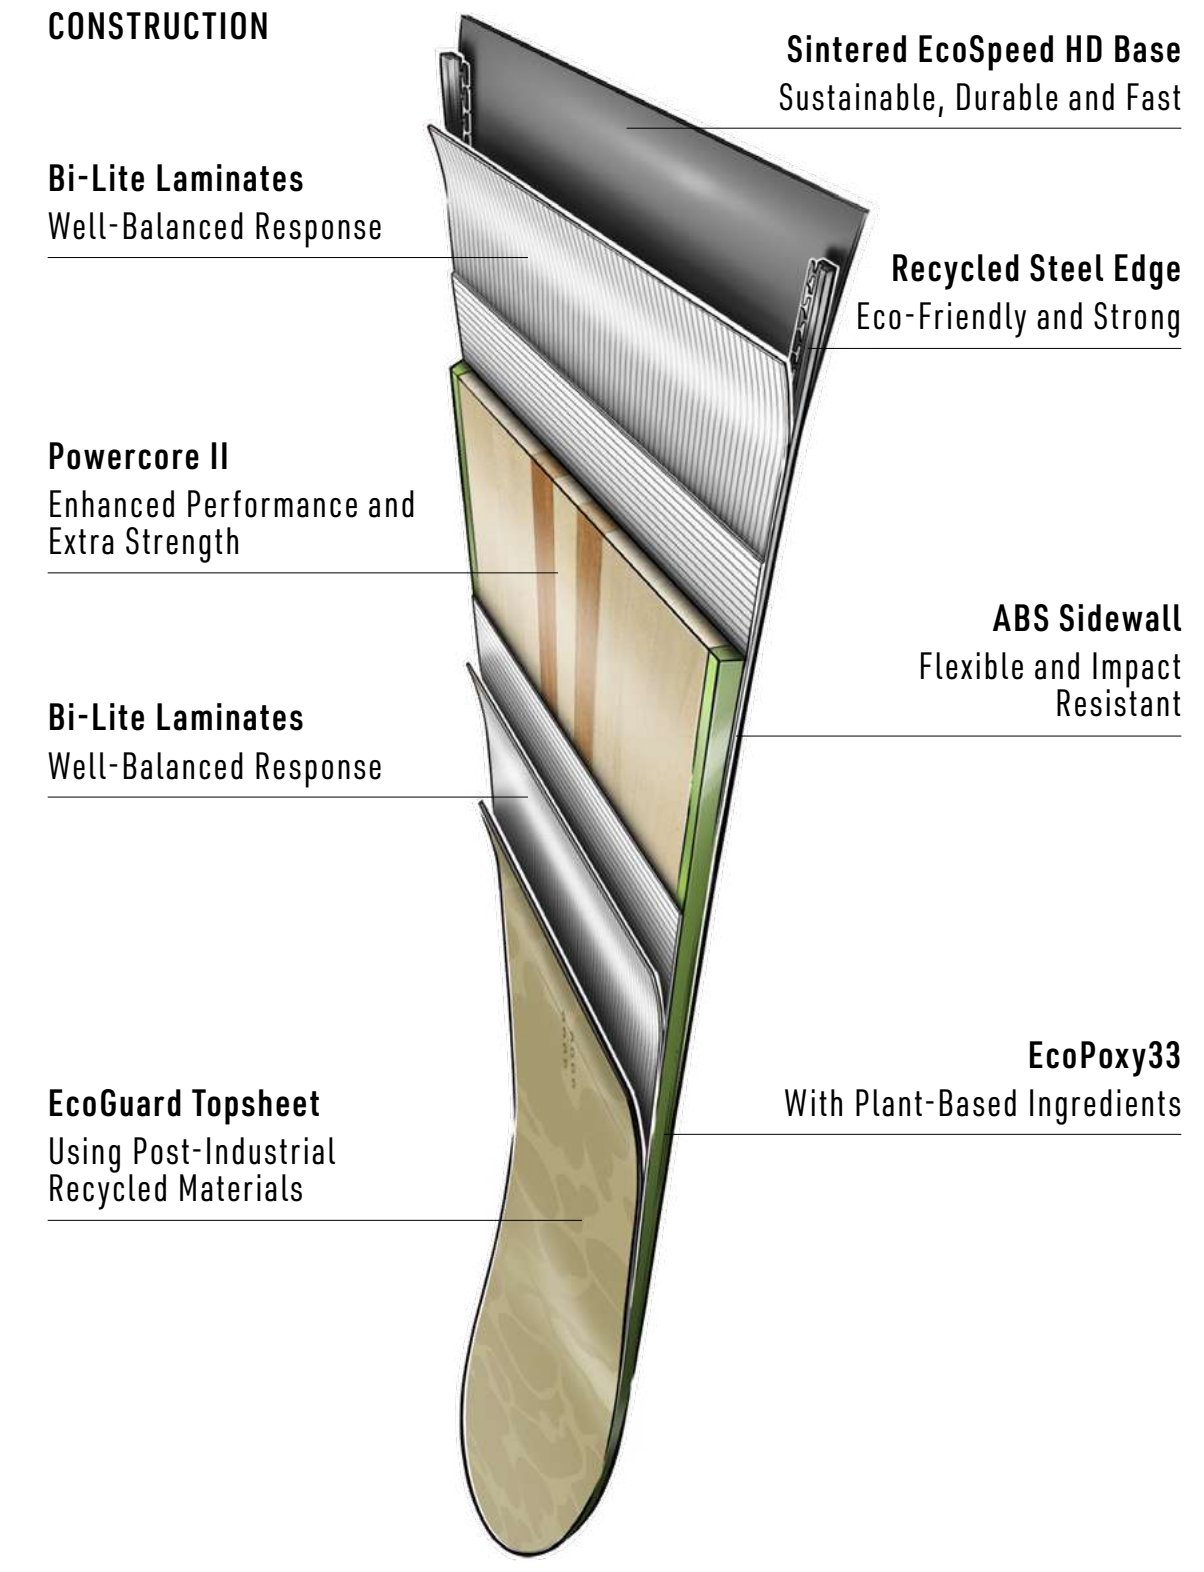

DESCRIPTION

This iconic big swallowtail is the perfect board to float through deep pow and big lines without sacrificing the joy of carving early morning groomers. Team riders like Bryan Fox, Marcus Kleveland, Markus Keller, and the rest of the pro team are ripping it in all sorts of conditions, from AK lines and tree runs, all the way to the park!

"The Quiver Cannon changed the way I view the mountains, still amazed at how well it handles all conditions. The cannon is the most "ATV" big board on earth. Prove me wrong."
- Bryan Fox

QUIVER

BANKER

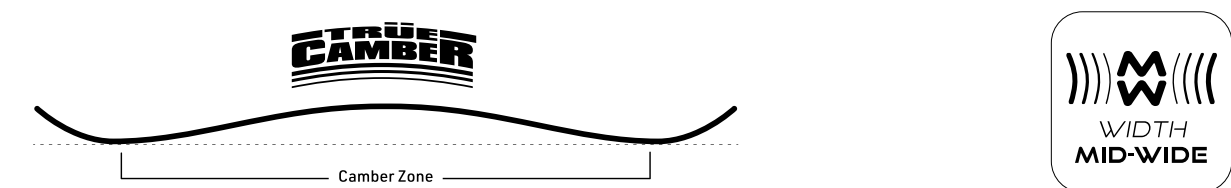

The Official Turning & Burning Champion

- BEST SELLING QUIVER BOARD
- MOST VERSATILE QUIVER MODEL
- TOMMY & BRYAN'S FAVORITE CARVER
- QUIVER ECOLAB

CHARACTERISTICS

Shape: **Directional** - The most versatile all-mountain shape
 Camber: **True** - Full control and pop
 Profile: **Reflex Core Profile** - Better torsional control
 Width: **Mid-Wide** - Exactly enough platform for most boot sizes
 Sidecut: **Progressive** - Powerful turns and a catch-free nose

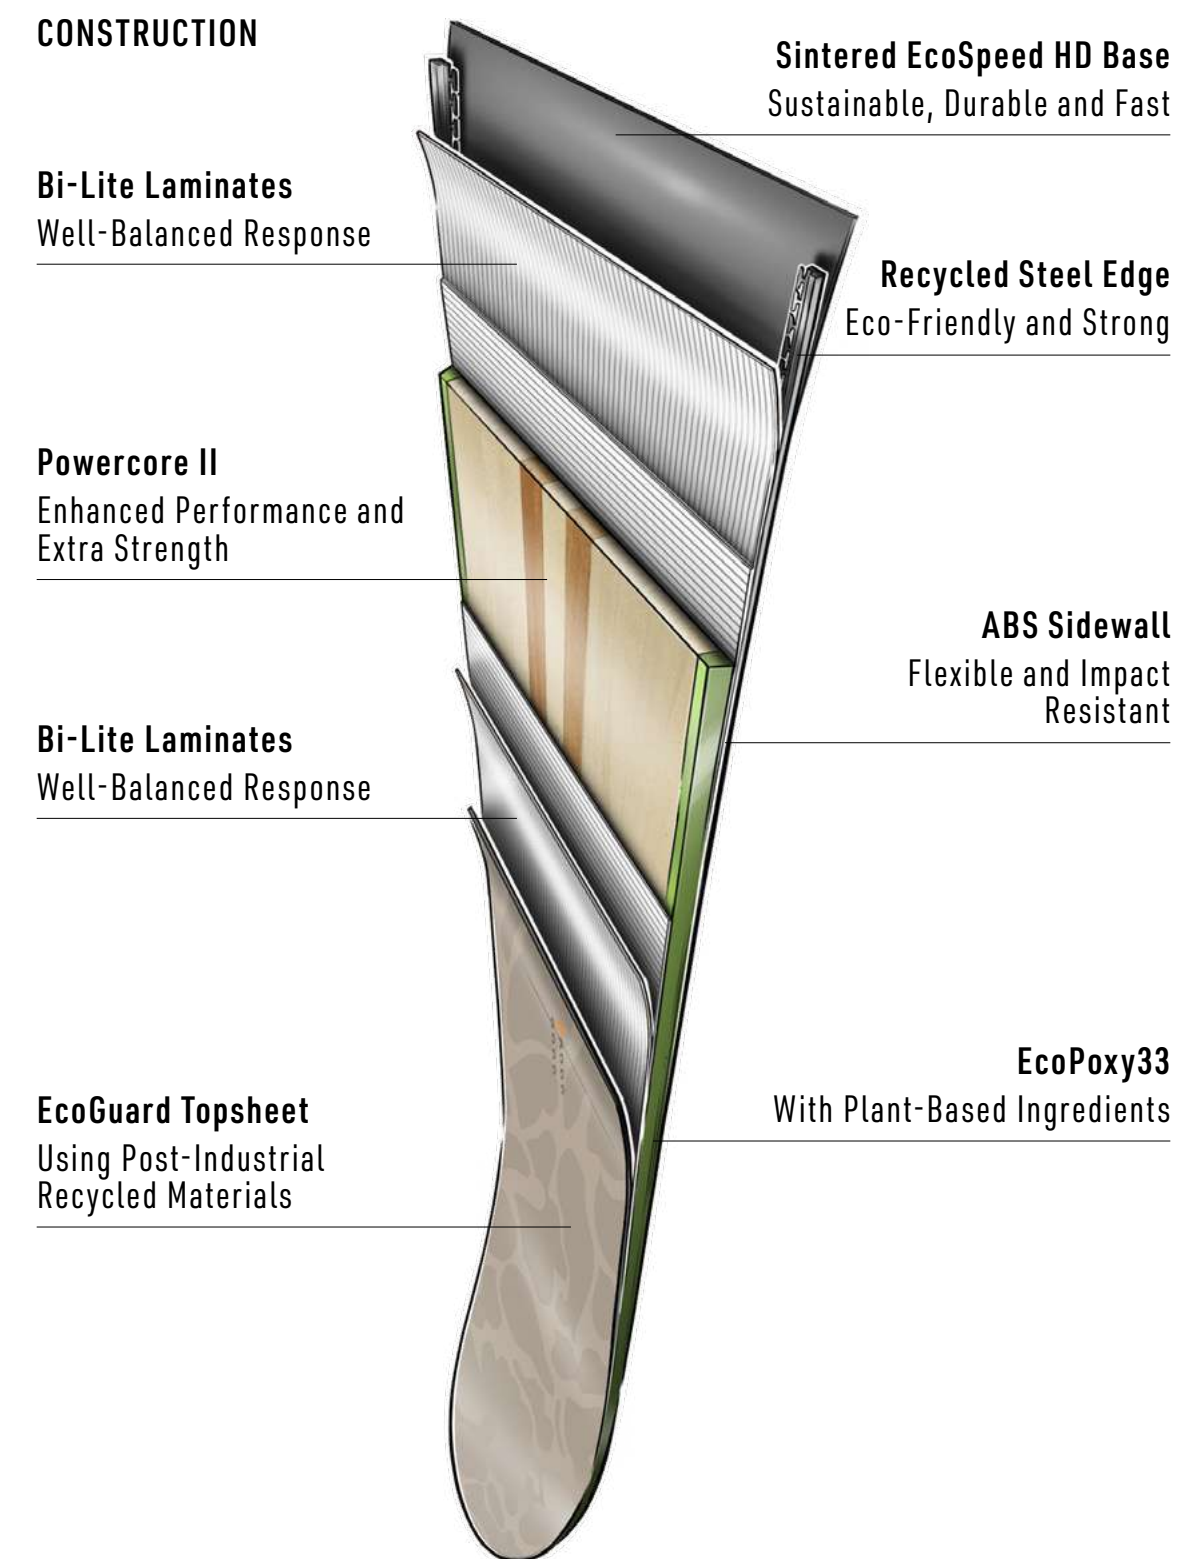

DESCRIPTION

Start clearing space on your top shelf! The Banker will bring home some serious banked slalom hardware. Its directional all-mountain shape will help you fly through carved turns on and off the groomed runs, making it the most versatile board in the Quiver Series. This is Bryan' and Tommy's favorite ATV board for a reason.

"The Banker has been my favorite All-Mountain Carver since we first designed it. It holds an edge at higher speeds, yet is nimble and playful in the pow, and doesn't stress you out on that last run back down to the parking lot at the end of a long day out" - **Tommy Delago**

QUIVER

BASHER

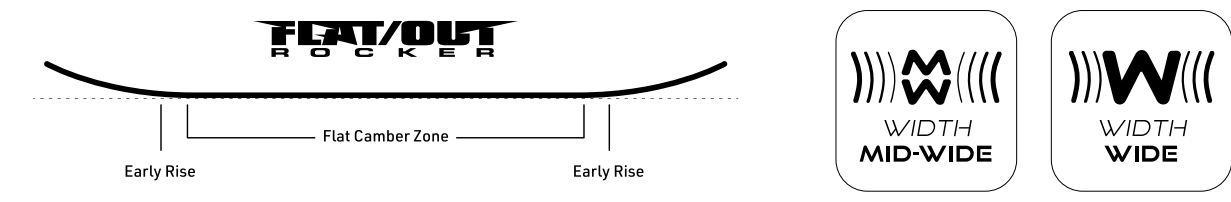

The Original Friendly Freestyle ATV

- 3D TWIN TECH AND ASYM SHAPE
- A PRO LEVEL OPTISYM
- NEW 155 SIZE
- QUIVER ECOLAB

CHARACTERISTICS

- Shape: **Asym Twin** - Effortless turns and full control
- Rocker: **Flat-Out** - Float, pressability and forgiveness
- Profile: **Reflex Core Profile** - Better torsional control
- Width: **Wide** - All the room you need without edge-to-edge lag
- Width: **Mid-Wide** - Exactly enough platform for most boot sizes
- Sidecut: **Dual Degressive** - Smooth and forgiving
- Plus: **3D Twin Tech** - The ultimate all terrain experience

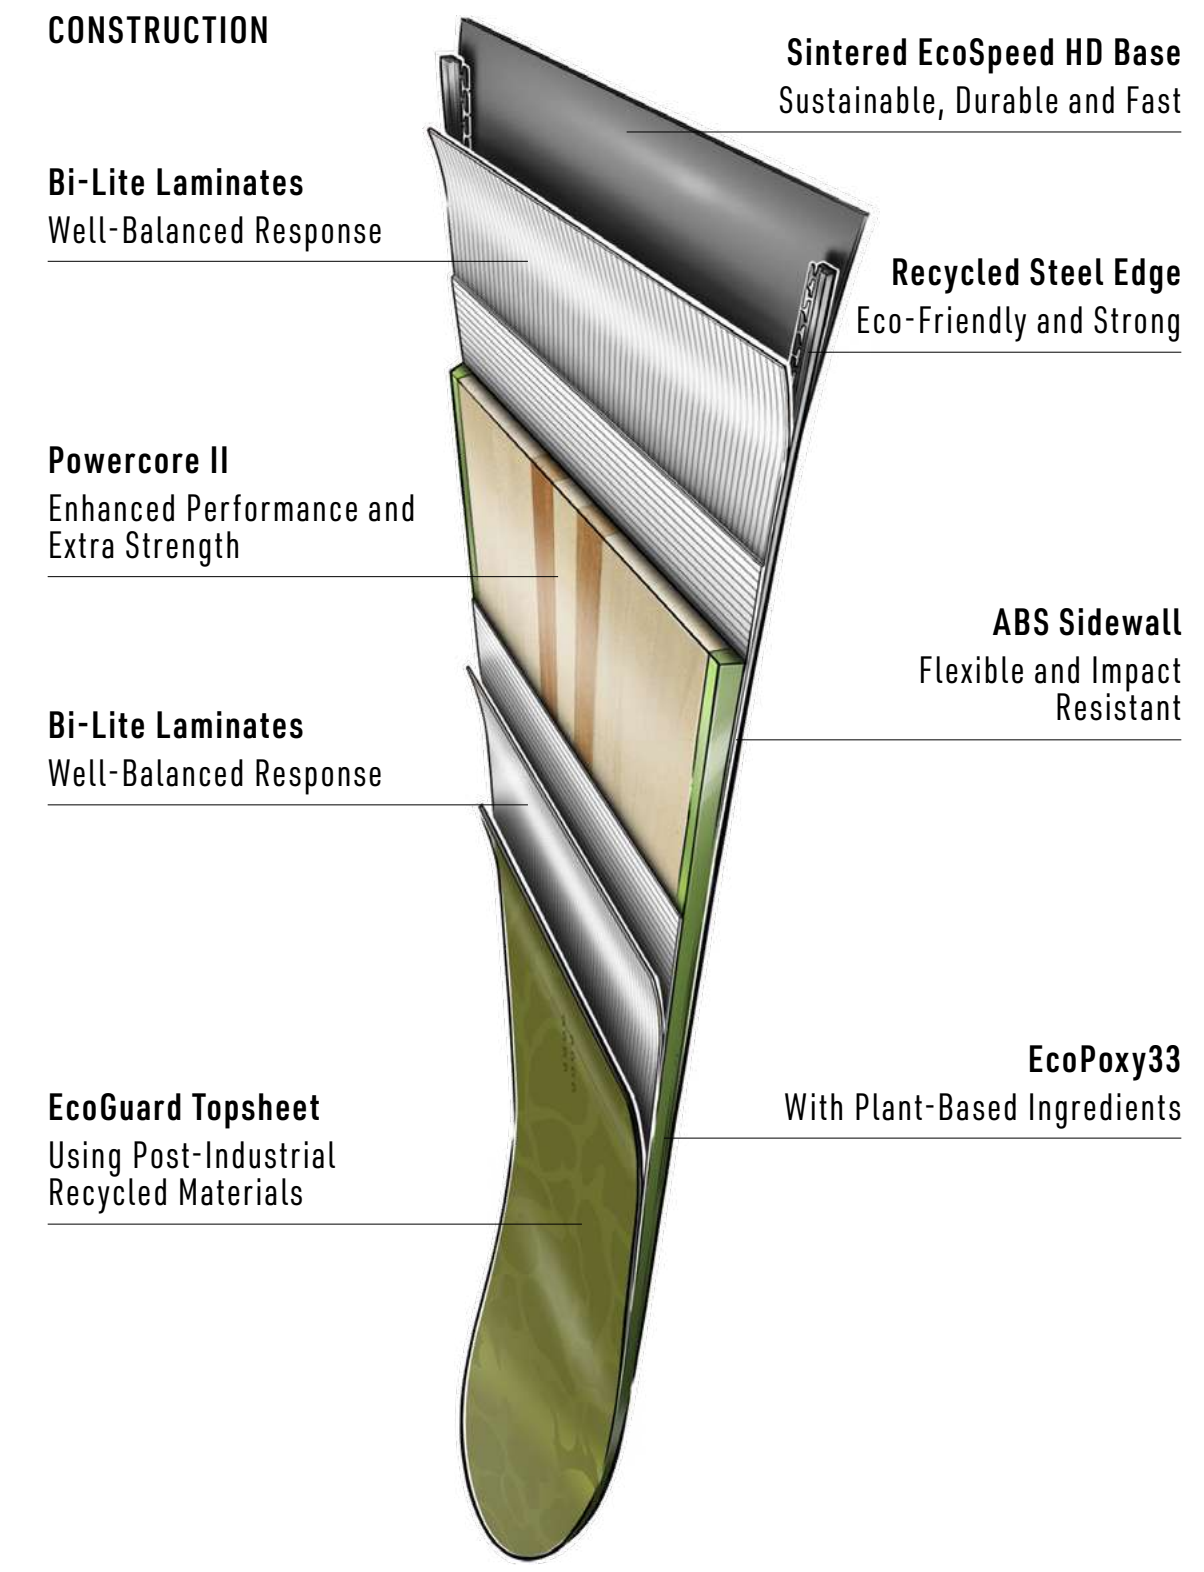

DESCRIPTION

If you enjoy cruising, jibbing, and carving up the whole mountain at a fun freestyle pace, then the Basher is for you. Based on the Optisym's asymmetric „Friendly Freestyle“ ride and upgraded 3D Twin Tech features, it allows for deep carves on groomers, but has the perfect playful park flex and enough float to maximize those precious powder days.

“The Basher is one of the most fun boards I have ever ridden and my favorite friendly freestyle all-mountain board because it offers a universally fun flex and float if you like carving at slower speeds, buttering the rollers, and just mellow freestyle riding in and out of the park!” - Knut Eliassen

QUIVER

"Man, I just love this board! We called it Pow, and it really looks like a pure powder toy, but it's so versatile. You can surf it in the pow, slash the slush, and lay down some serious turns once you hit that hardpack."

- Tommy Delago

„Please do me a favor and at least try one out - and let me know what you think!“

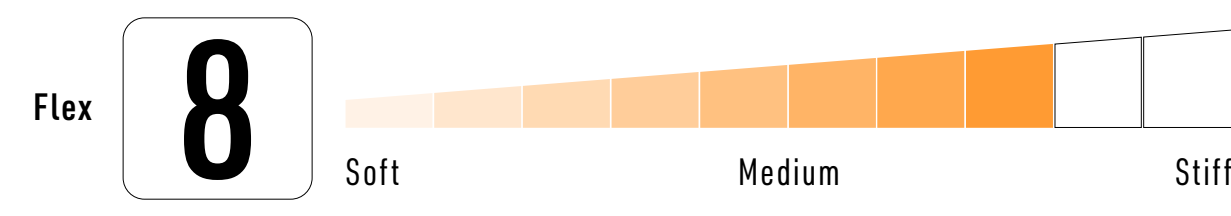

QUIVER

POW

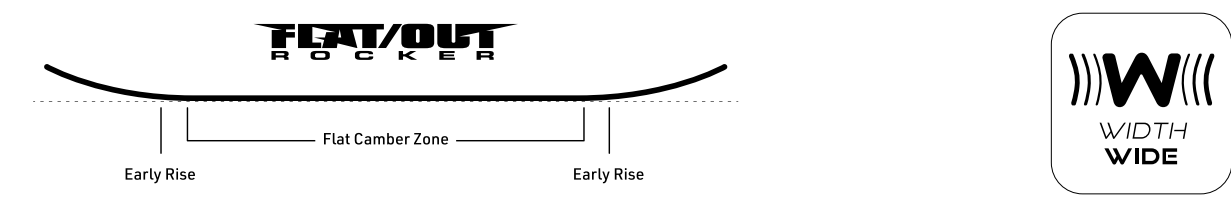

Float, Glide, and Carve Reinvented

- TOMMY'S FAVORITE BOARD
- 3D SURF TECH
- VOLUME SHIFTED SHAPE
- AFFORDABLE QUIVER MODEL
- NEW 163 SIZE

CHARACTERISTICS

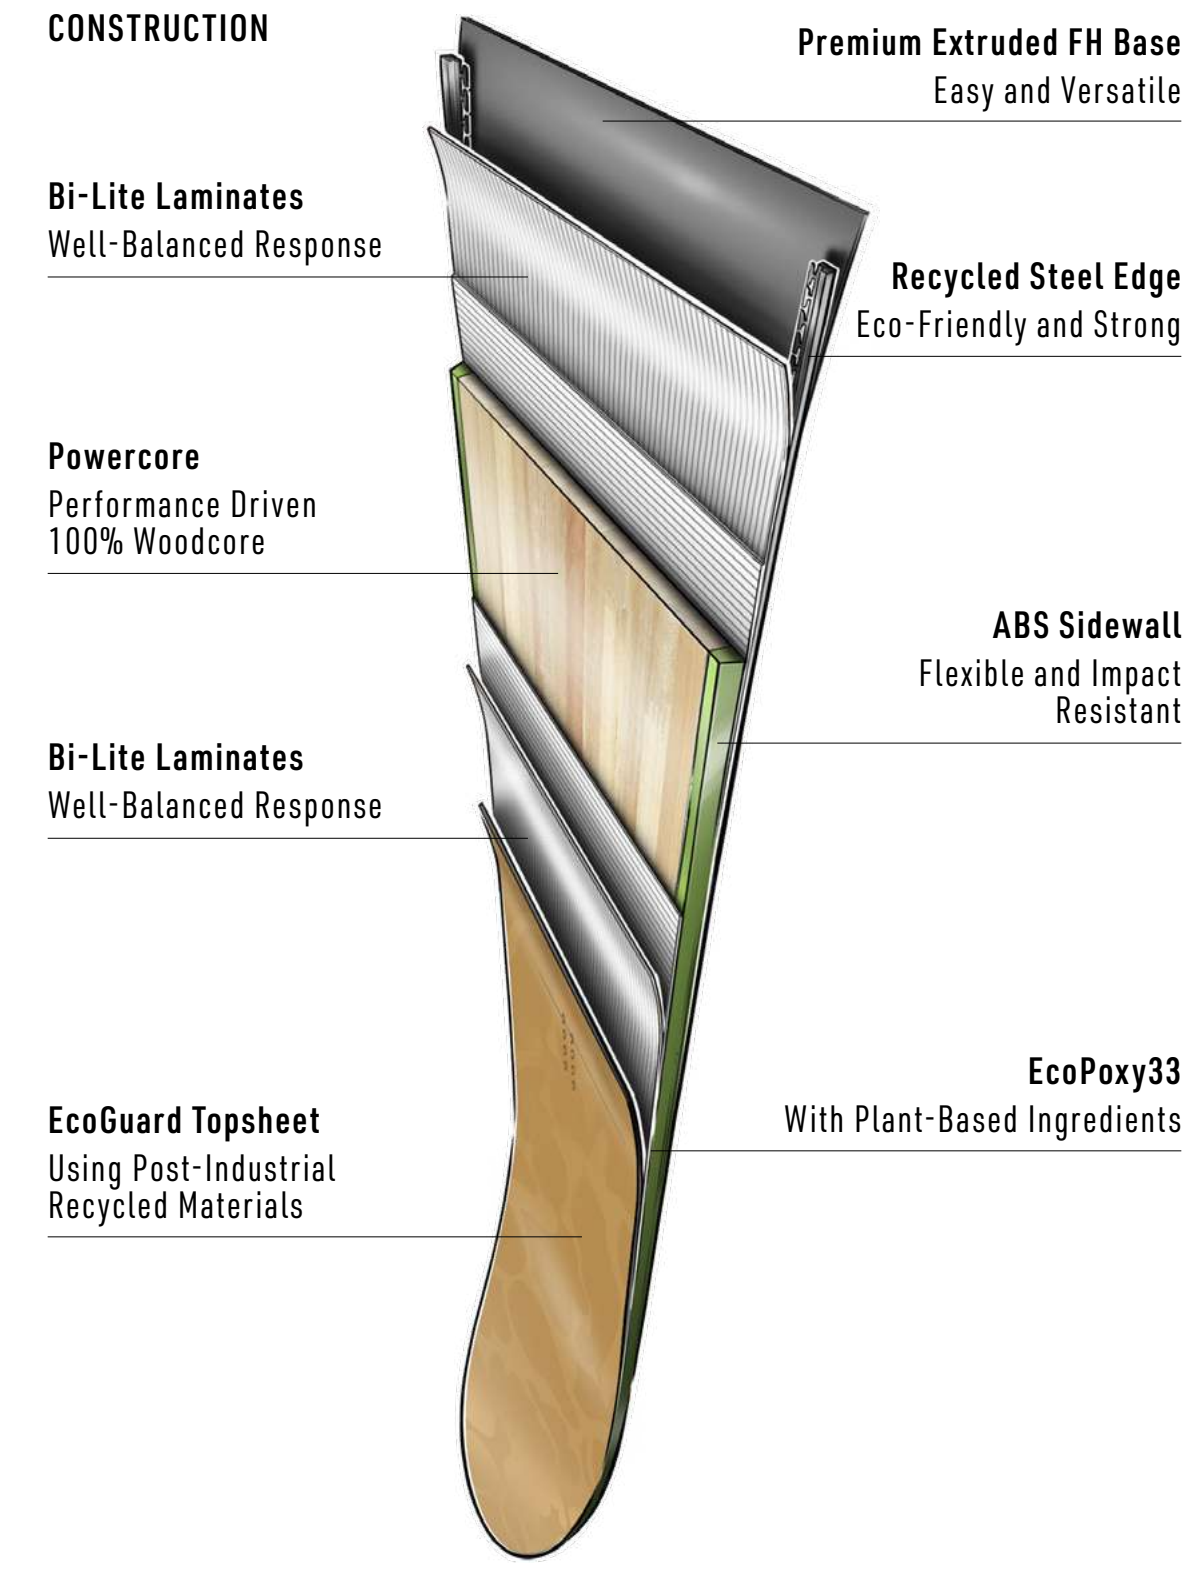

Shape: **Tapered Pintail** - Floatation and control even in the deepest stuff
 Rocker: **Flat-Out** - Float, pressability and forgiveness
 Profile: **Standard Core Profile** - Even flex and control
 Width: **Wide** - All the room you need without edge-to-edge lag
 Sidecut: **Progressive** - Powerful turns and a catch-free nose
 Plus: **3D Surf Tech** - Perfect Surf feeling in the snow

DESCRIPTION

Don't let the name fool you: This is the ultimate experience and a completely new kind of board in any terrain - off and on the slopes. We learned a lot from building and riding pow surfers: a low nose rise, pintail and 3D Surf Tech. Combined with a deep progressive sidecut, the Pow becomes the ultimate all-mountain pow carver and Tommy's favorite board!

 Profile: **Standard Core Profile** - Even flex and control
 Width: **Wide** - All the room you need without edge-to-edge lag
 Sidecut: **Progressive** - Powerful turns and a catch-free nose

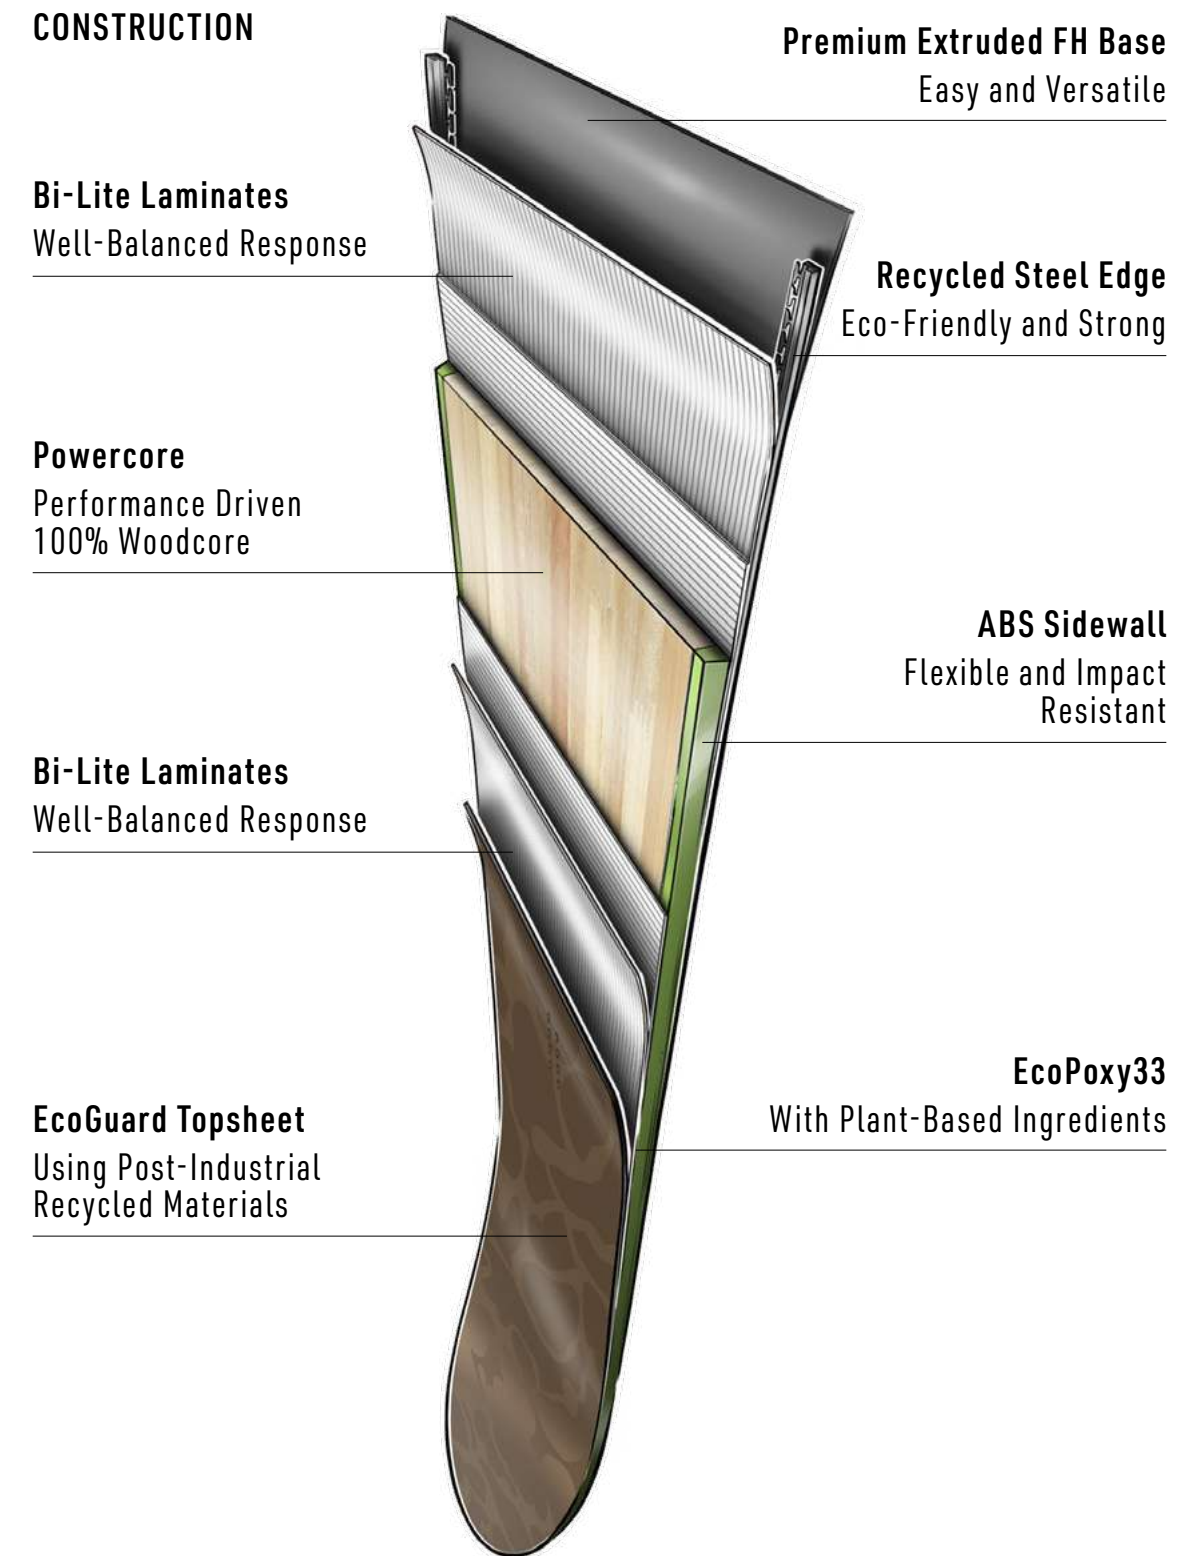

DESCRIPTION

The FinTwin is the most versatile shortboard on the mountain: A do-it-all swallowtail board that focuses on bringing the best shape, features, and flex at an affordable price to allow everyone to have fun in powder conditions, tree runs and spring slush by merging Bryan Fox' and Tommy Delago's know-how and passion for snow surfing!

"Even though the FinTwin is a little wider than my other boards the flex and volume shifted shape makes it zippy and playful for me on when riding both the groomers and pow. The Fintwin is definitely a key part of my travel quiver - this one floats!" - Christy Prior

„For years I have been keeping notes, making drawings, in hopes of updating the 1995 swallowtail.“

We created the new Nitro Guest Shaper Series to celebrate the passion for board shaping by snowboarders around the world. We're opening up our inner design circle and allowing new and sometimes off-the-wall ideas to become reality!

„With the resurgence in the past few years of old-school shapes, I felt the time was right. And I knew right away I wanted to work with Tommy and Nitro. 30 years ago, we set the standard with the 196cm, and now it's time to do it again - inspired by Little Cottonwood Canyon and the love of snowboarding!“

- Drew Hicken / Nitro OG Team Rider and SLC Legend

ALTERNATOR X VOLCOM

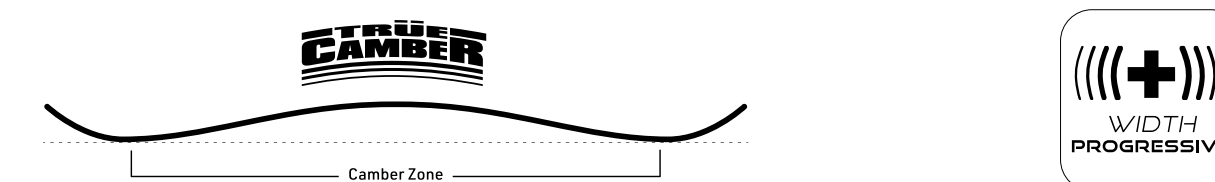

The Stony ATV Monster

- PART OF THE VOLCOM COLLAB COLLECTION
- HIGHLY TRENDING BOARD SHAPE
- DEVELOPED BY TOP ALL-MOUNTAIN PROS
- PROVEN BESTSELLER
- PROGRESSIVE WIDTH FOR REDUCED STOCK REQUIREMENT
- MARKETING FOCUS

CHARACTERISTICS

Shape: **Directional** - The most versatile all-mountain shape
 Camber: **True** - Full control and pop
 Profile: **Reflex Core Profile** - Better torsional control
 Width: **Progressive** - Perfect length-to-width match
 Sidecut: **Dual Degressive** - Smooth and forgiving

DESCRIPTION

This board has become a Volcom and Nitro team favorite for a good reason: it is the most capable backcountry freestyle snowboard, designed and backed by the world's best all-mountain pro riders. Its timeless directional silhouette, slightly oversized width, and loads of power under the hood will keep you charging through anything you point it at! For the all-mountain maniac!

"The Alternator x Volcom board - it simple. The board is absolutely insane. No words can describe the feeling of this monster."
 - Seth Hout (Volcom Team Manager & Pro Rider)

SANTOKU

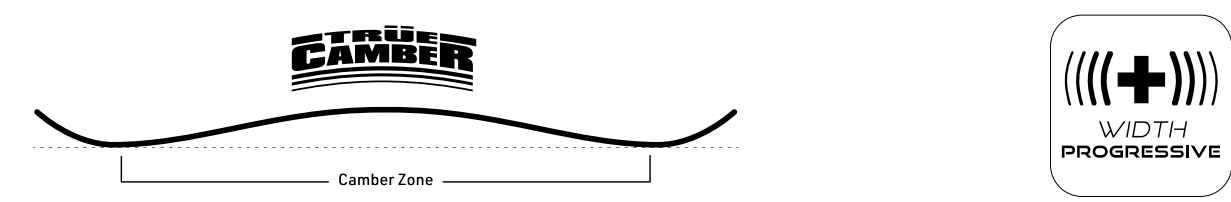

A Truly Playful Twin ATV

- DEVELOPED WITH ELIAS ELHARDT
- 100% RIDER DESIGNED
- COLLABORATION WITH WAVES FOR CHANGE

CHARACTERISTICS

Shape: **All-Terrain Twin** - Classic twin with elongated tip and tail
 Camber: **True** - Full control and pop
 Profile: **Whiplash Core Profile** - Maximum ollie power
 Width: **Progressive** - Perfect length-to-width match
 Sidecut: **Dual Degressive** - Smooth and forgiving

DESCRIPTION

Looking for a medium-flexing, fun, and playful snowboard for all-mountain riding? The extra float from the bigger nose and tail allows for a true twin powder experience. The Santoku is a board that can turn the entire mountain into a playground and is the brainchild of world-class backcountry snowboarder and big-picture advocate Elias Elhardt.

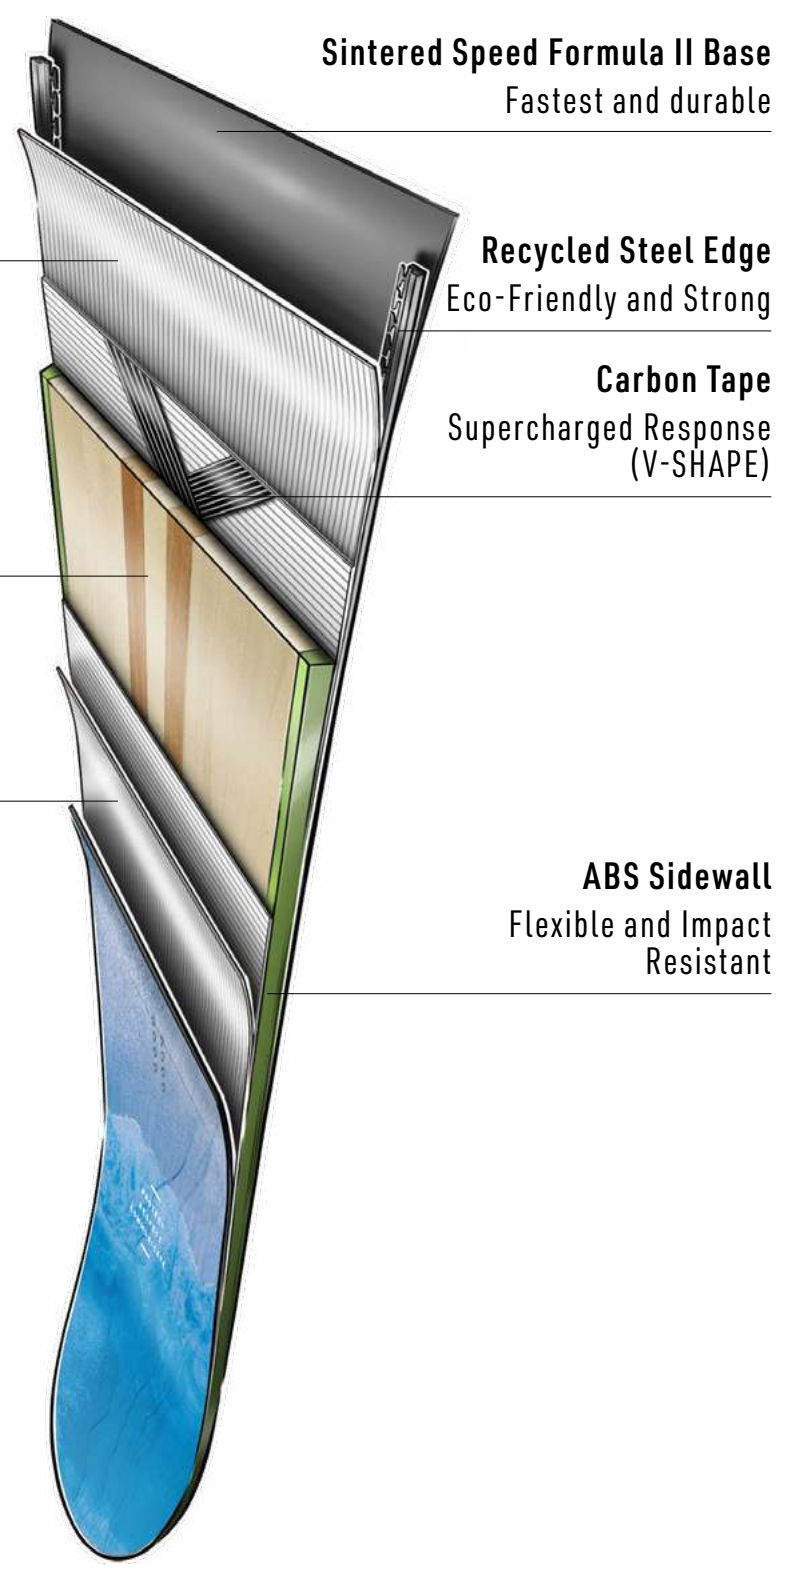

"Boardsports and its community have been the transformative force in my life, guiding me through challenges and uncertainties. Along this journey, the Santoku snowboard has, of course, been my essential tool for many years, so it seems only fitting to partner with Waves for Change to help others experience the joys of boardsports as well. At Waves for Change, disadvantaged and often traumatized kids from the Cape Town townships are not just learning to surf - they are experiencing a transformative journey within a therapeutic framework." - Elias Elhardt

PANTERA

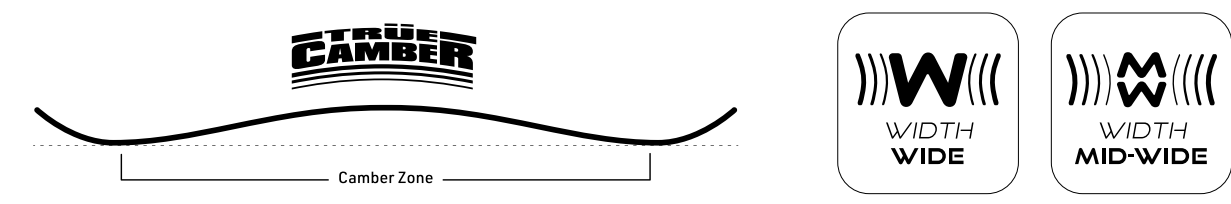

The Ultimate Speed Machine!

- CARVING MACHINE
- SINCE 2005 - 20 YEARS!
- 30% SALES GROWTH
- RIDDEN BY MAXI PREISSINGER
- PHANTOM+ BINDING MATCH
- MARKETING FOCUS

CHARACTERISTICS

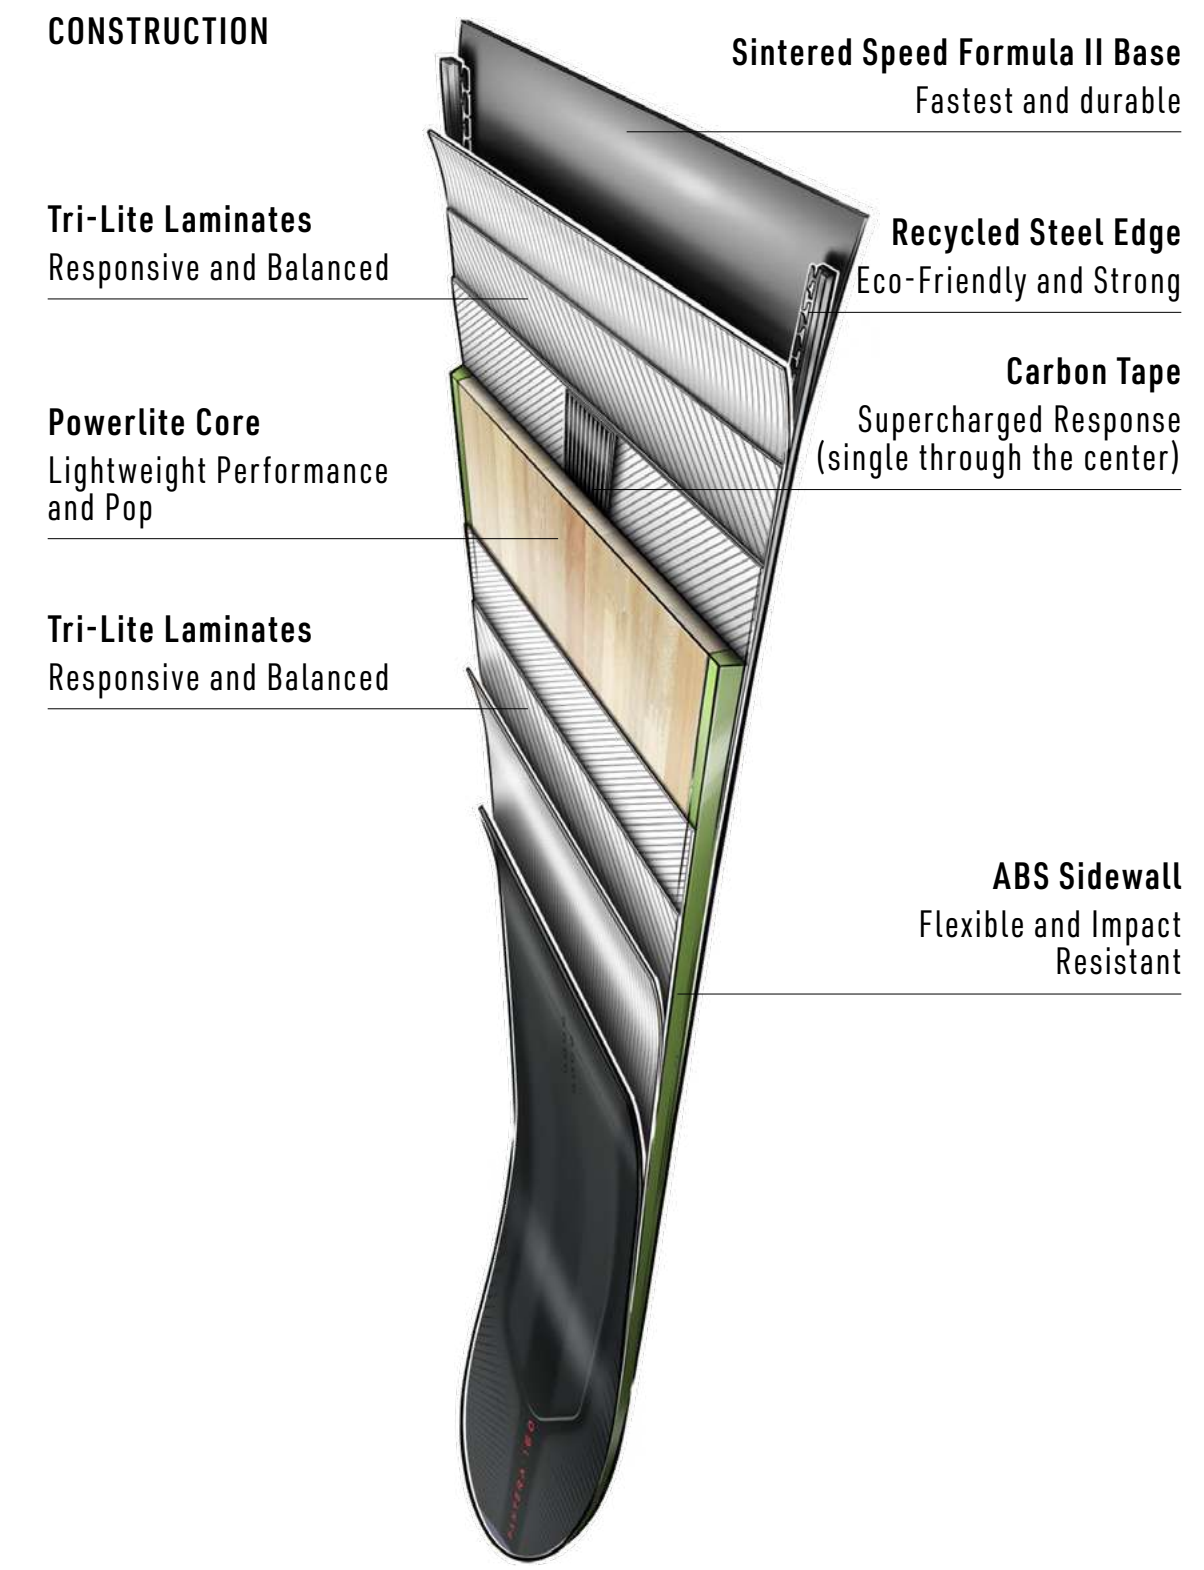

- Shape: **Directional** - The most versatile all-mountain shape
- Camber: **True** - Full control and pop
- Profile: **Reflex Core Profile** - Better torsional control
- Width: **Mid-Wide** - Exactly enough platform for most boot sizes
- Width: **Wide** - All the room you need without edge-to-edge lag
- Sidecut: **Progressive** - Powerful turns and a catch-free nose

DESCRIPTION

The Pantera has been engineered for speed freaks looking for psycho control on and off the fresh groomers, with a hyper-focus on precision while connecting turns and holding a rail easily at high speeds. Explicitly built for powerful riders looking for a responsive experience unlike anything before! And check out riders like Maxi Preissinger whipping his Pantera even through the park!

SQUASH

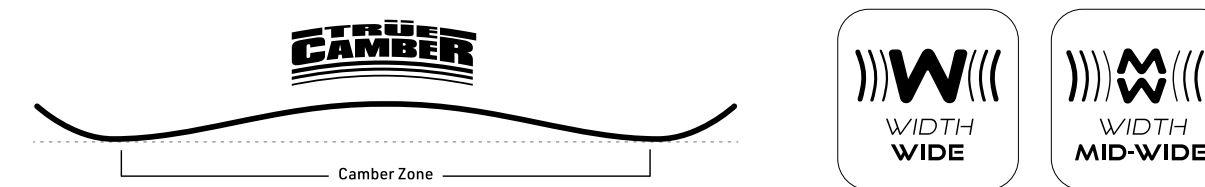

Shaped for More Fun!

- TOMMY'S GO-TO BOARD FOR CROSS-OVER RIDING
- EERO ETTALA'S FAVORITE POWDER BOARD
- OFFSPRING FROM THE QUIVER SERIES
- CARRY FORWARD GRAPHIC

CHARACTERISTICS

Shape: **Tapered Swallowtail** - Floation and control even in the deepest stuff
 Camber: **True** - Full control and pop
 Profile: **Standard Core Profile** - Even flex and control
 Width: **Wide** - All the room you need without edge-to-edge lag
 Width: **Mid-Wide** - Exactly enough platform for most boot sizes
 Sidecut: **Progressive** - Powerful turns and a catch-free nose

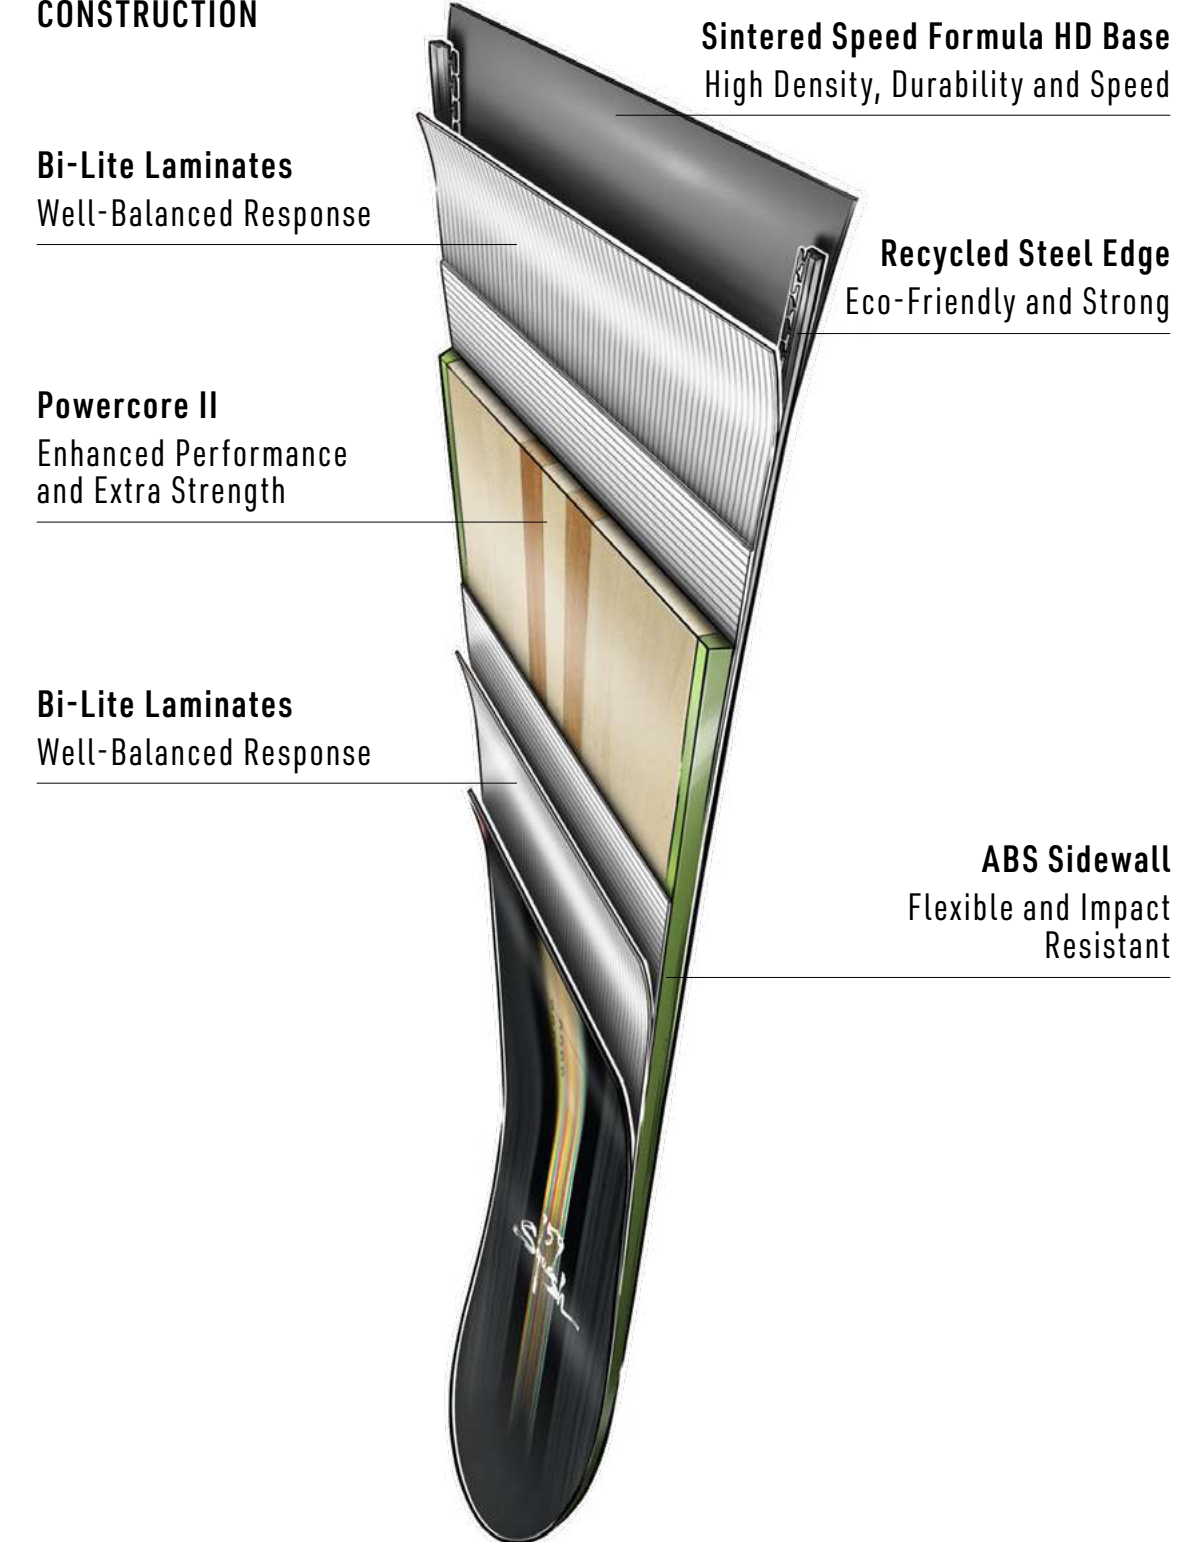

DESCRIPTION

The Squash combines the best of two worlds: Carving and Pow! If you're looking to hit that secret stash of fresh and lay down some turns on the hardpack, all within the same run, this board is just perfect. Its iconic swallowtail shape generates balanced float in the pow, and the legendary progressive sidecut makes you carving like a pro while navigating the entire trail map.

"Any day is a Squash day! I know I can't go wrong when I grab this board in the morning after a decent dump. It'll float me through the fresh but will still be loads of fun when it gets choppy or if - god forbid - the resort decided to groom all the pow down to corduroy and I decide to put it on its edges!" - **Tommy Delago**

TEAM PRO MARCUS KLEVELAND

Pro-Caliber Freestyle Performance

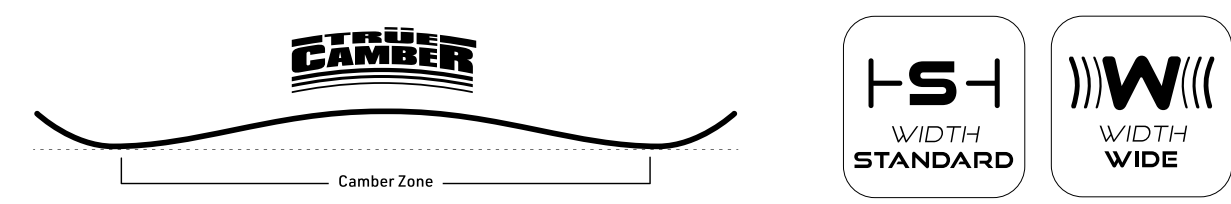

- BEST-SELLING PRO MODEL
- MOST SEEN BOARD ON SOCIAL MEDIA
- NEW SHAPE
- NEW WIDE SIZES
- PART OF THE MK COLLECTION
- MARKETING FOCUS

CHARACTERISTICS

Shape: **Directional Twin** - The best of both worlds
 Camber: **True** - Full control and pop
 Profile: **Reflex Core Profile** - Better torsional control
 Width: **Standard** - Quick response and edge control
 Width: **Wide** - All the room you need without edge-to-edge lag
 Sidecut: **Dual Degressive** - Smooth and forgiving

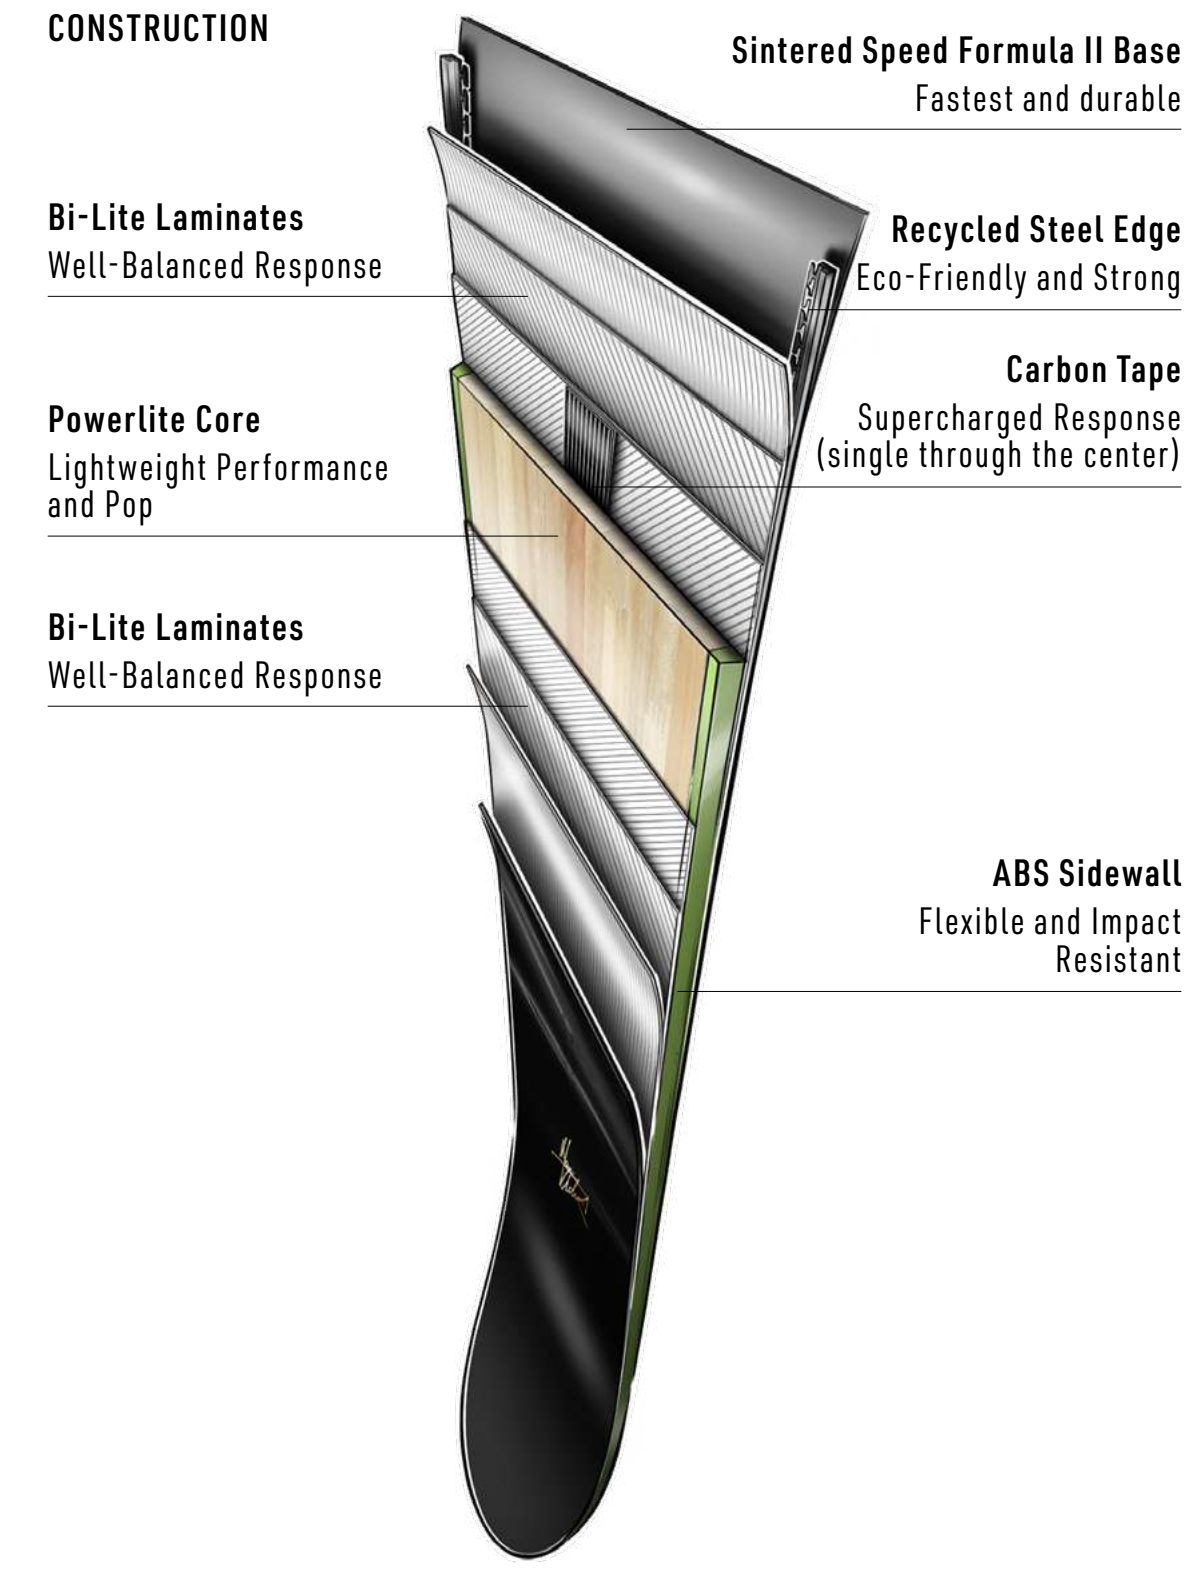

DESCRIPTION

The Team Pro is built for everyone - from weekend warriors to Marcus Kleveland level riders - looking to push their limits in the park and beyond. The new tip and tail shape provides a more classic look, but under the hood, this board is equipped with pro-caliber pop, stability, and durability to allow you to stomp your go-to tricks with ease and continue to add to your bag of tricks all season long!

„This year we updated the nose and tail shape of this board to be more rounded. For the graphics, I wanted to go for a more classic Norway vibe, so we put a fishing boat on there and a photo of the northern lights my dad took from my home in Dombås! I have never been more hyped on a board! Hope you enjoy it!“ - Marcus Kleveland

MAGNUM

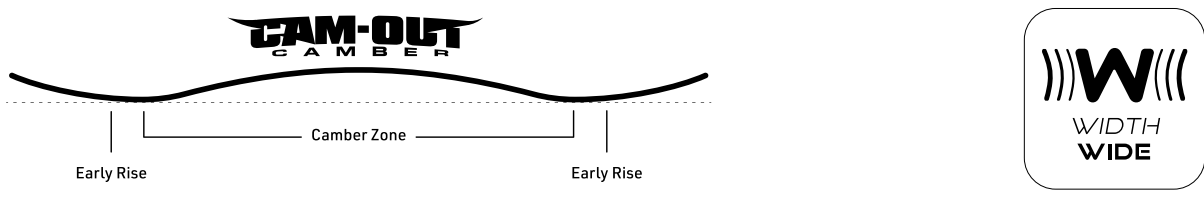

Bigger All-Mountain Performance!

- THE ORIGINAL WIDE SNOWBOARD
- SINCE 1997 - NITRO'S LONGEST-RUNNING (29 SEASONS)
- WIDE MARKET RECOGNITION
- PHOTOGRAPHY BY MARKUS ROHRBACHER

CHARACTERISTICS

- Shape: **Directional** - The most versatile all-mountain shape
- Camber: **Cam-Out** - Fun, responsive and forgiving
- Profile: **Standard Core Profile** - Even flex and control
- Width: **Wide** - All the room you need without edge-to-edge lag
- Sidecut: **Dual Degressive** - Smooth and forgiving
- Plus: **Power Pods** - Step up your carving game

DESCRIPTION

The Magnum proves that extra width doesn't have to drag you down. It is nimble, quick and responsive, with Power Pods to assist in carving, yet stable at higher speeds and floaty in the pow. Precision-engineered with a hyper focus to provide riders with larger boot sizes a smooth all-mountain ride. Snowboarding's original wide board designed to ride like a responsive directional weapon!

Indeed, when snow conditions are right, it is not unusual to find team members riding their bikes to and from the slopes!

„Here at Cinelli, we have always been passionate about nature, sport and outdoor adventures. From our home in Milan we are but an hour away from the mountains where we find our colleagues seeking adventure in Summer and Winter.

Nitro has always been one of the brands we looked at with admiration for its great design and strong private company, owner led values that we share: a focus on great product and a humble approach to business that places value on its community above short-term profits. Our collaboration really came naturally from this mutual respect and the desire to create something unique, that played to our joint love of creating great products and having fun doing so.”

– Victor M. Luis / Chairman Cinelli

PRESSURE ADR NITRO

105 disc di2

DESCRIPTION

The Pressure ADR continues to refine the design and performance developments of our aero-racer, the Pressure fine tuning it for epic, long-distance racing. The ADR in fact maintains the signature pure competition handling and feel of the Pressure, fine-tuning tube sections and carbon fiber lay-up to make it more suitable for long hours in the saddle. These engineering considerations are complemented by fully-integrated cable routing and the use of standard seatpost and fork steerer diameters, allowing the owner to easily install world-leading after market component solutions.

- Painted and assembled in Italy
- Tuned for ultimate racing comfort
- Aggressive rider position
- Integrated seatpost clamp and cable routing
- Possibility to customize build with after-market components thanks to the standard seat post and fork steerer diameters

Comes with free additional handlebar bag

HOBO GEO NITRO

Shimano Tiagra Mix 2x

DESCRIPTION

The HoboGeo is Cinelli's most advanced adventure bike ever. It has been designed to take the signature characteristics of our indestructible self-sufficient world-traveller, the original Hobo model, and tweak it for single-track, in particular technical mountain riding. Key features include flared handlebars, 6-eyelet fork, hydraulic disc brake caliper coupled with a mechanical actuator as well as a geometry that is derived from classic rigid mountainbikes. All details have been fine-tuned over a three-year testing period with our adventure ambassadors so that the bike is ready to tackle your most extreme rides straight out of the box without further modification.

- Hardtail MTB-derived geometry
- Flared handlebars
- 6-eyelet "go-anywhere" Columbus Futura Adventure fork
- adaptive geometry thanks to dual rake Columbus fork system
- Columbus Cromor double-butted steel tubing
- Max tyre clearance 29x3,0" / 27,5x3,0"
- All specs fine-tuned over a period of three years of testing

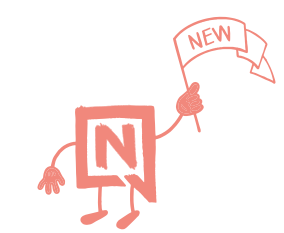

Comes with free additional handlebar bag

BEAST

BILTOFT
BERGREM
ETTALA

„Nitro for me is a place where my soul resided for a really long time. I am more than stoked to restart that feeling by doing the beast graphic“

- Artist Lukas Goller

“It truly is a perfect premium freestyle board for me. I believe it would also help any advanced rider elevate their riding levels. I rock the Beast in the streets, park, and backcountry, and it just never disappoints. This season, we got the OG Nitro rider Lukas Goller to design the board's graphics, and it looks tasty!”

I've been riding the Beast for the past eight years

- Eero Ettala

“I trust this board 100%”

with everything I do, wherever I end up riding from the park, backcountry to the streets - A true freestyle weapon!”

- Ludvig Billtoft

NITRO x
TERRY URBAN
T1

~~NITRO~~
NITRO
~~NITRO~~
TERRY
URBAN

"The T1 is a timeless board and graphic for Nitro every year! The T1 is a gonna be the freestyle park board of my choice with a nice medium flex that keeps it playful yet responsive when you need it to be. Pressing on rails, to big jumps, or even cruising the halfpipe this board can do it all!"

I grew up watching some of my favorite pros riding it and here I am today carrying the torch.

- Sam Taxwood

OPTISYM

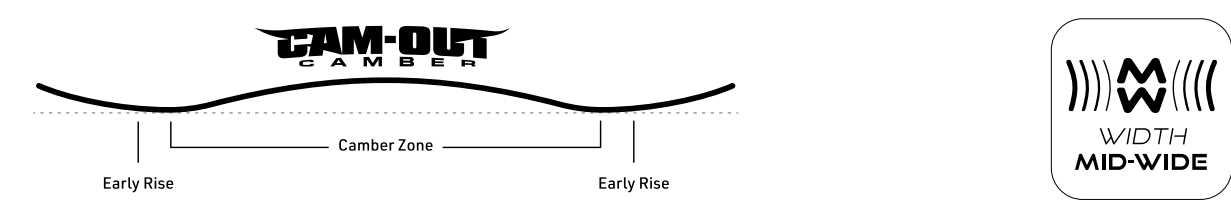

The Friendly Freestyle Snowboard

- *ASYM SHAPE*
- *OUT-OF-THE-GATE BESTSELLER*
- *UPGRADED SINTERED BASE*
- *MARKETING FOCUS*

CHARACTERISTICS

Shape: **Aysm Twin** - Effortless turns and full control
 Camber: **Cam-Out** - Fun, responsive and forgiving
 Profile: **Whiplash Core Profile** - Maximum ollie power
 Width: **Mid-Wide** - Exactly enough platform for most boot sizes
 Sidecut: **Dual Degressive** - Smooth and forgiving

DESCRIPTION

The Optisym is for all snowboarders who enjoy fun, low-impact, buttery, friendly freestyle snowboarding: Turning everything into a feature, even a groomed run or the knuckles of park landings, capable of switching from airtime tricks to flat ground tricks within seconds. This year, we have upgraded the Optisym to a Sintered Base for an even quicker, friendly freestyle experience!

"I love riding the Optisym because it offers the perfect medium flex and width for medium-speed carving, fun freestyle riding, and friendly snowboarding all over the mountain. Not too stiff, not too soft - I like a medium flexing board, and the Optisym allows me and other friendly freestyle riders to do the tricks we dream of with a sense of confidence and familiarity." - **Knut Eliassen**

CHEAP THRILLS

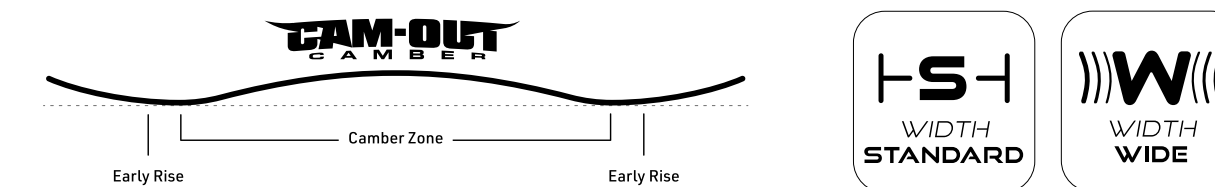

Voted Best Ride in the Park

- NEW SHAPES
- NEW CAM-OUT CAMBER
- LOWER RETAIL (NO RAILKILLER EDGE)
- RIDER: NILS ARVIDSSON

CHARACTERISTICS

Shape: **Twin** - The park and urban classic
 Camber: **Cam-Out** - Fun, responsive and forgiving
 Profile: **Whiplash Core Profile** - Maximum ollie power
 Width: **Standard** - Quick response and edge control
 Width: **Wide** - All the room you need without edge-to-edge lag
 Sidecut: **Radial** - Reliable and predictable

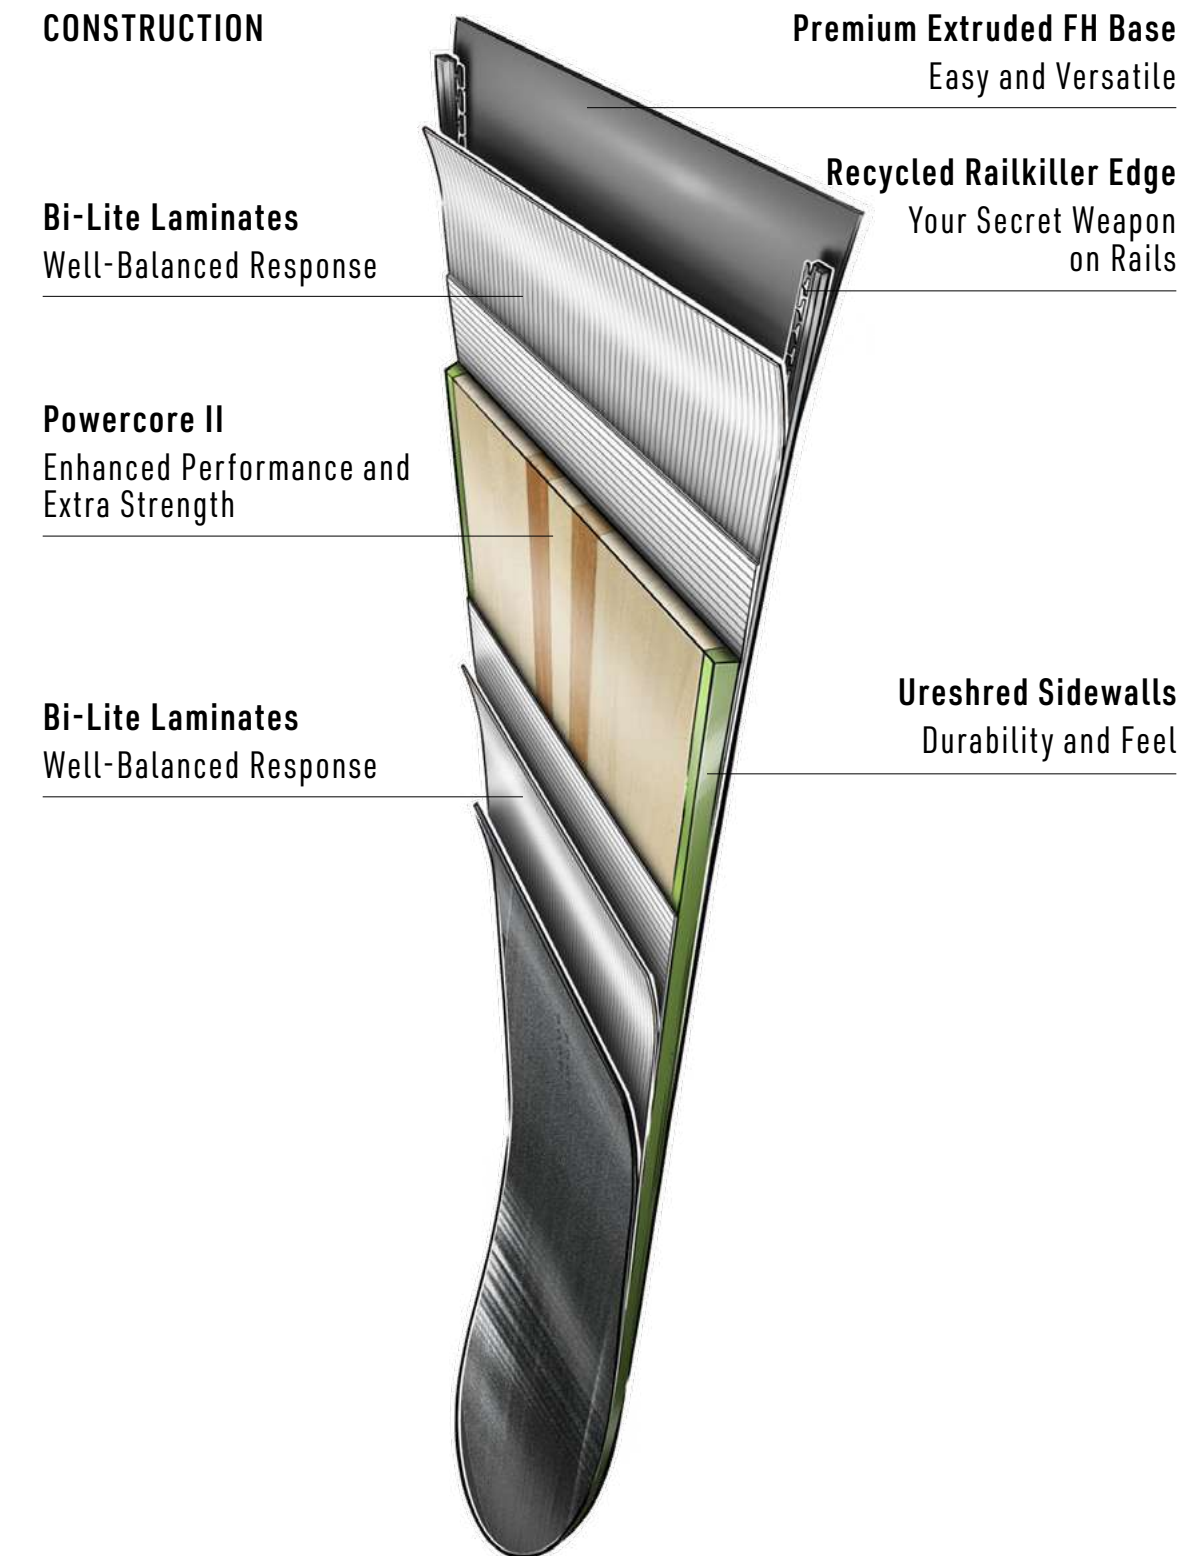

DESCRIPTION

Nitro's flagship twin freestyle deck - designed with team riders Benny Urban, Nils Arvidsson, and Dominik Wagner - has now been updated with a new shape and Cam-Out Camber for more pop. The perfect tool for rails, jumps, and transitions in and out of the park. For jibbers and daydreamers who see the mountain, park, streets, and everything in between as a blank canvas ready to be ripped!

"The Cheap Thrills is my favorite because of its playful freestyle feeling. Super fun on medium jumps, jibs, side hits, rails, and in the streets - with the pop from cam-out camber underfoot!" - Nils Arvidsson

HAUL ASS GO BIG ONE LOVE

NITRO SNOWBOARDS
ALTERNATOR
BY HAILEY
LANGLAND

"Expanding the Alternator to women's sizes is big for inclusivity and just good for snowboarding.

I believe we need more women in the backcountry,

and I hope this board can open up those doors for them. We've seen some great success from the men riding this board; now I think it's time the ladies get to show them how it's done."

- Hailey Langland

DROP

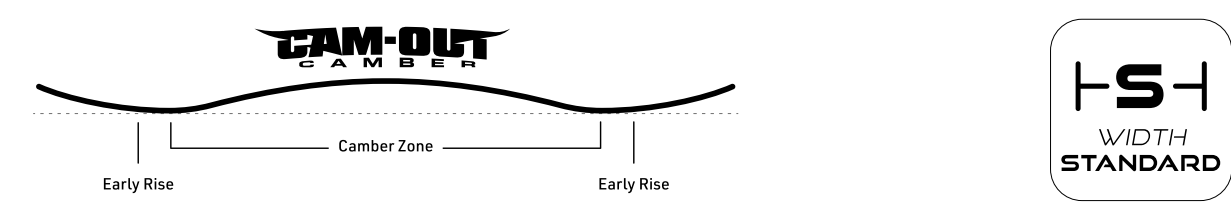

The Versatile Fun Slasher!

- SNOW DEMO FAVORITE
- POWER PODS
- CELIA PETRIG'S POW BOARD

CHARACTERISTICS

- Shape: **Directional** - The most versatile all-mountain shape
- Camber: **Cam-Out** - Fun, responsive and forgiving
- Profile: **Standard Core Profile** - Even flex and control
- Width: **Standard** - Quick response and edge control
- Sidecut: **Dual Degressive** - Smooth and forgiving
- Plus: **Power Pods** - Step up your carving game

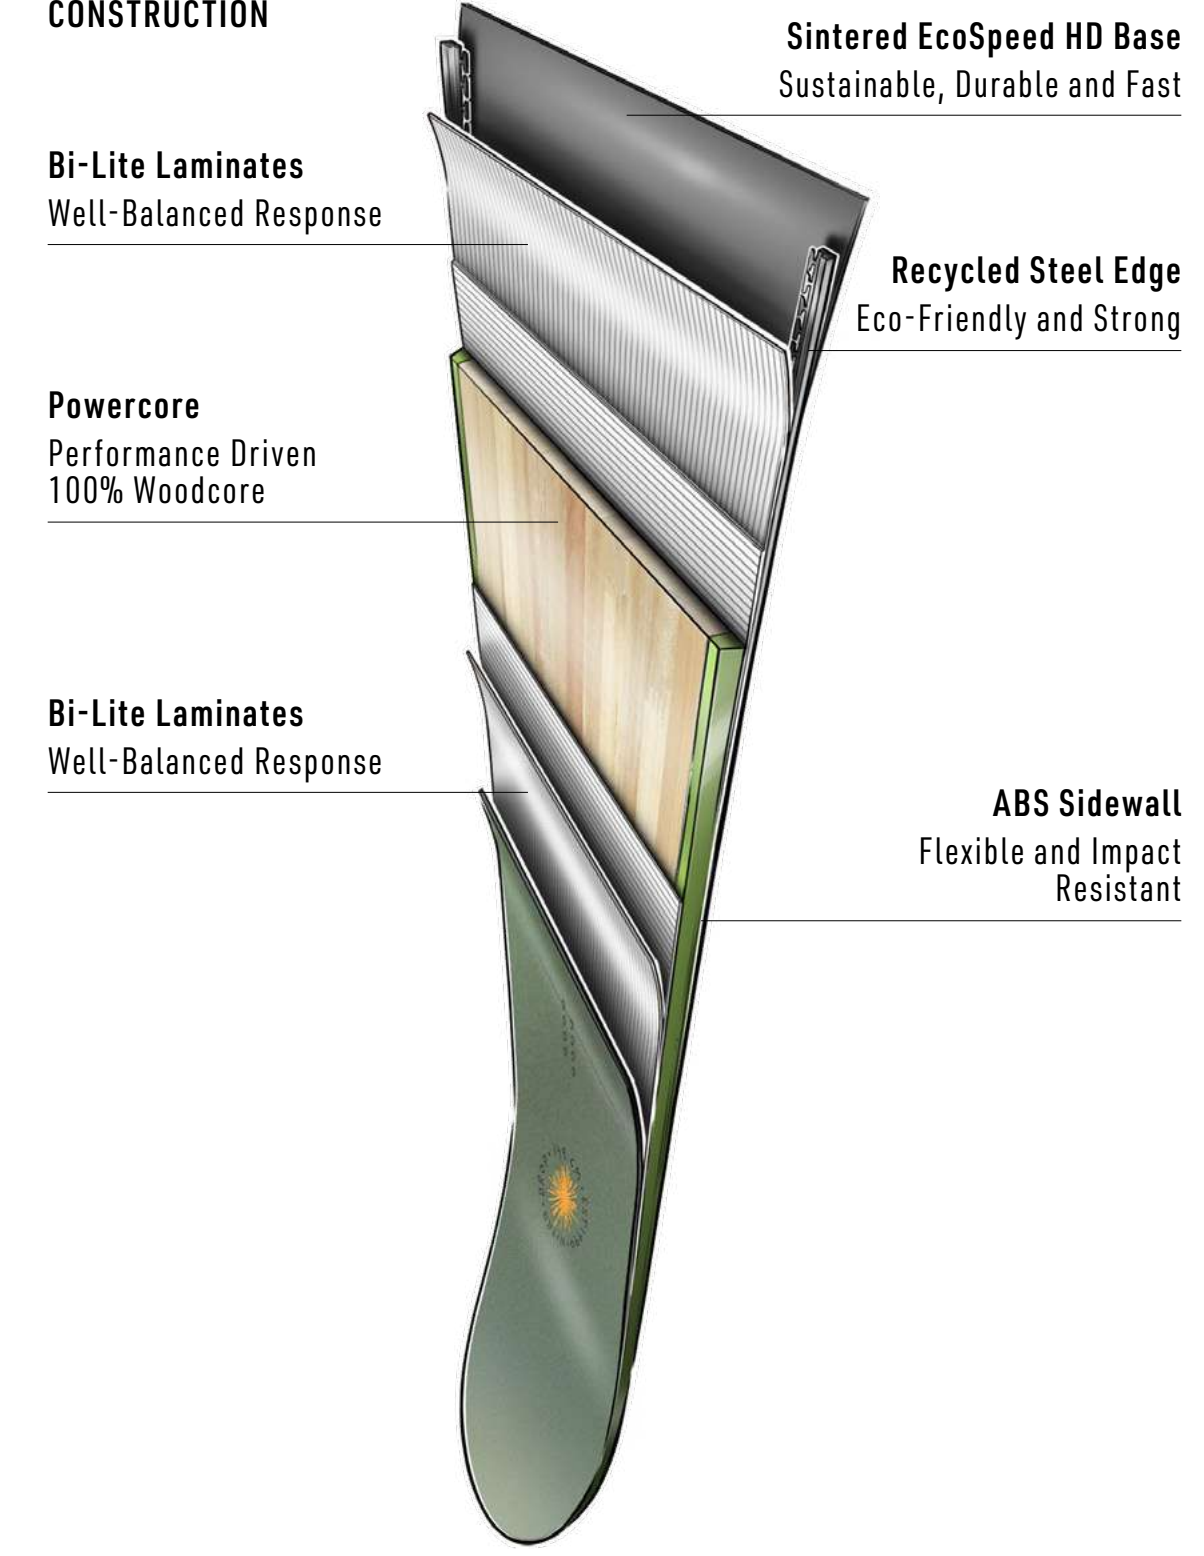

DESCRIPTION

Designed for creative boarders looking to surf the whole mountain with its versatile, fun, and directional pow shape, the Drop offers reliable edge hold and forgiving catch-free contact points to help you quickly evolve your style and technique. The snowboard philosophy with the Drop under your feet is simple - a versatile shape, more volume, less stress, and more fun on any type of terrain.

„The Drop speaks for itself. Its effortless float in the powder, combined with a precise and quick snap to do slashes, tight and perfect turns on fresh groomers, or just navigating yourself through sneaky tree runs, is unique. The beautiful artwork and very versatile shape make it my top choice for everyday cruising.“ - **Celia Petrig**

LECTRA LEAF

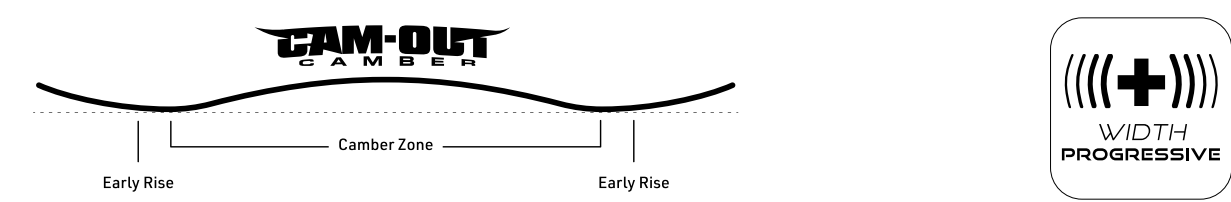

The Fun Machine!

- BEST-SELLING ENTRY-LEVEL MODEL
- SINCE 2008 – CONSTANTLY UPDATED
- 2 GRAPHICS WITH ALTERNATING 2-YEAR CYCLES

CHARACTERISTICS

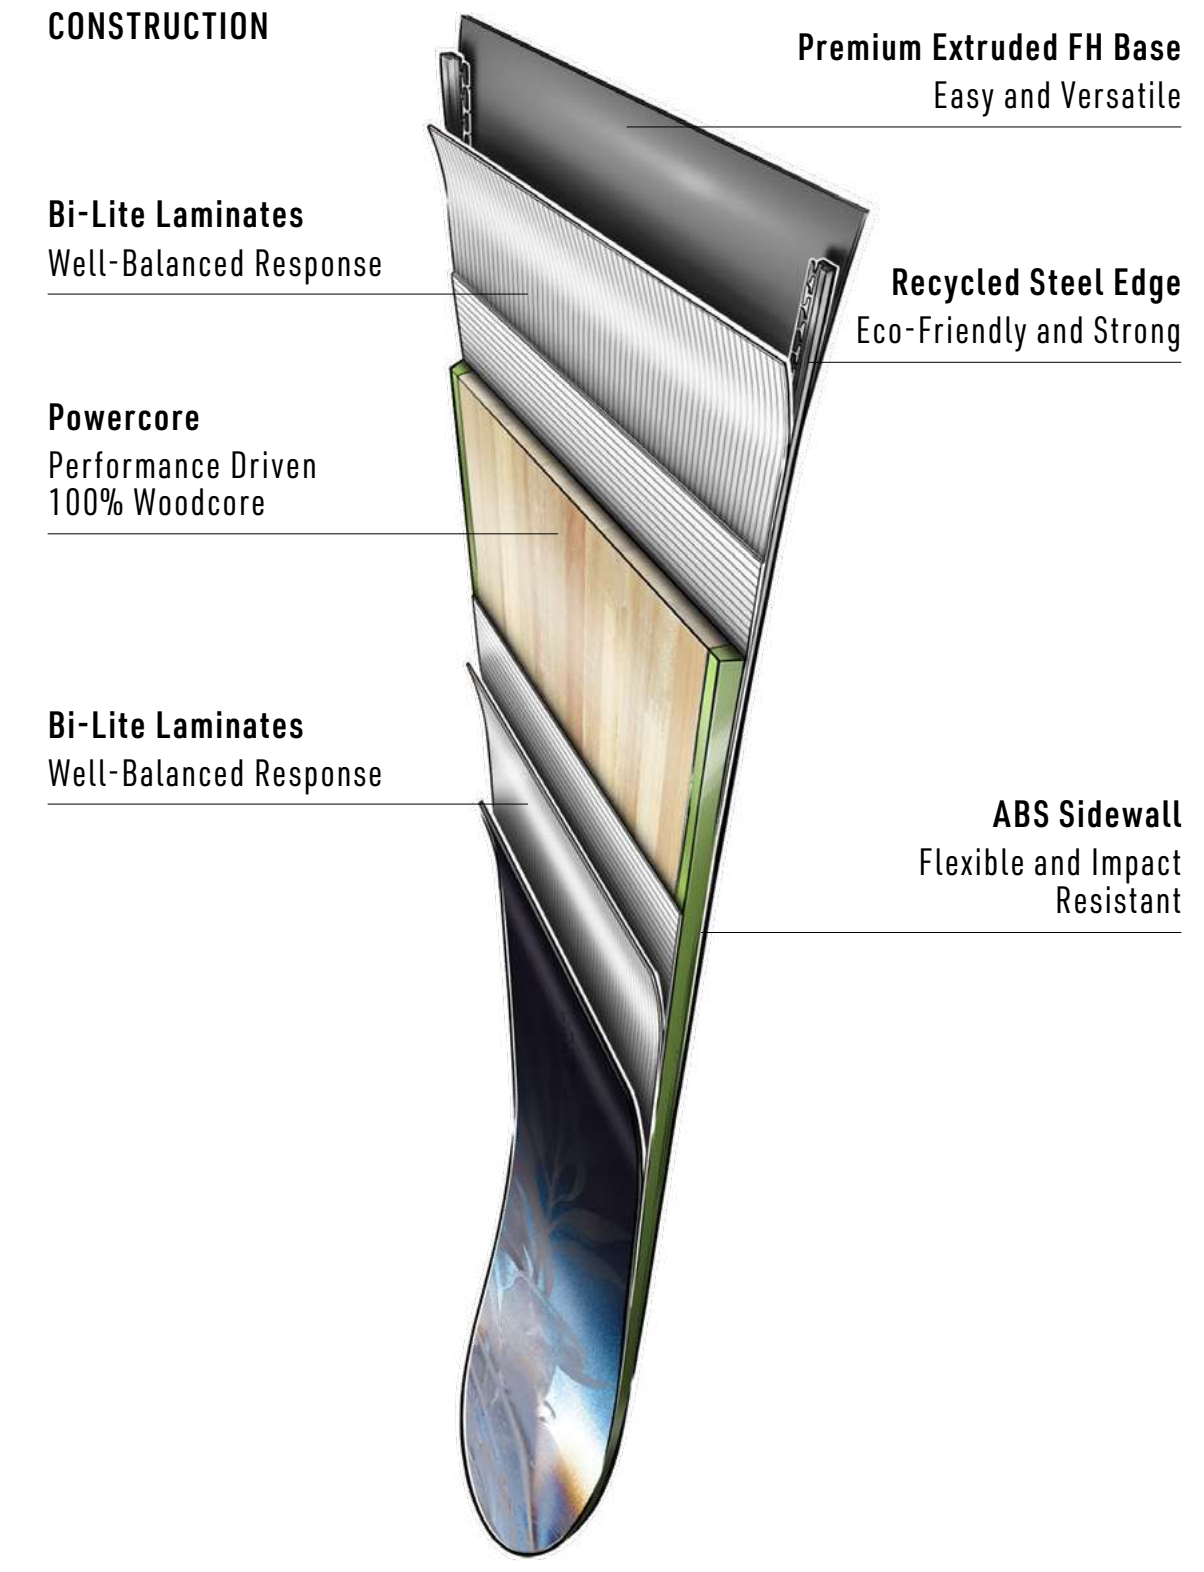

Shape: **Directional Twin** - The best of both worlds
 Camber: **Cam-Out** - Fun, responsive and forgiving
 Profile: **Standard Core Profile** - Even flex and control
 Width: **Progressive** - Perfect length-to-width match
 Sidecut: **Radial** - Reliable and predictable

DESCRIPTION

The Lectra offers the supportive yet relaxed ride you have dreamed of. Its progression-friendly and catch-free all-terrain design make it easy to transition from linking your first turns, to butters in the fun park, all the way to navigating the expert runs from the summit to the lodge with style and confidence. The affordable fun all-mountain board!

WOMEN'S

PARK

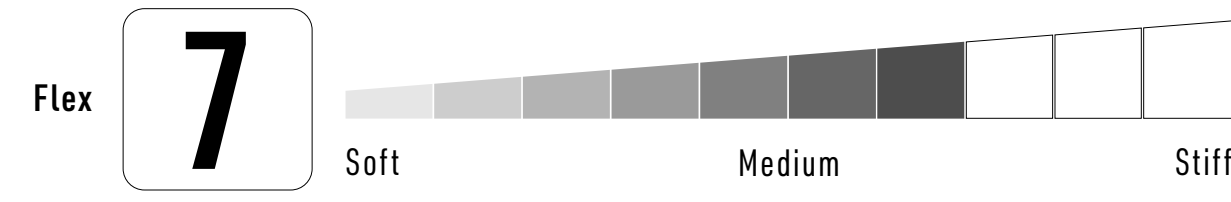

BEAUTY

No Limit Freestyle Powerhouse

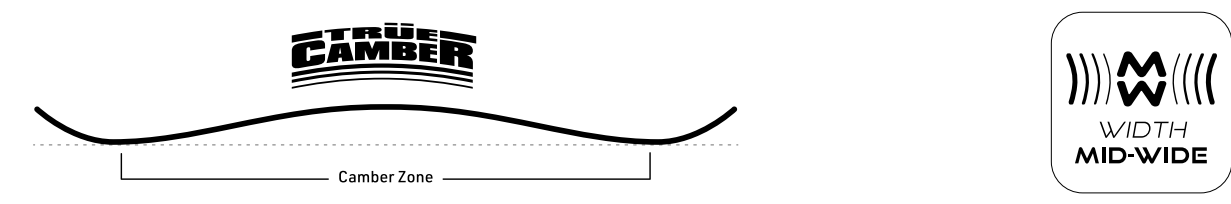

- MOST PROGRESSIVE WOMEN'S PARK BOARD
- PRO SHOP SPECIAL
- DEVELOPED WITH LAURIE BLOUIN, COOL WAKUSHIMA, MIYABI ONITSUKA

CHARACTERISTICS

- Shape: **Twin** - The park and urban classic
- Camber: **True** - Full control and pop
- Profile: **Whiplash Core Profile** - Maximum ollie power
- Width: **Mid-Wide** - Exactly enough platform for most boot sizes
- Sidecut: **Radial** - Reliable and predictable

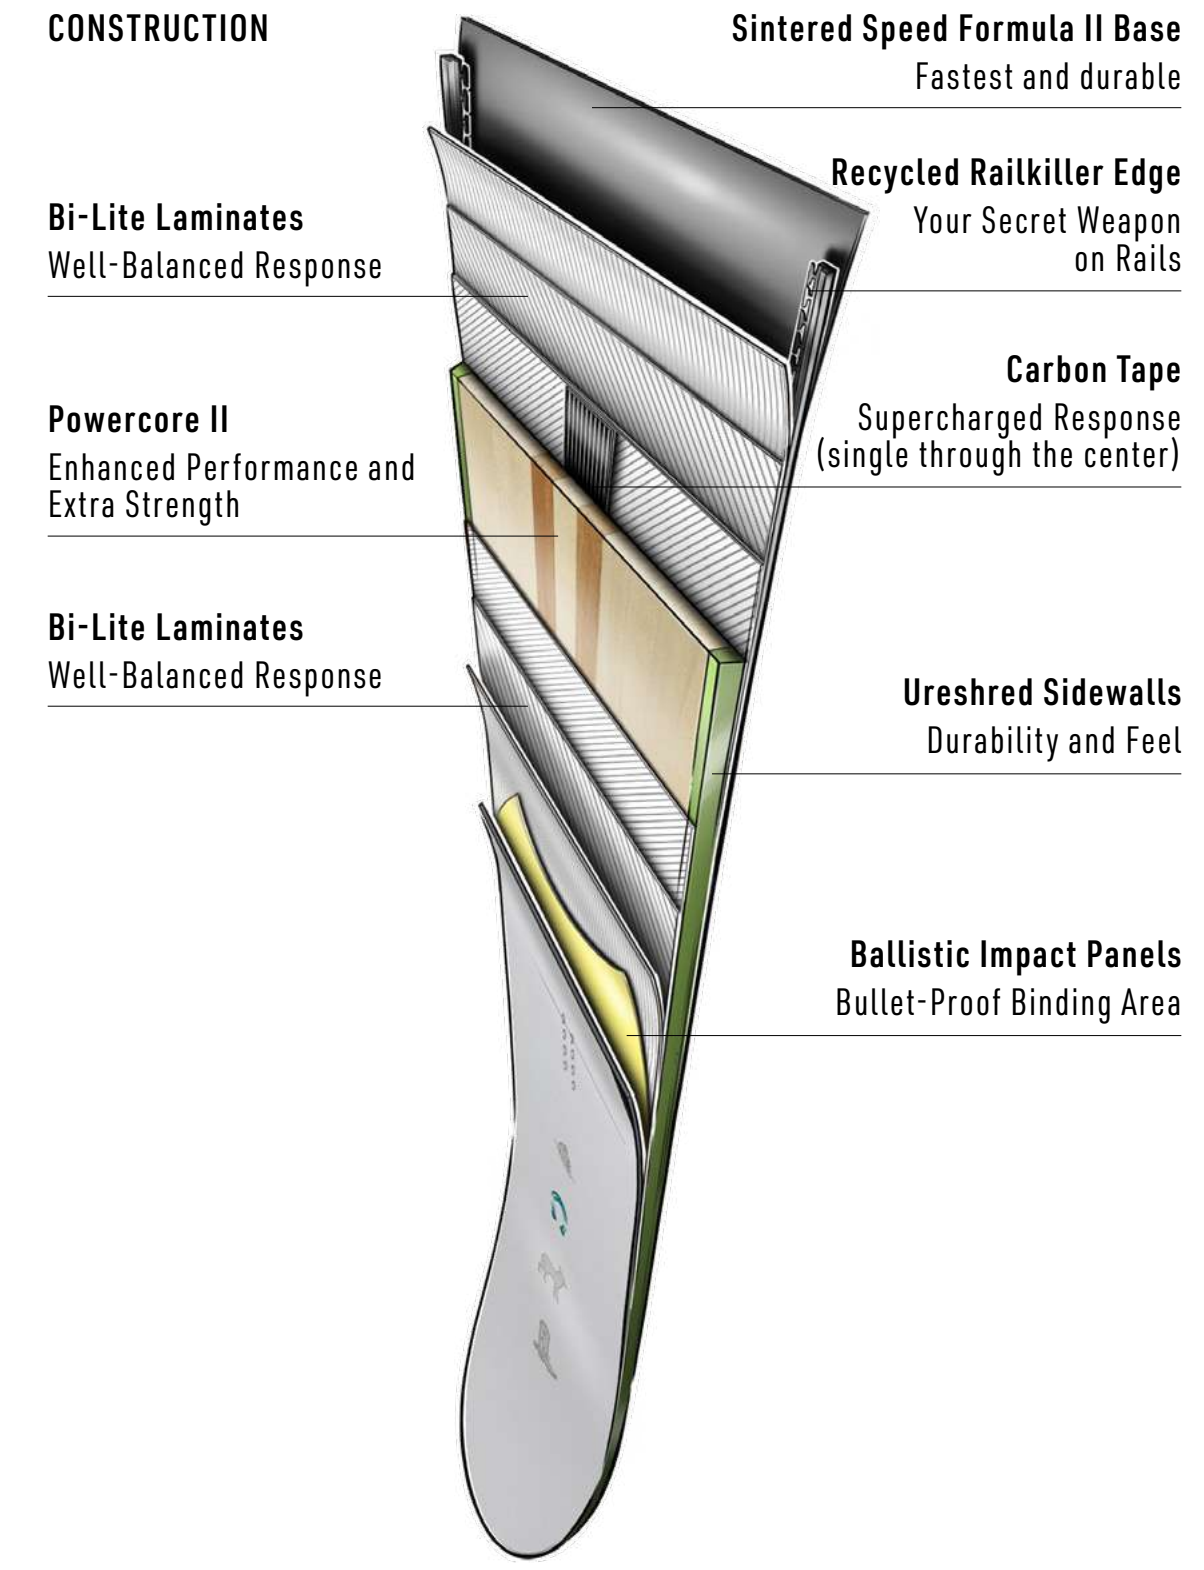

DESCRIPTION

The freestyle-focused Beauty is the brainchild of top female snowboarders today - Laurie Blouin, Cool Wakushima, Miyabi Onitsuka, and the Nitro Team. Designed to offer a badass True Camber ride for high-speed stability with a flex forgiving enough to press and add your unique personal style to each trick. Built to accommodate the progression of experienced park rippers to take snowboarding to the next level.

"The Beauty is perfect if you like a camber, responsive board that is built with the durability to last long park days. I really love the new badass cowgirl design because it reflects how badass women are with a touch of Western." - Laurie Blouin

O P T I S Y M

NITRO MERCY

Ager

„Hailing from Vancouver, Canada, I grew up boarding Mount Seymour and Blackcomb Mountain in the 90s. You could say I was spoiled, spending every possible moment playing on these mountains with my best friends, but it wasn't until returning from a decade living in Barcelona, Amsterdam and Lisbon that I truly appreciate how damn lucky I am to call this part of the world home and to consider these mountains my church. The Mercy graphic brings together my love of snowboarding, my artistic practice of delving into the darker sides of life and love, and the playfulness that I love to bring to both.“

– Kathy Ager

Working with Nitro on the Mercy board graphic has been a long-time dream come true.

RIPPER X VOLCOM

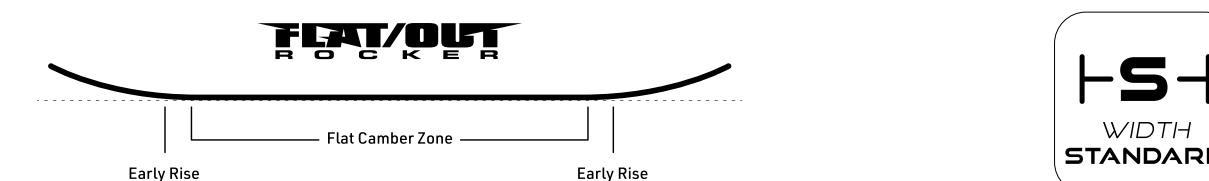

The All-Mountain Fun Maker!

- NEW WIDER SHAPES ON SIZES 116-137
- SOFTRIDE ON SIZES 86-126
- EXCLUSIVE VOLCOM COLLAB
- MARKETING FOCUS
- PERFECT NEW BINDING SIZE MATCH
- MATCHING BOOTS

CHARACTERISTICS

Shape: **Twin** - The park and urban classic
 Rocker: **Flat-Out** - Float, pressability and forgiveness
 Width: **Standard** - Quick response and edge control
 Sidecut: **Radial** - Reliable and predictable
 Plus: **Softride (86-126)** - Maximum Flex for Mini Boards

DESCRIPTION

The Ripper is specifically designed to make snowboarding more accessible and to get more kids excited about being outdoors and having fun! It features a new length-to-width ratio and a catch-free shape that perfectly matches the young ripper's boot size, with special attention to a soft and weight-adapted flex pattern, helping young shredders to progress at their own pace.

"The Ripper x Volcom collaboration is a match made in heaven - two brands that stand behind getting more kids out snowboarding and supporting the snowboard community for decades in hopes of having the new generation do the same!" - Seth Hout (Volcom Team Manager & Pro Rider)

SPLITBOARDING

Nitro has been dedicated to splitboarding for over three decades – sparked by our own passion and the need to get to the untouched powder up in the distance. Today, we offer complete splitboard set-ups for every type of rider or terrain, allowing the backcountry community to get all their gear from one source with the trusted Nitro approval and technology. We want to make the splitboarding experience as effortless and rewarding as possible, and it all starts with creating a set-up fit for your needs and budget:

- Custom-fitted climbing skins made by KOHLA with a quick-fit mounting interface are available for all Nitro Splitboard models and sizes.
- Our Vertical Bindings, based on Spark's leading split binding platform, customized with our own parts for a typical Nitro feel
- The Vertical splitboarding boot, specifically designed for the needs of climbing and riding, that continues to set the industry standard.
- Different styles of collapsible/telescoping poles as well as splitboard-specific backpacks complete our comprehensive backcountry offering.

MEN'S SPLITBOARDING

VERTICAL

The Uphill Speed Machine

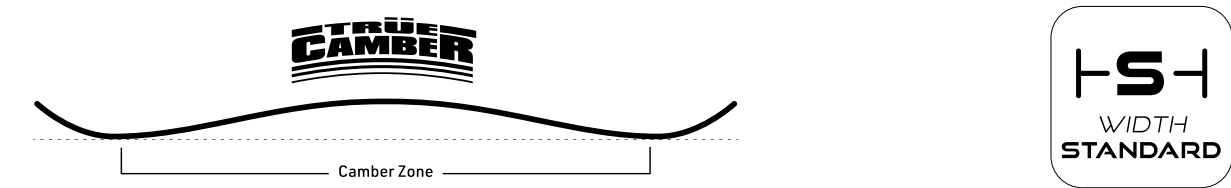

- NITRO'S MOST TECHNICAL SPLITBOARD
- OPTIMIZED FOR UPHILL PERFORMANCE
- LIGHTWEIGHT CARBON/KOROYD® CONSTRUCTION
- COMPLETE ACCESSORY OFFERING

CHARACTERISTICS

Uphill Performance	Technical Terrain	Powder
10 / 10	10 / 10	9 / 10

- Shape: **Directional Split** - The most versatile all-mountain shape
- Camber: **True** - Hiking control and riding response
- Profile: **SplitGrip Core Profile** - Better uphill performance
- Width: **Standard** - Quick response and edge control
- Sidecut: **Progressive** - Powerful turns and a catch-free nose
- Plus: **Hike Pods** - Adding edge grip in icy traverses

DESCRIPTION

Built for demanding alpinists and high-altitude terrain, the Vertical adheres to a design philosophy of minimum weight and reduced materials for increased uphill performance. As a true Nitro board, it is at the same time offering the floaty, responsive, and fun ride we are known for. The board's narrow outline significantly improves tracking, traversing, and climbing speed even under challenging conditions.

ALTERNATOR SPLIT

NITRO
ALTERNATOR SPLIT

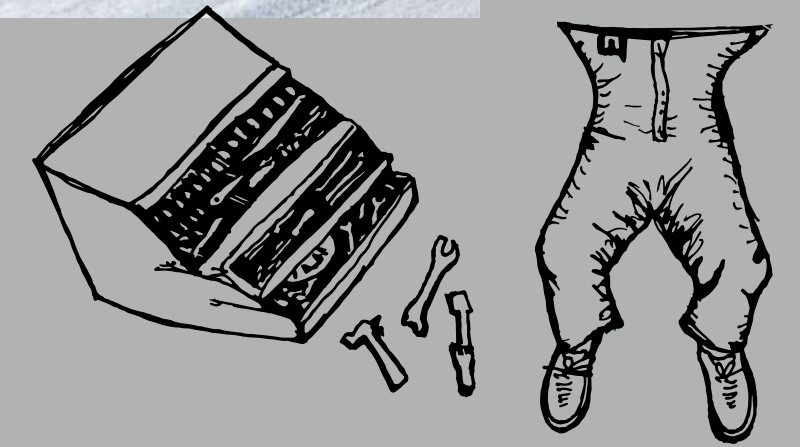

DESIGNED BY
GRIFFIN SIEBERT

What more can you ask for:)

"The Alternator is now also a splitboard! So, if you have been eyeing that cliff drop at your local touring run, and you have always dreamed of tossing a cab 5 to impress your friends. This is the split board for you, can get you anywhere, and can go full freestyle. Haul Ass, Go Big, One Love."

- Griffin Siebert

SPLITBOARDING ACCESSORIES

NITRO X KOHLA SKIN ATTACHMENT SYSTEM

Designed specifically for our perfectly matched Kohla skins, the Nitro x Kohla Skin Attachment system makes attaching and removing your skins a breeze and will keep your skins where they belong – no matter what the snow conditions.

-  made in Austria / produziert in Österreich
-  trim to fit / zuschneidbar
-  100% waterproof / 100% wasserfest
KOHLA Fiber Seal Technology
-  solvent free / lösemittelfrei
-  water resistant / wasserfest
-  easy handling / leichte Handhabung
-  easy release / leichtes Auseinanderziehen
Smart Glue Adhesion

NITRO X KOHLA VERTICAL SKINS

Vertical skins are tailored for high performance thru Kohla's new Fiber Seal and Smart Glue technologies. Fiber Seal prevents the skin from absorbing water to maintain light weight and good grip in changing conditions. Smart Glue is a solvent-free adhesive with better bonding in wet or cold conditions yet easier to release than traditional hot-melt skins. The Vertical skins are pre-cut to fit the specific splitboard model and come with metal speed hooks on both ends, matching the mounting holes in the board's tip and tail, to set up perfectly aligned in just seconds. Kohla skins are quality "made in Austria" and constructed of a 65% Mohair/35%Nylon fiber mix.

NITRO X KOHLA PEAK SKINS

The Peak skins are pre-cut to fit the specific splitboard model and come with metal speed hooks on both ends, matching the mounting holes in the board's tip and tail, to set up perfectly aligned in just seconds. Kohla skins are quality "made in Austria" and constructed of a 65% Mohair/35%Nylon fiber mix and Hot-Melt glue technology.

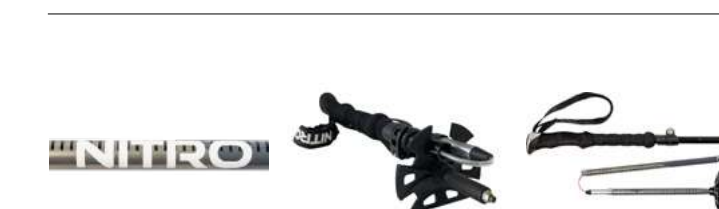

BINDING CRAMPONS

SPARK R&D Crampons are 4WD for your splitboard.. Constructed of lightweight aluminum for max strength and minimum weight. Installation and removal is effortless and can be done on the fly without unstrapping in just seconds.

Crampons are available in 3 sizes, NARROW for boards with a waist width up to 25cm, REGULAR for boards with a waist width of up to 26,6 cm, and LARGE for all boards wider than 26,6 cm

FOLDABLE POLES

- 4-piece collapsible construction
- Aluminum Tubing
- Size adjustable: 115-135cm
- Folded length: 40-37cm
- Aluminum Adjuster Lock
- Weight: 600g per pair
- Long foam handles for easier traversing
- Comes with lightweight nylon storage bag
- packing size 37cm

TELESCOPING POLES

- Telescoping construction
- Carbon fiber and aluminum tubing
- Size adjustable 65-140cm
- Aluminum Adjuster Lock
- Long foam handles for easier traversing
- Weight : less than 500g per pair
- Minimum length: 65cm (can be fixed in the proper backpack strap location)
- Comes with lightweight nylon storage bag

BUCKLE UP!

THE NITRO BINDING COLLECTION

With 35 years of experience designing snowboards, boots, and bindings under one roof, we have engineered an interface to seamlessly transfer a rider's input to the board's edge. The shape of our highbacks is designed to match the contour of our boots perfectly, while the ankle straps and toe straps provide support and outline the boot's flex.

A binding's task is delivering maximum control and instant response, absorbing impacts, and eliminating vibrations, such as heel chatter, for a smooth and comfortable ride. Every model in our line is built around a rider and a riding style in mind, leading to different shapes and flex patterns of highbacks, baseplates, or straps.

ENVIRONMENTAL RESPONSIBILITY

CURRENT BINDING CO² FINGERPRINTS

Production of 1,4 kg Beef

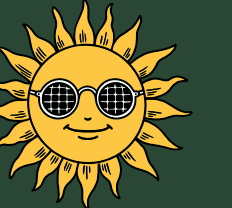

FURTHER CO² REDUCTION INITIATIVES

Transparency is critical regarding environmental responsibilities, and it is essential to invest in knowing and showing the CO² output for each Nitro snowboard binding. Over decades of building bindings, we know binding manufacturing is not perfect and impacts the environment. Therefore, we continuously look for new ways to improve all aspects of the bindings' lifecycle.

We are investigating new ways of compensating our carbon footprint for our total binding production. We are working on solutions to reduce our environmental impact through materials, processes, timing, durability, and extending the product usage time.

Our commitment to sustainability is evident in our production methods. Our bindings are manufactured using a nearly zero-waste plastic injection process at a factory that operates on hundred percent solar power.

This journey has and will lead to failures and significant steps forward in creating stronger and more sustainable bindings. We are thrilled about the future and the progress we will make. We hope you'll buckle up and join us on this exciting snowboarding journey together.

FATE

The Legendary All-Mountain Binding

„The Fate binding provides the perfect balance between control and freedom, which enables me to have a very controlled, playful kind of riding feeling.

This year, I was fortunate enough to make my own colorway on the Fate. I was experimenting with different acrylic pouring techniques and wanted to create a free-flowing, vibrant, and loud design that fades into the simplicity of the blank silhouette of the binding. Some colorful details to give it the extra spark while riding!”

– Celia Petrig

Celia Petrig

The Fate binding has been my go-to for many, many years

HOLY FIT

THE NITRO BOOTS COLLECTION

THE "HOLY FIT" - BUILT FROM THE INSIDE OUT

Boots are the most 'personal' piece of snowboarding equipment. They connect body to board, man to machine. And they are a hybrid of soft- and hardgoods, often primarily judged by optical appearance.

We love snowboard boots, and we spend endless hours discussing, prototyping and testing everything from small incremental improvements to radical innovations. Always with a focus to make your (and our!) days in the snow as fun and comfortable as possible. So, check them out at your local shop and try on a pair or two - you won't regret it.

TECH HIGHLIGHTS

TLS⁺

TLS+ TWIN LACING SYSTEM

Nitro's latest zonal speed lacing system features a redesigned locking cleat without moving parts. Combined with a specifically developed high-tech Dyneema[®] lace and new lace loops, it offers the ultimate pro-level fit, lockdown, and foothold. The simplistic power of just pulling up two handles control the top and bottom section of the boot for custom and zonal adjustment.

**RE/
LACE**
LINER LOCKER

Patented Re/Lace Liner Locker

The patented Re/Lace Liner Locker provides a secure closure, allowing for easy tightening of your liner by simply pulling up on the lace handle – even when your boot shell is already tied. This allows you to (re)tighten your liner and foothold throughout the day (wherever you may find yourself on the mountain) without having to untie your boots shell lacing system.

ORTHOLITE[®] O-THERM[™]

Together with OrthoLite[®], the World's leading supplier of open-cell foam insole technology, we have developed this triple density footbed for support and comfort: OrthoLite[®] O-Therm[™] is the superior thermal barrier that is measurably more effective at blocking cold and heat underfoot than conventional insole technologies. In the forefoot area, we are using OrthoLite[®] Imperial[™] Foam, to create a thin yet highly effective cushioning zone for the ball of your foot. The third component to this high-tech footbed is a frame molded from OrthoLite[®] Recycled[™] material. Made from 98% of post-production recycled material, this structure gives your foot the support needed for a fun day on the mountain without tired feet.

DUAL HIGH POWER BOA[®] FIT SYSTEM

High power and high capacity, the BOA[®] Fit System featuring Dual Dial H4 delivers micro-adjustable precision fit with a 4:1 mechanical advantage. BOA[®] Fit System featuring H4 dial is built to withstand impact in the park, backcountry, and everything in between. The Coiler[™] on the tongue dial increases the speed of entry into the product by quickly taking up lace slack. BOA[®] dials and laces are guaranteed for the lifetime of the product on which it is integrated.

VIBRAM[®] OUTSOLE MADE OF ICETREK COMPOUND

Vibram Ictrek is the compound dedicated to winter conditions, engineered for low to medium temperatures, which features superior grip on ice, snow and cold terrain.

VIBRAM[®] ARCTIC GRIP TECHNOLOGY

Vibram has always researched new solutions that respect the environment, therefore has developed eco-compound, Ecostep Recycle, generated by the production process, made with a minimum of 30% recycled Vibram rubber. An innovative combination of sustainability and performance, which provides added durability and improved grip on wet and dry surfaces.

D3O[®] TECHNOLOGY

D3O[®] is a smart material that moves slowly and increases comfort when in a normal state. But when shock or impact is increased, it absorbs and disperses energy, before instantly returning to its flexible state. Intelligent comfort!

ENDURE[®] GRAVITY FOAM TOE PROTECTION

The toe is protected by Endure[®] Gravity Foam to withstand the toughest and most demanding outdoor conditions. Highly durable and up to 50% lighter than rubber, Endure[®] is the best sustainable alternative to rubber. It is derived from recycled pre-consumer sources and is 100% recyclable at the end of life.

AIR DAMPENING

The best shock absorbing technology on the planet sucks up hard landings and keeps your heels from getting bruised and, unlike other technologies, functions virtually independent from temperature. This noticeable difference in ride and comfort does not compromise response or control. More overall comfort by absorbing impact from deep landings or choppy snow conditions – allowing you to go faster and deeper all day!

TEAM PRO MK^{TLS}

110% Freestyle Performance - by Marcus Kleveland

- NEW SPEED GAITER
- ARMORED SHELL
- POWER STRAP
- POWER SHELL TONGUE
- ENDURE® GRAVITY FOAM TOE

DESCRIPTION

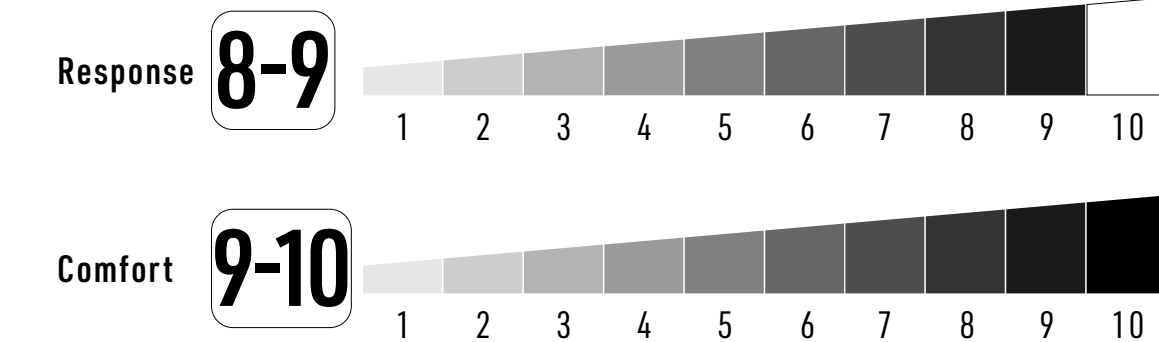

The new and improved Nitro Team Pro MK is a boot designed for riders who want customizable, responsive freestyle performance without being "too" stiff, while providing a confident foothold for pushing your tricks to the limit. Built for and by Marcus Kleveland, it offers all the features he's looking for during park sessions or backcountry exploration!

"My pro model boot has an extra Power Strap on the top to allow your feet to get a next-level tight and responsive fit. I can't ride with soft boots, so I need them as responsive and tight as possible without sacrificing comfortable and cushy support around my ankles. I can't wait for it to snow to put these back on again!" - **Marcus Kleveland**

FEATURES

- **Vibram® Outsole made of Ecostep Compound** - Made from a minimum of 30% of recycled rubber
- **EVA Midsole** - Comfort and thermal insulation

TEAM TONY

In memory of our fellow Nitro Family member Tony Sandoval!

"With the Desert colorway, we're honoring the life and work of Tony Sandoval, Nitro Family member and artist, who designed generations of Team boot styles, including the current one. Tony was born and raised in Utah, before moving to Seattle where he attended Seattle Art Institute and ultimately joined Nitro. He enjoyed the arts growing up and thrived in art classes throughout his youth, this is why from each of these boots sold, we will make a donation to support art programs in Utah and Washington schools, a project that meant a lot to Tony."

- Tommy Delago

MEN'S

TEAM TLS | BOA DIALED IN. PRECISION FIT. | LACE

The #1 Versatile Fit In Snowboarding

- MOST ICONIC NITRO BOOT
- UNIVERSAL FIT AND FLEX
- NEW WIDE VERSION
- DESERT COLORWAY IN MEMORY OF TONY SANDOVAL
- RIDERS: EERO ETTALA, YUTO YAMADA, JORDAN MORSE, KNUT ELIASSEN, MATEO MASSATI

DESCRIPTION

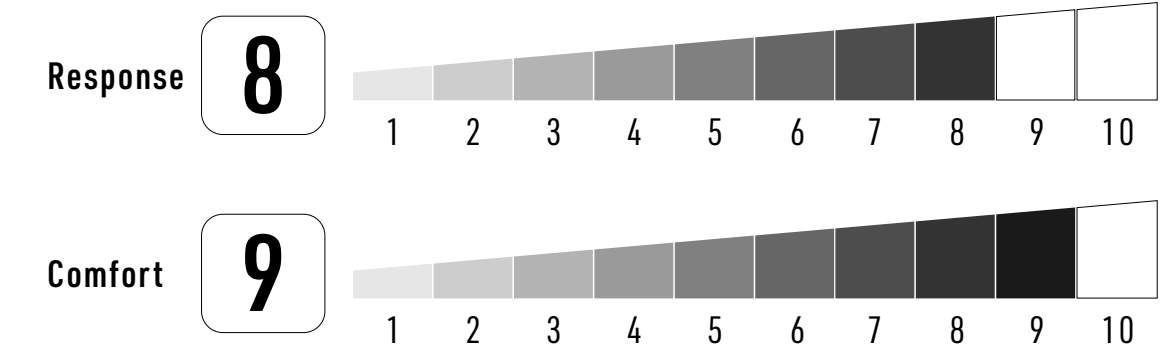

If you're searching for a comfortable all-mountain boot with a familiar fit, excellent support, proven durability, and backing from top snowboarders, try on a pair of Team boots. You'll experience the comfortable fit right out of the box, versatile flex, and proven performance and durability all season long. It's the most celebrated and award-winning snowboard boot for a reason, and now also available in a wider fitting version.

"The Nitro Team TLS boot has been my go-to boot for more than 10 years. It feels comfortable from the very first day on and lasts a long time, even in the extreme use I put it through. I've been rocking mine for two full seasons, and they're still in prime condition. The Team boot has the perfect flex for riding on all types of terrain." - Eero Ettala

FEATURES
