FASE
FAST ENTRY SYSTEM

RIDER DRIVEN BINDINGS

FASE: Engineered to own every line, the T32M FASE binding locks you in from pow to park. With unrivaled support, mind-bending flex, and uncompromising durability, it's built for the ultimate ride — every single time. As for boot-to-binding connection? Meet your new teammate.

AUTOBACK

The key to the revolutionary FAST Entry System, the AutoBack allows for hands-free entry to the binding. This intuitive design automatically closes as the boot enters the binding and opens when it's time to unstrap. The AutoBack also folds flat for skating, chairlifts, and storage.

FASTSTRAP

An innovative long ankle ladder that remains connected for ultra-fast, one-handed strapping-in. With a classic ratchet design to fine tune ankle strap tension, the FastStrap complements the AutoBack's automatic closure system so riders can strap-in faster than ever before.

LOCKED-IN TOE STRAP

Simply set it and forget it. Designed to remain in position to complement the Fast Entry System. The Locking Slap Ratchet 2.0 and unique tri-toothed ladders keep the strap in position for fast entry and exit, with easy on-the-fly adjustments.

DURABILITY

Seven years of testing resulting in a 'mountain-proof' design, engineered for any terrain and all conditions. FASE Fast Entry Systems offers a lifetime warranty on system specific parts.

USER FRIENDLY

An intuitive design with the classic two-strap interaction method as traditional two-strap bindings. The AutoBack functionality, combined with the convenience of the Locked-In Toe Strap, optimizes easy, one-handed strapping in whether stationary or on the go.
