L1 isn't just another outerwear brand; it's part of snowboarding's DNA. In a time when so many brands are owned by holding groups and disconnected from the culture, L1 stands as a rider-founded, culture-driven brand that gives back to the ecosystem that raised it.

We support the shops that support us. We tell the stories that define snowboarding. We invest in riders, creatives, and the next generation. We build products with intention, timeless style, and functional use for snowboarders.

L1 is rider-founded and culture-driven, built by snowboarders for snowboarders. We back the shops, riders, creatives, and events that keep snowboarding authentic. We design with intent, making premium technical gear with timeless style and functional fit. This isn't just outerwear. It's a commitment to defending the culture of snowboarding.

For our distributors, sales reps, and employees, this is more than a product line; it's a movement worth backing. L1 delivers premium technical gear while staying true to snowboarding's core. We're here to grow with you, support your doors, and continue building a more sustainable, authentic snowboarding community.

OUTERWEAR OVERVIEW

Defend the Culture

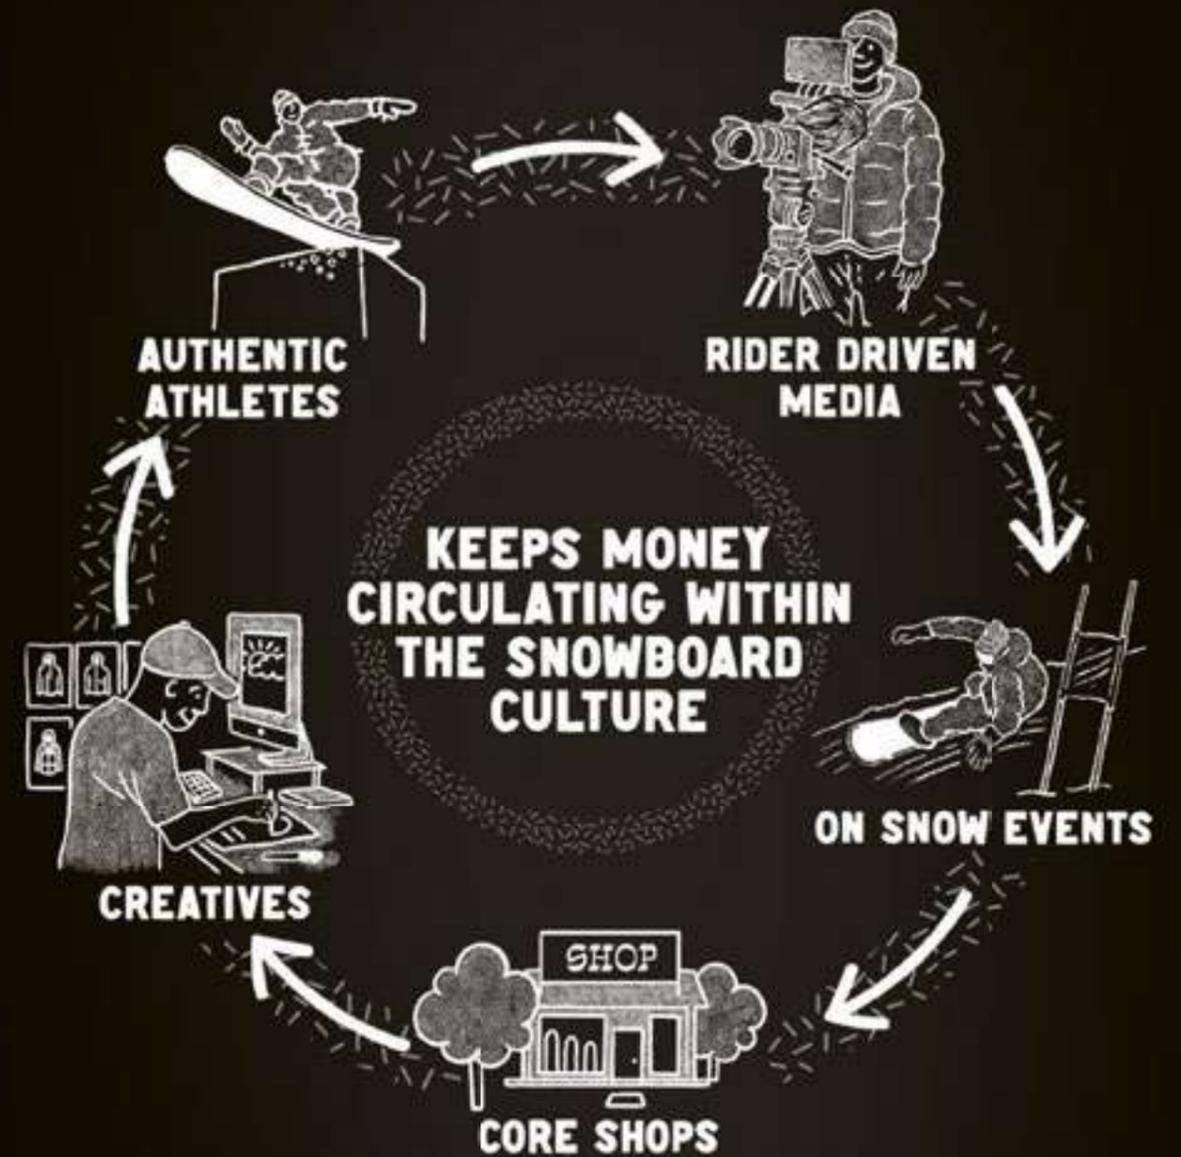

WHY SUPPORTING SNOWBOARD- OWNED BRANDS MATTERS

Where you place your buy matters. Too many outerwear brands are controlled by holding groups that pull profits out of snowboarding and discount heavily mid-season, undercutting your margins and hurting your business.

L1 does it differently. We're snowboard-owned and rider-run. We manufacture to order, preventing overproduction and protecting in-season sales. Every dollar you invest with us stays in the culture, funding marketing to drive customers to your doors, supporting authentic riders, and backing events that grow our shared audience.

When you choose L1, you're partnering with a brand that protects your bottom line while defending the culture we all depend on.

WHY SUPPORTING SNOWBOARDER-OWNED BRANDS MATTERS

WHEN YOU CHOOSE L1, YOU ARE PARTNERING WITH A BRAND THAT PROTECTS YOUR BOTTOM LINE WHILE DEFENDING THE CULTURE WE ALL DEPEND ON.

The L1 Premium Outerwear Team

Team

PURPOSE -
DRIVEN
SNOWBOARDING

The L1 team rides with intent, pushing the status quo, shaping our gear, the culture, and the future of snowboarding. They're lifers who take the path less chosen, shake up the norm, and do it all without apology.

Leaders without titles, driven by passion, style, and a deep respect for the culture that raised them. More than a team, they're the living embodiment of L1.

NOVA - X PRO TECHNOLOGY

Blending Human Innovation with Nature's Resilience

Nova-X Pro is the most advanced and lightest 3-layer shell we've ever built: a 4-way mechanical stretch face bonded to a bamboo-charcoal-infused waterproof/breathable membrane and a soft tricot backer. It's engineered for riders who demand all-season comfort, storm-level protection, and sustainability that doesn't wash out.

What Nova-X Pro Is

How It Works

- **Activated carbon at the fiber level:** Mature bamboo is carbonized (>800 °C), ground into ultra-fine particles, and embedded in the membrane not coated on the surface so the benefits are permanent and won't wash out.
- **Microporous, high-surface-area structure:** Bamboo charcoal's pore network creates an exceptionally high internal surface area, which helps manage moisture vapor and adsorb odor-causing compounds, improving next-to-skin comfort over long days.
- **Thermoregulation:** The charcoal phase helps moderate heat, retaining warmth in cold conditions and releasing excess heat when you're working.
- **Natural odor resistance:** Charcoal's adsorption properties reduce bacterial growth and neutralize odors without chemical antimicrobial finishes.

Performance in the Field

- **Stormproof protection:** 20K waterproofing + fully seam-taped construction keep weather out.
- **Real breathability:** 25K MVTR + moisture management from the charcoal layer helps you stay dry from the inside out.
- **Freedom to move:** 4-way mechanical stretch keeps mobility high for riding the mountain
- **Light, soft, quiet:** Low mass and a supple tricot backer for low bulk and low noise.
- **Natural odor resistance:** Charcoal's adsorption properties reduce bacterial growth and neutralize odors without chemical antimicrobial finishes.

Built to Last

- **Permanent performance:** Benefits remain for the life of the garment
- **Responsible materials:** 100% recycled polyester shell fabrics and PFC-free/CO DWR reduce impact without sacrificing performance.
- **Regenerative source:** Bamboo is fast-growing and highly renewable.
- **Fewer replacements:** Durable construction and timeless performance mean more seasons per garment.

Quick Spec Recap

- 3-Layer construction/4-way mechanical stretch
- 20K / 25K (WP/Breathability) | PFC-Free (CO) DWR
- 100% recycled polyester face | tricot backer
- Bamboo charcoal (activated carbon) embedded PU membrane
- Fully taped seams

PURPOSE - BUILT FABRICS

We ride in what we make, so our fabrics have to deliver. Every fabric we use has a purpose. We design for maximum performance, long-lasting style, and a lighter footprint on the planet. These are the premium materials behind the 26/27 L1 outerwear line.

NOVA-X PRO

Nova-X Pro - Axial Pro Collection

4-Way Mechanical Stretch 3L with Bamboo Charcoal Membrane
20K Waterproof / 25K Breathable | 100% Recycled Polyester

Our most advanced shell to date. Mechanical 4-way stretch for freedom of movement, bamboo charcoal PU membrane for breathability, thermoregulation, and odor resistance. Stormproof, sustainable, and engineered for riders who demand innovation without compromise.

DuraDobby - Lighthouse Collection

3-Layer Dobby Weave
20K Waterproof / 20K Breathable

Rugged, textured dobby weave built for harsh environments. Durable yet comfortable, lightweight yet storm-ready made for technical riding without sacrifice.

FlexShell - Easy Jacket & Pant

4-Way Mechanical Stretch 3L
15K Waterproof / 15K Breathable

Dynamic stretch for mobility-driven riding. Lightweight, durable, and versatile for all-mountain or freestyle performance. Backed with a breathable tricot mesh lining for comfort and secondary waterproofing.

ForgedWeave - Rankin, Fairfield & Prowler

Plain Weave 2L
10K Waterproof / 10K Breathable

Structured, durable, and dependable. This heavier-weight fabric keeps you dry through variable conditions while standing up to daily wear and tear. PFC-Free DWR for eco-friendly water repellency.

Cottera - Chroma Collection

Plain Weave 2L with Cotton Hand Feel
10K Waterproof / 10K Breathable

Street-inspired softness meets dependable performance. Lightweight, comfortable, and eco-treated for water resistance without harmful chemicals.

RipGuard - Ventura & Aftershock

Recycled Nylon Crinkle 2L / Micro Ripstop 2L
20K Waterproof / 20K Breathable

Eco-conscious recycled nylon with subtle crinkle texture for a vintage feel, paired with ultra-light recycled micro ripstop for durability and bold contrast. Built for riders who want personality with their performance.

Tricot Knit Backer - 3L Construction

Bonded 3-Layer Fabric backer | Waterproof / Breathable

A tricot knit backer is the soft inner layer of our 3-layer shells. Bonded directly to the waterproof membrane, it protects against abrasion and body oils while enhancing breathability and comfort. This lightweight knit also helps manage moisture and minimizes bulk, so the shell stays protective, durable, and easy to move in.

Interlock Backer - 3L Construction

Bonded 3-Layer Fabric | Waterproof / Breathable

An interlock knit backer forms the inner layer of our premium 3-layer shells. Laminated directly to the waterproof membrane, it protects against body oils and abrasion while delivering a smooth, comfortable feel against the skin. Heavier and more robust than tricot, interlock construction adds durability, breathability, and streamlined performance for demanding environments and high-output riding.

Taffeta Lining - 2L Construction

Durable Polyester or Nylon Lining

Taffeta lining is a thin, tightly woven fabric used inside our insulated outerwear. Smooth to the touch, it makes layering effortless while reinforcing structure and durability. Its crisp, lightweight weave adds abrasion resistance, helps garments retain shape, and keeps insulation securely contained. Taffeta provides reliable comfort and performance with a clean, polished interior finish.

Satin Lining - 2L Construction

Printed Polyester Satin Lining

Our satin lining pairs a smooth, glossy satin face with a soft brushed backing for warmth, comfort, and structure. This dual-layer construction adds insulation without bulk while providing a clean, polished interior finish. For 26/27, each satin liner is printed with graphics inspired by our team, bringing rider-driven creativity into the details of the line. Premium comfort and authentic storytelling inside every piece it lines.

NOVA-BLOFT

Novaloft - 100% Recycled Insulation

Lightweight Synthetic Loft Insulation
100% Recycled Polyester

Every insulated piece in the 26/27 L1 line is built with Novaloft, our fully recycled insulation. Designed to deliver premium warmth without bulk, Novaloft offers breathable comfort and reliable performance across the collection. Made entirely from recycled fibers, it's proof that high performance and sustainability can coexist.

Fully Seam Sealed

All seams are reinforced with waterproof tape to block out moisture. This full sealing method ensures maximum weatherproofing, keeping you dry even in the harshest conditions.

Strategic Seam Sealed

Only the main seams and high-exposure areas are sealed with waterproof tape. This focused approach balances dependable weather protection with lighter weight and improved breathability.

Cohaesive™

Cohaesive™

Quick & Easy Cord Lock Technology

Introducing the new Cohaesive Cord Lock technology found on the front hood and bottom hem of our Axial Pro collection. This cord lock system provides an easy pull-to-lock and press-to-release functionality that allows you to adjust on the fly and with gloves on.

Recycled Materials

Recycled Fabrics & Fibers

Wherever possible, we build with recycled fabrics to reduce our footprint without sacrificing performance. From shells to linings, these materials give a second life to waste while delivering the same durability, weather protection, and style you expect from L1. It's one more step toward a future where every piece in our line is fully recycled.

Bamboo Charcoal Membrane - Regulating nanotech inspired by nature

20K Breathability - 20,000mm breathability

20K Waterproofing - 20,000mm waterproofing

Shell - Your top-tier barrier when layering

15K Breathability - 15,000mm breathability

15K Waterproofing - 15,000mm waterproofing

25K Breathability - 25,000mm breathability

10K Breathability - 10,000mm breathability

10K Waterproofing - 10,000mm waterproofing

3-Layer Construction

Our 3-layer shells bond the outer fabric, waterproof membrane, and interior backer into a single performance material. This streamlined construction is fully waterproof, windproof, and breathable—delivering durable weather protection without the need for a separate lining. Lightweight, low-bulk, and built for demanding conditions, 3L technology keeps riders moving comfortably through the harshest elements.

2-Layer Construction

Our 2-layer shells pair a durable face fabric with a waterproof, breathable membrane and add a soft interior lining for comfort. Fully waterproof, windproof, and breathable, this construction balances reliable protection with the warmth and feel of a traditional lining. Whether finished with taffeta or satin, 2L technology offers versatile performance for riders looking for dependable, all-conditions outerwear.

3L vs. 2L Construction

3-Layer Construction

- Streamlined protection without compromise
- Outer fabric + waterproof membrane + knit backer
- Bonded into a single lightweight performance material
- Low bulk, maximum durability, built for demanding conditions

2-Layer Construction

- Versatile protection with everyday comfort
- Durable outer fabric + waterproof membrane
- Taffeta or satin lining adds comfort and warmth
- Dependable protection for all-conditions riding

WE BUILD OUTERWEAR WITH PURPOSE.

For us, sustainability isn't a trend, it's a responsibility. From the fabrics we choose to the way we manufacture, we focus on creating high-quality, long-lasting gear that minimizes waste.

By manufacturing to order, we avoid overproduction, prevent unnecessary waste, and eliminate the need for heavy discounts mid-winter. This keeps products out of landfills and preserves their value.

We were one of the first outerwear brands to transition to PFC-free with our DWR coating, and we continue to incorporate recycled materials throughout our line, including 100% recycled polyester insulation. Our approach blends performance, durability, and responsibility, ensuring that every piece you wear is built to last.

Field Tested

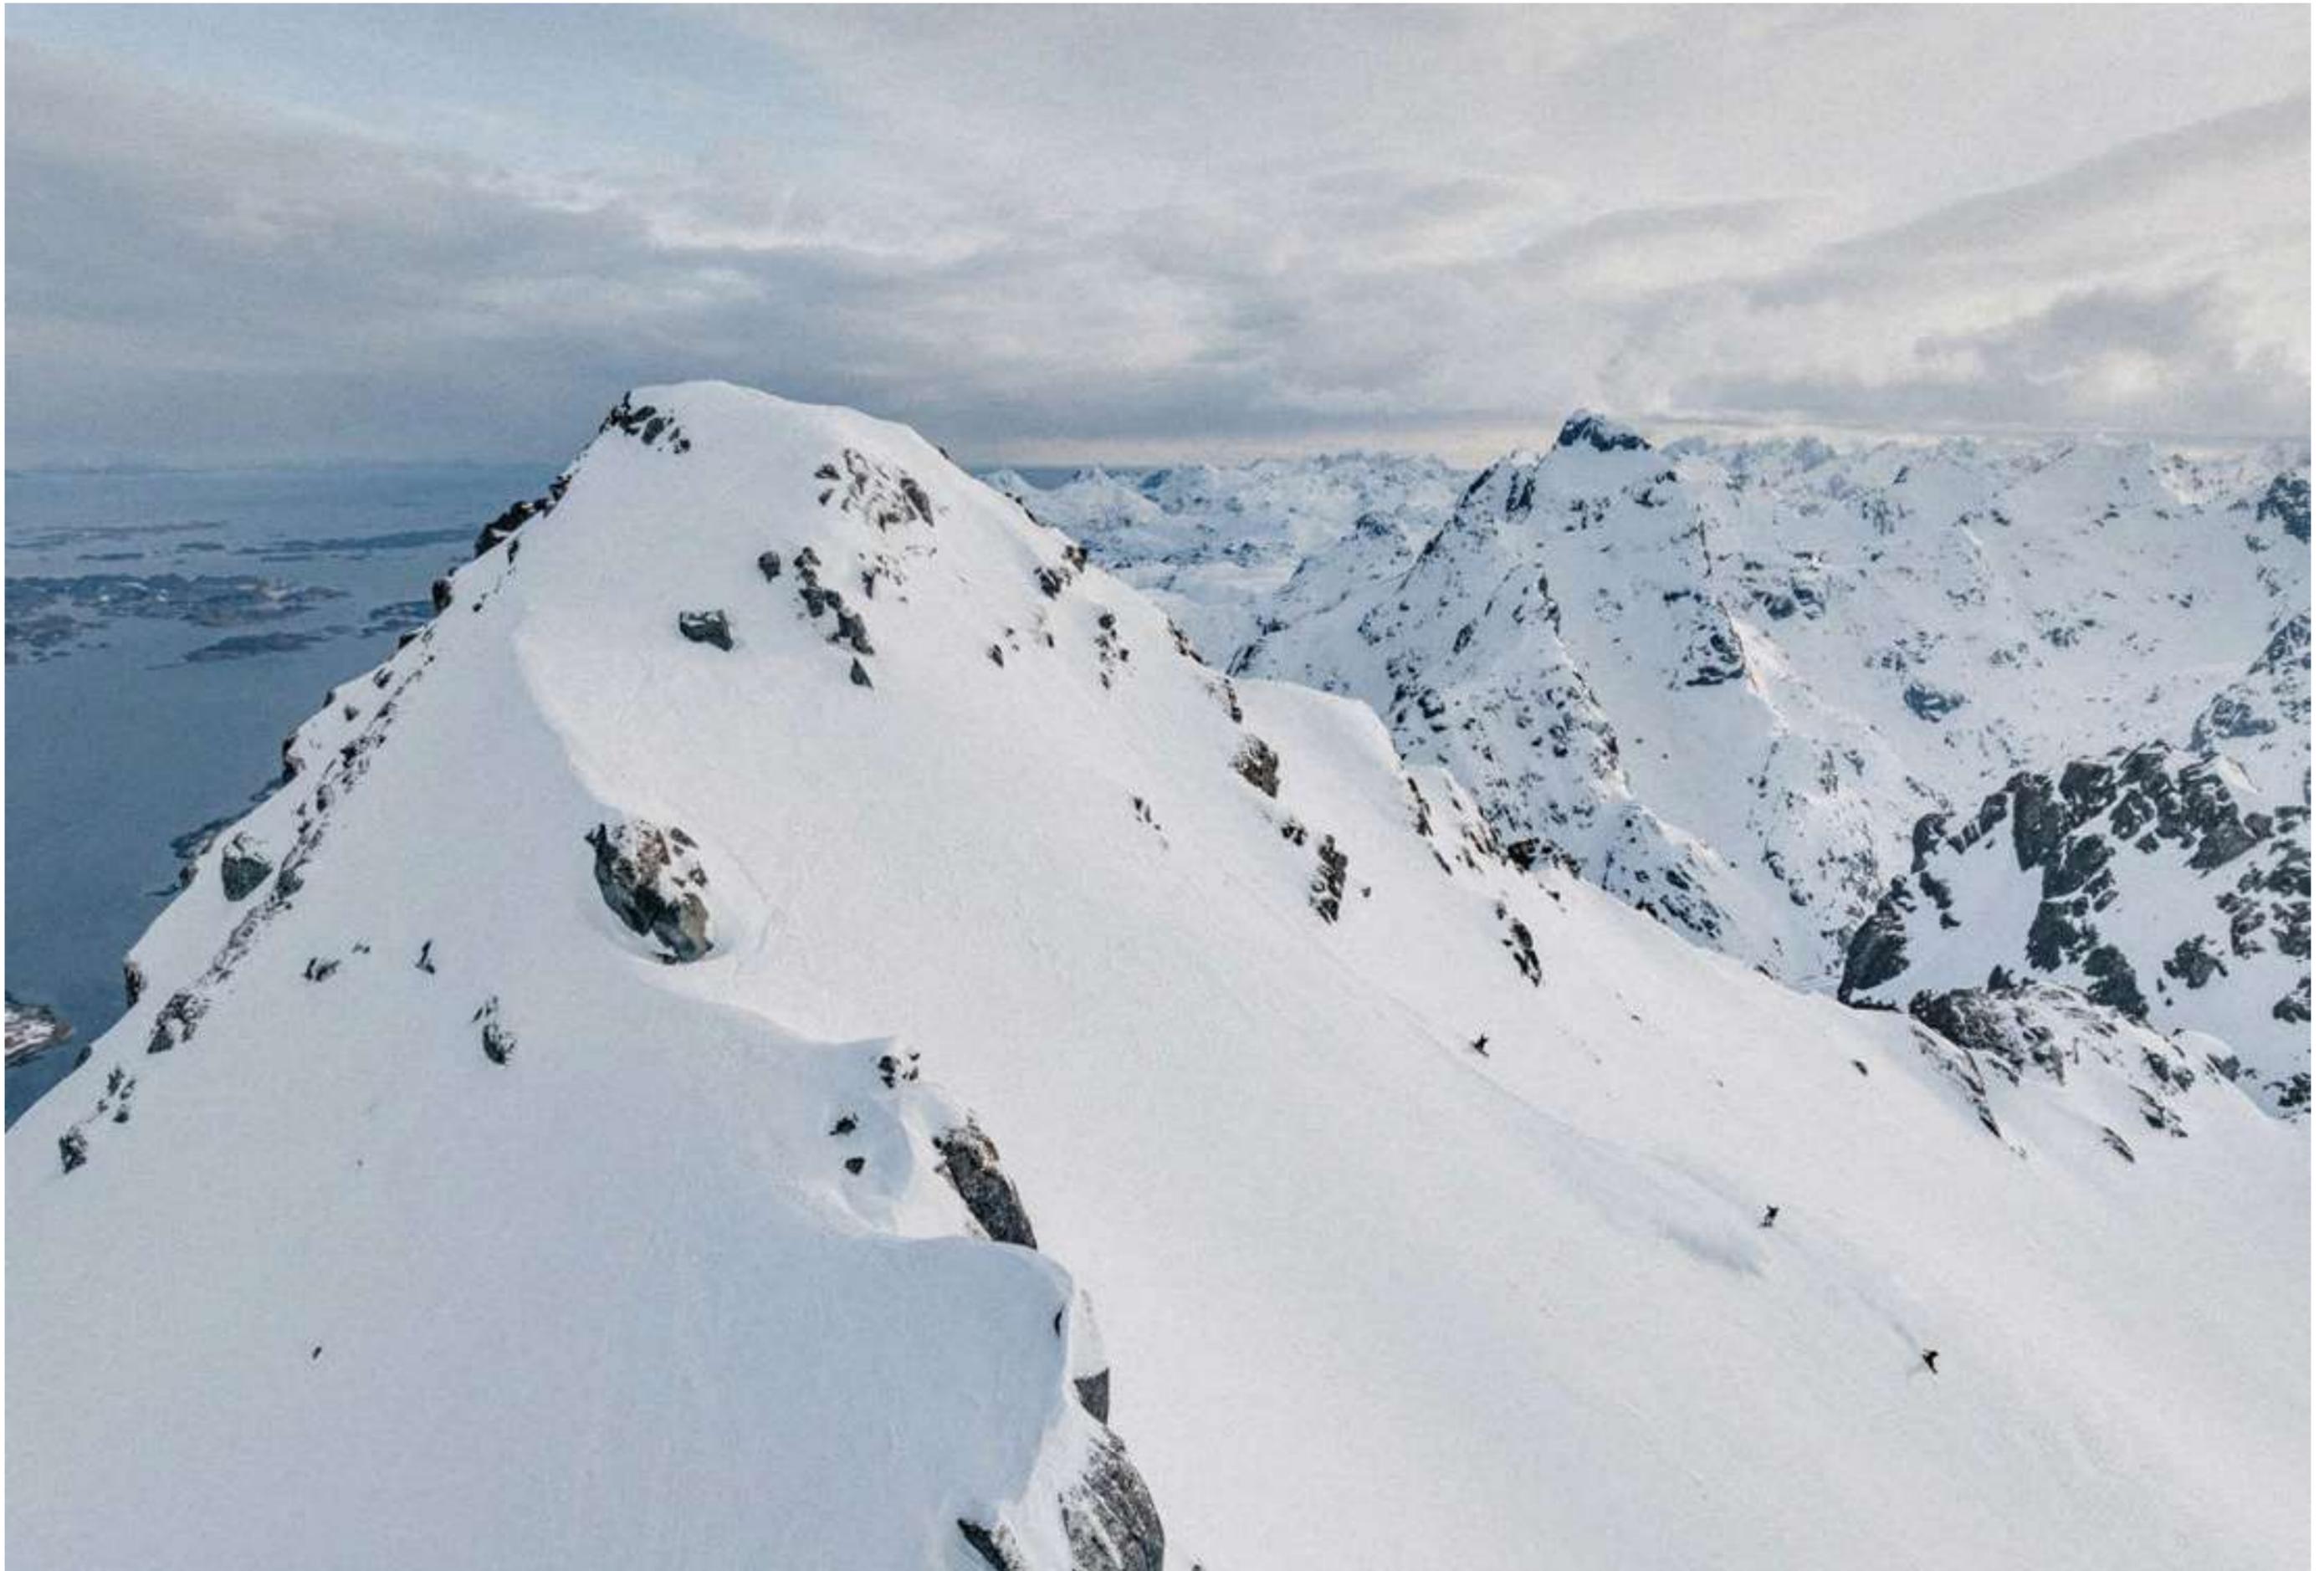

AXIAL PRO - NOVA-X PRO PERFORMANCE IN LOFOTEN

Location: Lofoten, Norway
Rider: Knut Eliassen
Photographer: Markus Rohrbacher

Lofoten is one of the most breathtaking places on Earth. Jagged mountains erupt straight from icy fjords, the sea at their base shimmering in the crisp Arctic light. In the spring, the sun barely dips below the horizon, stretching days into endless golden hours. It's the kind of place that begs to be explored on a splitboard, and the perfect proving ground for the Axial Pro.

The L1 team put the Axial Pro with its Nova-X Pro membrane through the ultimate test: long puckering ascents, unpredictable weather, and constant exposure. The waterproof, breathable performance, along with its lightweight build, exceeded expectations. Keeping the crew dry and comfortable from first light walks to riding sunset lines. From frozen ridgelines to wind-blown summits, the gear handled it all, standing up to the demands of backcountry travel in one of the harshest yet most beautiful environments in the world.

REGULAR FIT

LOOSE FIT

OVERSIZED FIT

REGULAR FIT

OVERSIZED FIT

FIT INITIATIVE

Designed with Intent.

Fit has always been a defining part of L1's identity, a reflection of our team riders' style and a critical element of our gear's performance. Over the years, we've led the evolution of fit in snowboarding, from pioneering the functional Thunder skinny fit to pushing a tasteful, oversized Rankin Pant silhouette.

We've evolved and refined our fits with intention, keeping them refined and relevant while setting the standard for how snowboard gear should fit.

With just three distinct fits – Oversized, Loose, and Regular – the line is clean, intentional, and dialed for snowboarders who care about how their gear performs and looks.

Oversized: Our roomiest fit, designed to fit baggy with a generous fit through the seat, thigh and a straighter leg opening.

Loose: More room to move with a comfortable fit through the seat, thigh and a straighter leg opening.

Regular: Our traditional fit with room to layer, without being overly loose. Standard fit through the seat, thigh and a straighter leg opening.

A X I A L P R O S E R I E S

Having a signature outerwear kit shows that L1 truly backs snowboarding's heritage and that support is everything. The atmospheric colorway feels galactic, and the fit is spot-on after years of tweaking and listening to rider feedback. The hive icon represents the grind to keep snowboarding in our lives forever and the community L1 has built in support of the culture.

AXIAL PRO JACKET

Blending Human Innovation with Nature's Resilience

Built with Nova-X Pro™, our most advanced 3-layer shell, combining 4-way mechanical stretch with a bamboo charcoal membrane for peak breathability, thermoregulation, and odor resistance. With a 20K waterproof / 25K breathable rating, this lightweight stormproof kit thrives in every

condition from deep pow days to long bootpacks. Regular fit for complete freedom of movement and layering. Designed with our team, tested in the harshest conditions, and made with recycled materials. Now available in the **Jeremy Jones** signature colorway.

Nirvana is 5'11" / 1.55m, weighs 120lbs / 54kg and wears size S,
Luke is 5'9" / 1.75m, weighs 155lbs / 70kg and wears size M.

VENTURA SERIES

So many of us are particular about the fit and feel of our outerwear and the Ventura kit is fit perfection. Pavlova-inspired in color – an iconic New Zealand dessert, it's subtle but still makes a statement. My favorite outerwear kit yet.

VENTURA JACKET

Powered by Personality.

Built with our 20K/20K RipGuard™ fabric, the Ventura delivers lightweight durability with a street-meets-mountain edge. Its recycled micro ripstop shell stands up to the elements while keeping you moving freely. This season, **Christy Prior** adds her own signature touch with a vibrant

colorway that matches her fearless riding and bigger-than-life personality. Perfect for riders who want their outerwear to stand out as much as their style, the Ventura fuses performance, personality, and all-weather protection.

RANKIN COLLECTION, FORGEDWEAVE TOUGH

Location: Japan

Rider: Dominik Wagner & Jordan Morse

Photographer: Bob Plumb

Last winter, Japan was the place to be, the only spot on Earth blessed with snow. Dom and JMO flew in to Japan to film for the Nitro film Spike, armed with the team favorite Rankin gear and its bombproof ForgedWeave fabric.

From snow flurries to frozen temps to humid thaws with rain, the weather didn't let up. Late-night missions, early-morning sessions, and dodging police became the norm. Hours on Google Earth provided spots new and old. The gear handled everything they threw at it, keeping them dry, warm, and thriving through countless slams and hard-fought battles.

MEN'S COLLECTION

EASY JACKET

Simplicity in Motion.

Introducing the Easy Jacket, taking away the unnecessary and focusing on what matters most: fit, mobility, and clean style. Built with our FlexShell 4-way mechanical stretch fabric, it delivers lightweight freedom of movement and dependable weather protection. The minimalist design

keeps it timeless, while the 3-layer construction keeps you dry, light, and ready for whatever the mountain throws your way. From park laps to sidecountry hikes, the Easy Jacket is your go-anywhere, ride-anything kit.

AFTERSHOCK ANORAK

A Classic, Reimagined.

The Aftershock Anorak has been a staple in the L1 line for years, trusted by riders for its style, function, and no-nonsense performance. For 26/27, we've rebuilt it from the ground up. The new design combines its signature anorak attitude with modern fit and function, featuring RipGuard

recycled micro ripstop for lightweight durability, 20K/20K storm protection, and 150g of 100% recycled polyester insulation for reliable warmth without bulk. Same spirit, new standard ready for any cold-weather situation, on or off the mountain.

Jordan is 5'9" / 1.75m, weighs 165lbs / 75kg and wears size L.

RANKIN SERIES

I'm extremely honored to have my own signature jacket & pant with L1. The Rankin kit has been my favorite in the collection and I'm hyped to have my own colorway on it now. The fit & feel were already perfect and now the new camo print takes the look to the next level. We even added a little heritage EE logo from my early pro model boards for some nostalgia.

A handwritten signature in gold ink, reading "Eric Johnson".

RANKIN JACKET

Team-Tested Durability.

The Rankin Jacket is a staple for a reason. Built with our **ForgedWeave** 2-layer shell, 40g insulation, and PFC-free DWR, it's inspired by rugged workwear and proven daily by our team. From street rails to storm days, its 10K/10K waterproof-breathable protection and bulletproof build are designed to take a beating and keep going. This year, it gets an extra dose of style with

a signature rider colorway from **Eero Ettala** a nod to his precision, creativity, and decades of influence in snowboarding. Relaxed, ride-ready, and unapologetically functional, the Rankin is durability, refined.

Justin is 5'10" / 1.78m, weighs 148lbs / 67kg and wears size M.

CHROMA SERIES

Simplicity is key that's what my signature gear is all about. The Chroma Collection is everything I've ever wanted from L1: clean, perfectly fitting, and free from gimmicks or unnecessary features. Collaborating with Fabian Fuchs made this project even more special, his artwork is subtly placed exactly where it feels right, adding just the right amount of personality. And honestly, who doesn't love an all-black outerwear combo?

Wayne Danish

FAIRFIELD COLLECTION

Location: Woodward Park City
Rider: Brantley Mullins
Photographer: Bob Plumb

I started riding in the Fairfield Pant preseason at Trollhaugen and put a full season on them – plus a month of summer laps at Mt. Hood. After all those days, they’ve held up amazingly well: no ripped belt loops, no blown-out pockets, zippers still intact. The only wear? A little sun fading from long glacier days with UV at 10, which feels minor compared to the abuse they’ve taken.

What really stands out is finally having a women’s fit in the lineup that actually works. The Fairfield delivers the baggier fit I want without having to size up into men’s gear. It’s women’s outerwear built with intention – because not every rider wants the classic tight look. Having that choice makes a big difference. The perfect mix of style, function, and durability that lasts.

WOMEN'S COLLECTION

PROWLER JACKET

Classic Reimagined

The Women's Prowler Anorak has been a cornerstone of the L1 women's line, a trusted favorite season after season. For 26/27, it's been completely redesigned, blending a modern anorak silhouette with the same performance riders have always counted on. Built with our durable

ForgedWeave fabric and 40g of insulation, it delivers the perfect balance of warmth, comfort, durability, and mobility. A true staple reimagined for today's riders.

RGLR FIT Nirvana is 5'1" / 1.55m, weighs 120lbs / 54kg and wears size S.

FAIRFIELD SERIES

The baggy fit is exactly how I've always wanted it, stylish, comfortable and made to ride in all day. My "Burnt Rose" colorway is for the girls, and the little cowboy boot detail ties it back to my southern roots. It means a lot to wear outerwear that reflects who I am, and to work with a brand that truly listens to its riders. The Fairfield line is the result of that collaboration.

Brantley Mullin

FAIRFIELD JACKET

Durability Refined

Introducing the all-new Fairfield Jacket, the women's answer to our team-favorite Rankin Jacket. Inspired by classic workwear and engineered for snowboarding, it's built with our rugged **ForgedWeave** fabric, 40g of insulation, and rider-driven function. Designed to handle anything

the mountain (or the crew) throws at it, the Fairfield is durable, dependable, and ready for seasons of abuse. This season, team rider **Brantley Mullins** brings her own signature colorway to the mix, adding a personal touch to a piece that's guaranteed to be a team favorite from day one.
